SELF ASSESSMENT GUIDE

Qualification:	lification: ELECTRIC POWER DISTRIBUTION LINE CONSTRUCTION NC II		
Project:	Performing Basic Power Distribution Line Construction Work		
Units of Competency Covered:	 Erect Distribution Line Poles Climb Pole and Install Pole Assembly/Conductors Install Distribution Line Equipment and Devices Install Consumer Service Connection Facility 		
	e questions in the left-hand column of the chatter the appropriate box opposite each question		te your
Can I?		YES	NO
Secure and interpret work instructions according to job requirements*			
	Identify and apply relevant occupational health and safety requirements following job specifications*		
Identify, requests and acquire relevant distribution line tools, equipment and hardware in accordance with construction specifications*			
 Obtain and use per job requirements* 	Obtain and use personal protective equipment (PPE) following job requirements*		
-	Perform loading and unloading procedure for poles following safety requirements*		
 Perform poles hauli staking sheet* 	Perform poles hauling and pole spotting (unloading) based on staking sheet*		
	Use distribution line tools, equipment and hardware in line with construction specifications*		
Perform pole-hole or requirements*	Perform pole-hole digging following established depth requirements*		
Install pole grounding	Install pole grounding*		
Perform pole setting requirements*	Perform pole setting/erection procedure in line with job requirements*		
	Demonstrate pole climbing technique in line with occupational health and safety standards*		

•	Perform installation of pole top assembly in accordance with construction specifications*		
•	Perform boring in accordance with the construction specification*		
•	Install anchor and guy based on construction specification*		
•	Perform stringing and tensioning of conductor*		
•	Apply armoring and tying of conductors*		
•	Install line equipment and devices in accordance with construction specifications and standards*		
•	Perform line tapping and connection in accordance with the construction specification*		
•	Install service drop according construction standards and requirements*		
•	Install KWH meter according to construction standards and requirements*		
•	Perform housekeeping procedure in line with established procedure*
