## TRAINING REGULATIONS FOR HEAVY EQUIPMENT OPERATION - OFF-HIGHWAY DUMP TRUCK (ARTICULATED) NC II

## SECTION 1 HEAVY EQUIPMENT OPERATION - OFF-HIGHWAY DUMP TRUCK (ARTICULATED) NC II

The HEAVY EQUIPMENT OPERATION - OFF-HIGHWAY DUMP TRUCK (ARTICULATED) NC II qualification consists of competencies that workers must achieve to enable them to perform tasks such as loading and dumping of earth materials in the construction, mining sites or other locations.

This qualification is packaged from the competency map of Construction - Heavy Equipment sub-sector as shown in Annex A.

The units of competency comprising this qualification include the following:

CODE NO.	BASIC COMPETENCIES
	Units of Competency
500311105 500311106 500311107 500311108	Participate in workplace communication Work in a team environment Practice career professionalism Practice occupational health and safety procedures
CODE NO.	COMMON COMPETENCIES
	Units of Competency
CON931201 CON311201 CON311202 CON311203 CON311204	Prepare construction materials and tools Observe procedures, specifications and manuals of instruction Interpret technical drawings and plans Perform mensurations and calculations Maintain tools and equipment
CODE NO.	CORE COMPETENCIES
CON833316	Perform pre- and post-operation procedures for hauling equipment
CON833317	Perform basic preventive maintenance servicing for hauling equipment
CON833320	Perform productive operation for off-highway dump truck (articulated)

A person who has achieved this Qualification is competent to be an -

Off-highway dump truck (articulated) operator

#### **SECTION 2 COMPETENCY STANDARDS**

This section gives the details and contents of the core units of competency required in **HEAVY EQUIPMENT OPERATION - OFF-HIGHWAY DUMP TRUCK (ARTICULATED) NC II**. These units of competency are categorized into basic, common and core competencies.

#### **BASIC COMPETENCIES**

UNIT OF COMPETENCY:	PARTICIPATE IN WORKPLACE COMMUNICATION
UNIT CODE :	500311105
UNIT DESCRIPTOR :	This unit covers the knowledge, skills and attitudes required to
	gather, interpret and convey information in response to workplace requirements.

CI EMENT	PERFORMANCE CRITERIA
ELEMENT	Italicized terms are elaborated in the Range of Variables
1. Obtain and convey	1.1 Specific and relevant information is accessed from
workplace	appropriate sources
information	1.2 Effective questioning , active listening and speaking skills are used to gather and convey information
	1.3 Appropriate <i>medium</i> is used to transfer information and ideas
	1.4 Appropriate non- verbal communication is used
	1.5 Appropriate lines of communication with supervisors and colleagues are identified and followed
	1.6 Defined workplace procedures for the location and <b>storage</b> of information are used
	1.7 Personal interaction is carried out clearly and concisely
2. Participate in	2.1 Team meetings are attended on time
workplace meetings and	2.2 Own opinions are clearly expressed and those of others are listened to without interruption
discussions	2.3 Meeting inputs are consistent with the meeting purpose and established <i>protocols</i>
	2.4 <b>Workplace interactions</b> are conducted in a courteous manner
	2.5 Questions about simple routine workplace procedures and maters concerning working conditions of employment are asked and responded to
	2.6 Meetings outcomes are interpreted and implemented

Complete relevant work related	3.1 Range of <i>forms</i> relating to conditions of employment are completed accurately and legibly
documents	3.2 Workplace data is recorded on standard workplace forms and documents
	3.3 Basic mathematical processes are used for routine calculations
	3.4 Errors in recording information on forms/ documents are identified and properly acted upon
	3.5 Reporting requirements to supervisor are completed according to organizational guidelines

VARIABLE	RANGE
Appropriate sources	<ul><li>1.1. Team members</li><li>1.2. Suppliers</li><li>1.3. Trade personnel</li><li>1.4. Local government</li><li>1.5. Industry bodies</li></ul>
2. Medium	<ul> <li>2.1. Memorandum</li> <li>2.2. Circular</li> <li>2.3. Notice</li> <li>2.4. Information discussion</li> <li>2.5. Follow-up or verbal instructions</li> <li>2.6. Face to face communication</li> </ul>
3. Storage	<ul><li>3.1. Manual filing system</li><li>3.2. Computer-based filing system</li></ul>
4. Forms	4.1. Personnel forms, telephone message forms, safety reports
5. Workplace interactions	<ul> <li>5.1. Face to face</li> <li>5.2. Telephone</li> <li>5.3. Electronic and two way radio</li> <li>5.4. Written including electronic, memos, instruction and forms, non-verbal including gestures, signals, signs and diagrams</li> </ul>
6. Protocols	<ul><li>6.1. Observing meeting</li><li>6.2. Compliance with meeting decisions</li><li>6.3. Obeying meeting instructions</li></ul>

Critical Aspects of Competency	<ul> <li>Assessment requires evidence that the candidate:</li> <li>1.1. Prepared written communication following standard format of the organization</li> <li>1.2. Accessed information using communication equipment</li> <li>1.3. Made use of relevant terms as an aid to transfer information effectively</li> <li>1.4. Conveyed information effectively adopting the formal or informal communication</li> </ul>
Underpinning     Knowledge and Attitudes	<ul> <li>2.1. Effective communication</li> <li>2.2. Different modes of communication</li> <li>2.3. Written communication</li> <li>2.4. Organizational policies</li> <li>2.5. Communication procedures and systems</li> <li>2.6. Technology relevant to the enterprise and the individual's work responsibilities</li> </ul>
3. Underpinning Skills	<ul> <li>3.1. Follow simple spoken language</li> <li>3.2. Perform routine workplace duties following simple written notices</li> <li>3.3. Participate in workplace meetings and discussions</li> <li>3.4. Complete work related documents</li> <li>3.5. Estimate, calculate and record routine workplace measures</li> <li>3.6. Basic mathematical processes of addition, subtraction, division and multiplication</li> <li>3.7. Ability to relate to people of social range in the workplace</li> <li>3.8. Gather and provide information in response to workplace Requirements</li> </ul>
4. Resource Implications	<ul><li>4.1. Fax machine</li><li>4.2. Telephone</li><li>4.3. Writing materials</li><li>4.4. Internet</li></ul>
5. Methods of Assessment	<ul><li>5.1. Direct Observation</li><li>5.2. Oral interview and written test</li></ul>
6. Context of Assessment	6.1. Competency may be assessed individually in the actual workplace or through accredited institution

UNIT OF COMPETENCY:		WORK IN TEAM ENVIRONMENT
UNIT CODE		500311106
UNIT DESCRIPTOR		This unit covers the skills, knowledge and attitudes to
		identify role and responsibility as a member of a team.

EL EMENIT	PERFORMANCE CRITERIA
ELEMENT	Italicized terms are elaborated in the Range of Variables
Describe team role and scope	<ul> <li>1.1. The <i>role and objective of the team</i> is identified from available <i>sources of information</i></li> <li>1.2. Team parameters, reporting relationships and responsibilities are identified from team discussions and appropriate external sources</li> </ul>
Identify own role and responsibility within team	<ul> <li>2.1. Individual role and responsibilities within the team environment are identified</li> <li>2.2. Roles and responsibility of other team members are identified and recognized</li> <li>2.3. Reporting relationships within team and external to team are identified</li> </ul>
3. Work as a team member	<ul> <li>3.1. Effective and appropriate forms of communications used and interactions undertaken with team members who contribute to known team activities and objectives</li> <li>3.2. Effective and appropriate contributions made to complement team activities and objectives, based on individual skills and competencies and workplace context</li> <li>3.3. Observed protocols in reporting using standard operating procedures</li> <li>3.4. Contribute to the development of team work plans based on an understanding of team's role and objectives and individual competencies of the members.</li> </ul>

VARIABLE	RANGE
Role and objective of team	Work activities in a team environment with enterprise or specific sector      Limited discretion, initiative and judgement maybe demonstrated on the job, either individually or in a team environment
2. Sources of information	<ul> <li>2.1. Standard operating and/or other workplace procedures</li> <li>2.2. Job procedures</li> <li>2.3. Machine/equipment manufacturer's specifications and instructions</li> <li>2.4. Organizational or external personnel</li> <li>2.5. Client/supplier instructions</li> <li>2.6. Quality standards</li> <li>2.7. OHS and environmental standards</li> </ul>
3. Workplace context	<ul> <li>3.1. Work procedures and practices</li> <li>3.2. Conditions of work environments</li> <li>3.3. Legislation and industrial agreements</li> <li>3.4. Standard work practice including the storage, safe handling and disposal of chemicals</li> <li>3.5. Safety, environmental, housekeeping and quality guidelines</li> </ul>

Critical aspects of competency	Assessment requires evidence that the candidate: 1.1. Operated in a team to complete workplace activity 1.2. Worked effectively with others 1.3. Conveyed information in written or oral form 1.4. Selected and used appropriate workplace language 1.5. Followed designated work plan for the job 1.6. Reported outcomes
Underpinning     Knowledge and Attitude	<ul><li>2.1. Communication process</li><li>2.2. Team structure</li><li>2.3. Team roles</li><li>2.4. Group planning and decision making</li></ul>
3. Underpinning Skills	3.1. Communicate appropriately, consistent with the culture of the workplace
4. Resource Implications	The following resources MUST be provided: 4.1. Access to relevant workplace or appropriately simulated environment where assessment can take place 4.2. Materials relevant to the proposed activity or tasks
5. Methods of Assessment	Competency may be assessed through: 5.1. Observation of the individual member in relation to the work activities of the group 5.2. Observation of simulation and or role play involving the participation of individual member to the attainment of organizational goal 5.3. Case studies and scenarios as a basis for discussion of issues and strategies in teamwork
6. Context for Assessment	<ul> <li>6.1. Competency may be assessed in workplace or in a simulated workplace setting</li> <li>6.2. Assessment shall be observed while task are being undertaken whether individually or in group</li> </ul>

UNIT OF COMPETENCY:		PRACTICE CAREER PROFESSIONALISM
UNIT CODE	:	500311107
UNIT DESCRIPTOR	:	This unit covers the knowledge, skills and attitudes in
		promoting career growth and advancement.

ELEMENT	PERFORMANCE CRITERIA  Italicized terms are elaborated in the Range of Variables
Integrate personal objectives with organizational goals	<ul> <li>1.1 Personal growth and work plans are pursued towards improving the qualifications set for the profession</li> <li>1.2 Intra- and interpersonal relationships are maintained in the course of managing oneself based on performance <i>evaluation</i></li> <li>1.3 Commitment to the organization and its goal is demonstrated in the performance of duties</li> </ul>
Set and meet work priorities	<ul> <li>2.1 Competing demands are prioritized to achieve personal, team and organizational goals and objectives.</li> <li>2.2 <i>Resources</i> are utilized efficiently and effectively to manage work priorities and commitments</li> <li>2.3 Practices along economic use and maintenance of equipment and facilities are followed as per established procedures</li> </ul>
Maintain professional growth and development	<ul> <li>3.1 Trainings and career opportunities are identified and availed of based on job requirements</li> <li>3.2 Recognitions are -sought/received and demonstrated as proof of career advancement</li> <li>3.3 Licenses and/or certifications relevant to job and career are obtained and renewed</li> </ul>

VARIABLE	RANGE
1. Evaluation	<ul><li>1.1 Performance Appraisal</li><li>1.2 Psychological Profile</li><li>1.3 Aptitude Tests</li></ul>
2. Resources	2.1 Human 2.2 Financial 2.3 Technology 2.3.1 Hardware 2.3.2 Software
Trainings and career opportunities	<ul> <li>3.1 Participation in training programs</li> <li>3.1.1 Technical</li> <li>3.1.2 Supervisory</li> <li>3.1.3 Managerial</li> <li>3.1.4 Continuing Education</li> <li>3.2 Serving as Resource Persons in conferences and workshops</li> </ul>
4. Recognitions	<ul> <li>4.1 Recommendations</li> <li>4.2 Citations</li> <li>4.3 Certificate of Appreciations</li> <li>4.4 Commendations</li> <li>4.5 Awards</li> <li>4.6 Tangible and Intangible Rewards</li> </ul>
5. Licenses and/or certifications	<ul><li>5.1 National Certificates</li><li>5.2 Certificate of Competency</li><li>5.3 Support Level Licenses</li><li>5.4 Professional Licenses</li></ul>

Critical Aspects of Competency	Assessment requires evidence that the candidate: 1.1 Attained job targets within key result areas (KRAs) 1.2 Maintained intra - and interpersonal relationship in the course of managing oneself based on performance evaluation 1.3 Completed trainings and career opportunities which are based on the requirements of the industries 1.4 Acquired and maintained licenses and/or certifications according to the requirement of the qualification
Underpinning     Knowledge	<ul> <li>2.1 Work values and ethics (Code of Conduct, Code of Ethics, etc.)</li> <li>2.2 Company policies</li> <li>2.3 Company-operations, procedures and standards</li> <li>2.4 Fundamental rights at work including gender sensitivity</li> <li>2.4 Personal hygiene practices</li> </ul>
3. Underpinning Skills	<ul><li>3.1 Appropriate practice of personal hygiene</li><li>3.2 Intra and Interpersonal skills</li><li>3.3 Communication skills</li></ul>
4. Resource Implications	The following resources <b>MUST</b> be provided: 4.1 Workplace or assessment location 4.2 Case studies/scenarios
5. Methods of Assessment	Competency may be assessed through: 5.1 Portfolio Assessment 5.2 Interview 5.3 Simulation/Role-plays 5.4 Observation 5.5 Third Party Reports 5.6 Exams and Tests
6. Context of Assessment	6.1 Competency may be assessed in the work place or in a simulated work place setting

UNIT OF COMPETENCY: PRACTICE OCCUPATIONAL HEALTH AND SAFETY

PROCEDURES

UNIT CODE : 500311108

UNIT DESCRIPTOR : This unit covers the outcomes required to comply with

regulatory and organizational requirements for

occupational health and safety.

	DEDEODMANOS ODITEDIA
ELEMENT	PERFORMANCE CRITERIA  Italicized terms are elaborated in the
LELINENT	Range of Variables
1. Identify hazards and risks	1.1 <b>Safety regulations</b> and workplace safety and
	hazard control practices and procedures are
	clarified and explained based on organization
	procedures
	1.2 <i>Hazards/risks</i> in the workplace and their corresponding indicators are identified to minimize
	or eliminate risk to co-workers, workplace and
	environment in accordance with organization
	procedures
	1.3 <b>Contingency measures</b> during workplace
	accidents, fire and other emergencies are
	recognized and established in accordance with
	organization procedures
Evaluate hazards and risks	2.1 Terms of maximum tolerable limits which when
2. Evaluate flazarus ariu fisks	exceeded will result in harm or damage are
	identified based on threshold limit values (TLV)
	2.2 Effects of the hazards are determined
	2.3 OHS issues and/or concerns and identified safety
	hazards are reported to designated personnel in
	accordance with workplace requirements and
	relevant workplace OHS legislation
Control hazards and risks	3.1 Occupational Health and Safety (OHS) procedures
o. Common nazarao ana noko	for controlling hazards/risks in workplace are
	consistently followed
	3.2 Procedures for dealing with workplace accidents,
	fire and emergencies are followed in accordance
	with organization OHS policies
	3.3 <b>Personal protective equipment (PPE)</b> is correctly
	used in accordance with organization OHS procedures and practices
	3.4 Appropriate assistance is provided in the event of a
	workplace emergency in accordance with
	established organization protocol
	·

4. Maintain OHS awareness	4.1	Emergency-related drills and trainings are participated in as per established organization guidelines and procedures  OHS personal records are completed and updated in accordance with workplace requirements
		in accordance with workplace requirements

VARIABLE	RANGE
Safety regulations	May include but are not limited to: 1.1 Clean Air Act 1.2 Building code 1.3 National Electrical and Fire Safety Codes 1.4 Waste management statutes and rules 1.5 Philippine Occupational Safety and Health Standards 1.6 DOLE regulations on safety legal requirements 1.7 ECC regulations
2. Hazards/Risks	May include but are not limited to: 2.1 Physical hazards – impact, illumination, pressure, noise, vibration, temperature, radiation 2.2 Biological hazards- bacteria, viruses, plants, parasites, mites, molds, fungi, insects 2.3 Chemical hazards – dusts, fibers, mists, fumes, smoke, gasses, vapors 2.4 Ergonomics 2.4.1 Psychological factors – over exertion/ excessive force, awkward/static positions, fatigue, direct pressure, varying metabolic cycles 2.4.2 Physiological factors – monotony, personal relationship, work out cycle
3. Contingency measures	May include but are not limited to: 3.1 Evacuation 3.2 Isolation 3.3 Decontamination 3.4 (Calling designed) emergency personnel
4. PPE	May include but are not limited to: 4.1 Mask 4.2 Gloves 4.3 Goggles 4.4 Hair Net/cap/bonnet 4.5 Face mask/shield 4.6 Ear muffs 4.7 Apron/Gown/coverall/jump suit 4.8 Anti-static suits

5. Emergency-related drills and training	5.1 Fire drill 5.2 Earthquake drill 5.3 Basic life support/CPR 5.4 First aid 5.5 Spillage control 5.6 Decontamination of chemical and toxic 5.7 Disaster preparedness/management
6. OHS personal records	<ul><li>6.1 Medical/Health records</li><li>6.2 Incident reports</li><li>6.3 Accident reports</li><li>6.4 OHS-related training completed</li></ul>

EVIDENCE GUIDE	
Critical Aspects of Competency	<ul> <li>Assessment requires evidence that the candidate:</li> <li>1.1 Explained clearly established workplace safety and hazard control practices and procedures</li> <li>1.2 Identified hazards/risks in the workplace and its corresponding indicators in accordance with company procedures</li> <li>1.3 Recognized contingency measures during workplace accidents, fire and other emergencies</li> <li>1.4 Identified terms of maximum tolerable limits based on threshold limit value- TLV.</li> <li>1.5 Followed Occupational Health and Safety (OHS) procedures for controlling hazards/risks in workplace</li> <li>1.6 Used Personal Protective Equipment (PPE) in accordance with company OHS procedures and practices</li> <li>1.7 Completed and updated OHS personal records in accordance with workplace requirements</li> </ul>
Underpinning     Knowledge and     Attitude	2.1 OHS procedures and practices and regulations 2.2 PPE types and uses 2.3 Personal hygiene practices 2.4 Hazards/risks identification and control 2.5 Threshold Limit Value -TLV 2.6 OHS indicators 2.7 Organization safety and health protocol 2.8 Safety consciousness 2.9 Health consciousness
3. Underpinning Skills	<ul><li>3.1 Practice of personal hygiene</li><li>3.2 Hazards/risks identification and control skills</li><li>3.3 Interpersonal skills</li><li>3.4 Communication skills</li></ul>
4. Resource Implications	The following resources must be provided: 4.1 Workplace or assessment location 4.2 OHS personal records 4.3 PPE 4.4 Health records
5. Methods of Assessment	Competency may be assessed through: 5.1 Portfolio Assessment 5.2 Interview 5.3 Case Study/Situation
6. Context for Assessment	6.1 Competency may be assessed in the work place or in a simulated work place setting

#### **COMMON COMPETENCIES**

UNIT OF COMPETENCY	<b>/</b> :	PREPARE CONSTRUCTION MATERIALS AND TOOLS		
UNIT CODE	:	CON931201		
UNIT DESCRIPTOR	:	This unit covers the knowledge, skills and attitudes on identifying, requesting and receiving construction materials and tools based on the required performance standards.		

ELEMENT	PERFORMANCE CRITERIA  Italicized terms are elaborated in the Range of Variable
1. Identify materials	<ul> <li>1.1 <i>Materials</i> are listed as per job requirements</li> <li>1.2 Quantity and <i>description of materials</i> conform with the job requirements</li> <li>1.3 Tools and accessories are identified according to job requirements</li> </ul>
2. Request materials	<ul> <li>2.1 Materials and tools needed are requested according to the list prepared</li> <li>2.2 Request is done as per <i>company standard operating procedures (SOP)</i></li> <li>2.3 Substitute materials and tools are provided without sacrificing cost and quality of work</li> </ul>
Receive and inspect materials	<ul> <li>3.1 Materials and tools issued are inspected as per quantity and specification</li> <li>3.2 Tools, accessories and materials are checked for damages according to enterprise procedures</li> <li>3.3 Materials and tools are set aside to appropriate location nearest to the workplace</li> </ul>

VARIABLE	RANGE
Materials and Tools	<ul><li>1.1 Electrical supplies</li><li>1.2 Structural</li><li>1.3 Plumbing</li><li>1.4 Welding/pipefitting</li></ul>
	1.5 Carpentry 1.6 Masonry
Description of Materials and Tools	<ul><li>2.1 Brand name</li><li>2.2 Size</li><li>2.3 Capacity</li><li>2.4 Kind of application</li></ul>
Company standard procedures	<ul><li>3.1 Job order</li><li>3.2 Requisition slip</li><li>3.3 Borrower slip</li></ul>

EVIDENCE COIDE	T
Critical aspects     of competency	Assessment requires evidence that the candidate:  1.1 Listed materials and tools according to quantity and job requirements  1.2 Requested materials and tools according to the list prepared and as per company SOP  1.3 Inspected issued materials and tools as per quantity and job specifications  1.4 Tools provided with appropriate safety devices
2. Underpinning knowledge	2.1 Types and uses of construction materials and tools 2.2 Different forms 2.3 Requisition procedures
3. Underpinning skills	3.1 Preparing materials and tools 3.2 Proper handling of tools and equipment 3.3 Following instructions
4. Resource implications	The following resources should be provided: 4.1 Workplace location 4.2 Materials relevant to the unit of competency 4.3 Technical plans, drawings and specifications relevant to the activities
5. Methods of assessment	Competency in this unit must be assessed through: 5.1 Direct observation and oral questioning
6. Context of assessment	6.1 Competency may be assessed in the workplace or in a simulated workplace     6.2 Competency assessment must be undertaken in accordance with the endorsed TESDA assessment guidelines

UNIT OF COMPETENCY:		OBSERVE PROCEDURES, SPECIFICATIONS AND MANUALS OF INSTRUCTIONS
UNIT CODE	:	CON311201
UNIT DESCRIPTOR	:	This unit covers the knowledge, skills and attitudes on
		identifying, interpreting, applying services to specifications and manuals and storing manuals.

ELEMENT	PERFORMANCE CRITERIA  Italicized terms are elaborated in the Range of Variables
Identify and access specification/manuals	<ul> <li>1.1 Appropriate manuals are identified and accessed as per job requirements</li> <li>1.2 Version and date of manual are checked to ensure that correct specification and procedures are identified</li> </ul>
2. Interpret manuals	<ul> <li>2.1 Relevant sections, chapters of specifications/ manuals are located in relation to the work to be conducted</li> <li>2.2 Information and procedure in the manual are interpreted in accordance with industry practices</li> </ul>
3. Apply information in manual	<ul> <li>3.1 <i>Manual</i> is interpreted according to job requirements</li> <li>3.2 Work steps are correctly identified in accordance with manufacturer's specification</li> <li>3.3 Manual data are applied according to the given task</li> <li>3.4 All correct sequencing and adjustments are interpreted in accordance with information contained on the manual or specifications</li> </ul>
4. Store manuals	4.1 Manual or specification is stored appropriately to prevent damage, ready access and updating of information when required in accordance with company requirements

VARIABLE	RANGE
Procedures, Specifications and Manuals of Instructions	Kinds of Manuals: 1.1 Manufacturer's Specification Manual 1.2 Repair Manual 1.3 Maintenance Procedure Manual 1.4 Periodic Maintenance Manual

Critical aspects     of competency	Assessment requires that the candidate:  1.1 Identified and accessed specification/manuals as per job requirements  1.2 Interpreted manuals in accordance with industry practices  1.3 Applied information in manuals according to the given task  1.4 Stored manuals in accordance with company requirements
2. Underpinning knowledge	<ul> <li>2.1 Types of manuals used in construction sector</li> <li>2.2 Identification of symbols used in the manuals</li> <li>2.3 Identification of units of measurements</li> <li>2.4 Unit conversion</li> </ul>
3. Underpinning skills	<ul><li>3.1 Reading and comprehension skills required to identify and interpret construction manuals and specifications</li><li>3.2 Accessing information and data</li></ul>
Resource implications	The following resources should be provided: 4.1 All manuals/catalogues relative to construction sector
5. Methods of assessment	Competency should be assessed through: 5.1 Direct observation 5.2 Questions/interview  Assessment of underpinning knowledge and practical skills may be combined
6. Context of assessment	6.1 Competency assessment must be undertaken in accordance with the endorsed TESDA assessment guidelines     6.2 Assessment may be conducted in the workplace or a simulated environment

UNIT OF COMPETENCY:	PERFORM MENSURATIONS AND CALCULATIONS	
UNIT CODE :	CON311203	
	This unit covers the knowledge, skills and attitudes on identifying and measuring objects based on the required performance standards.	

	PERFORMANCE CRITERIA
ELEMENT	Italicized terms are elaborated in the
	Range of Variable
Select measuring instruments	<ul> <li>1.1 Object or component to be measured is identified, classified and interpreted according to the appropriate regular <i>geometric shape</i></li> <li>1.2 Measuring tools are selected/identified as per object to be measured or job requirements</li> <li>1.3 Correct specifications are obtained from relevant sources</li> <li>1.4 Appropriate measuring instruments are selected according to job requirements</li> <li>1.5 Alternative measuring tools are used without sacrificing cost and quality of work</li> </ul>
Carry out measurements and calculations	<ul> <li>2.1 Accurate measurements are obtained according to job requirements</li> <li>2.2 Alternative measuring tools are used without sacrificing cost and quality of work</li> <li>2.3 Calculation needed to complete work tasks are performed using the four basic process of addition (+), subtraction (-), multiplication (x) and division (/) including but not limited to: trigonometric functions, algebraic computations</li> <li>2.4 Calculations involving fractions, percentages and mixed numbers are used to complete workplace tasks</li> <li>2.5 Numerical computation is self-checked and corrected for accuracy</li> <li>2.6 Instruments are read to the limit of accuracy of the tool</li> <li>2.7 Systems of measurement identified and converted according to job requirements/ISO</li> <li>2.8 Workpieces are measured according to job requirements</li> </ul>

VARIABLE	RANGE
1. Geometric shape	Including but is not limited to: 1.1 Round 1.2 Square 1.3 Rectangular 1.4 Triangle 1.5 Sphere 1.6 Conical
2. Measuring instruments	Including but not limited to: 2.1 Micrometer (In-out, depth) 2.2 Vernier caliper (out, inside) 2.3 Dial gauge with mag, std. 2.4 Straight edge 2.5 Thickness gauge 2.6 Torque gauge 2.7 Small hole gauge 2.8 Telescopic gauge 2.9 Try-square 2.10 Protractor 2.11 Combination gauge 2.12 Steel rule 2.13 Voltmeter 2.14 Ammeter 2.15 Mega-ohmeter 2.16 Kilowatt hour meter 2.17 Gauges 2.18 Thermometers
3. Measurements and calculations	3.1 Linear 3.2 Volume 3.3 Area 3.4 Wattage 3.5 Voltage 3.6 Resistance 3.7 Amperage 3.8 Frequency 3.9 Impedance

VARIABLE	RANGE
VARIABLE	3.10 Conductance 3.11 Capacitance 3.12 Displacement 3.16 Inside diameter 3.17 Circumference 3.18 Length 3.19 Thickness 3.20 Outside diameter 3.21 Taper 3.22 Out of roundness
	3.23 Oil clearance 3.24 End play/Thrust clearance

EVIDENCE GUIDE	
Critical aspects     of competency	Assessment requires that the candidate:  1.1 Selected and prepared appropriate measuring instruments in accordance with job requirements  1.2 Performed measurements and calculations according to job requirements/ ISO
2. Underpinning knowledge	TRADE MATHEMATICS / MENSURATION 2.1 Four fundamental operation 2.2 Linear measurement 2.3 Dimensions 2.4 Unit conversion 2.5 Ratio and proportion 2.6 Trigonometric functions 2.8 Algebraic equations
3. Underpinning skills	<ul> <li>3.1 Performing calculation by addition, subtraction, multiplication and division; trigonometric functions and algebraic equations</li> <li>3.2 Visualizing objects and shapes</li> <li>3.3 Interpreting formulas for volume, areas, perimeters of plane and geometric figures</li> <li>3.4 Proper handling of measuring instruments</li> </ul>
4. Resource implications	The following resources should be provided: 4.1 Workplace location 4.2 Problems to solve 4.3 Measuring instrument appropriate to carry out tasks 4.4 Instructional materials relevant to the propose activity  Assessment of underpinning knowledge and practical skills may be combined
5. Methods of assessment	Competency should be assessed through: 5.1 Actual demonstration 5.2 Direct observation 5.3 Written test/questioning related to underpinning knowledge
6. Context of assessment	<ul> <li>6.1 Competency assessment may occur in workplace or any appropriate simulated environment</li> <li>6.2 Assessment shall be observed while task are being undertaken whether individually or in group</li> <li>6.3 Competency assessment must be undertaken in accordance with the TESDA assessment guidelines</li> </ul>

UNIT OF COMPETENCY	<b>′</b> :	MAINTAIN TOOLS AND EQUIPMENT
UNIT CODE	:	CON311204
UNIT DESCRIPTOR	:	This unit covers the knowledge, skills and attitudes on checking condition, performing preventive maintenance and storing of tools and equipment based on the required performance standards.

ELEMENTS	PERFORMANCE CRITERIA  Italicized terms are elaborated in the Range of Variables
Check condition of tools and equipment	<ul> <li>1.1 Materials, tools and equipment are identified according to classification and job requirements</li> <li>1.2 Non-functional tools and equipment are segregated and labeled according to classification</li> <li>1.3 Safety of tools and equipment are observed in accordance with manufacturer's instructions</li> <li>1.4 Condition of PPE are checked in accordance with manufacturer's instructions</li> </ul>
Perform basic preventive maintenance	<ul> <li>2.1 Appropriate lubricants are identified according to types of equipment</li> <li>2.2 Tools and equipment are lubricated according to preventive maintenance schedule or manufacturer's specifications</li> <li>2.3 Measuring instruments are checked and calibrated in accordance with manufacturer's instructions</li> <li>2.4 Tools are cleaned and lubricated according to standard procedures</li> <li>2.5 Defective instruments, equipment and accessories are inspected and replaced according to manufacturer's specifications</li> <li>2.6 Tools are inspected, repaired and replaced after use</li> <li>2.7 Work place is cleaned and kept in safe state in line with OHSA regulations</li> </ul>

3.2 Tools and equipment are stored safely in appropriate locations in accordance with manufacturer's specifications or company procedures	3. Store tools and equipment	appropriate locations in accordance with manufacturer's specifications or company
---	------------------------------	---

VARIABLES	RANGE
1. Materials	Including but not limited to: 1.1 Lubricants 1.2 Cleaning materials 1.3 Rust remover 1.4 Rugs 1.5 Spare parts
2. Tools and equipment	Including but not limited to: 2.1 Tools Cutting tools - hacksaw, crosscut saw, rip saw Boring tools - auger, brace, grinlet, hand drill Holding tools - vise grip, C-clamp, bench vise Threading tools - die and stock, taps  2.2 Measuring instruments/equipment
3. PPE	Including but not limited to: 3.1 Goggles 3.2 Gloves 3.3 Safety shoes 3.4 Aprons/Coveralls
4. Forms	<ul><li>4.1 Maintenance schedule forms</li><li>4.2 Requisition slip</li><li>4.3 Inventory Form</li><li>4.4 Inspection Form</li><li>4.5 Procedures</li></ul>

EVIDENCE GUIDE	
Critical aspects     of competency	<ul> <li>Assessment requires that the candidate:</li> <li>1.1 Selected and used appropriate processes, tools and equipment to carry out task</li> <li>1.2 Identified functional and non-functional tools and equipment</li> <li>1.3 Checked, lubricated and calibrated tools, equipment and instruments according to manufacturer's specifications</li> <li>1.4 Replaced defective tools, equipment and their accessories</li> <li>1.5 Observed and applied safe handling of tools and equipment and safety work practices</li> <li>1.6 Prepared and submitted inventory report, where applicable</li> <li>1.7 Maintained workplace in accordance with OHSA regulations</li> <li>1.8 Stored tools and equipment safely in appropriate locations and in accordance with company practices</li> </ul>
2. Underpinning knowledge	2.1 SAFETY PRACTICES 2.1.1 Use of PPE 2.1.2 Handling of tools and equipment 2.1.3 Good housekeeping 2.2 MATERIALS, TOOLS AND EQUIPMENT 2.2.1 Types and uses of lubricants 2.2.2 Types and uses of cleaning materials 2.2.3 Types and uses of measuring instruments and equipment 2.3 PREVENTIVE MAINTENANCE 2.3.1 Methods and techniques 2.3.2 Procedures
3. Underpinning skills	<ul> <li>3.1 Preparing maintenance materials, tools and equipment</li> <li>3.2 Proper handling of tools and equipment</li> <li>3.3 Performing preventive maintenance</li> <li>3.4 Following instructions</li> </ul>
4. Resource implications	The following resources should be provided: 4.1 Workplace 4.2 Maintenance schedule 4.3 Maintenance materials, tools and equipment relevant to the proposed activity/task
5. Methods of assessment	Competency should be assessed through: 5.1 Direct observation 5.2 Written test/questioning relevant to Underpinning knowledge

6. Context of assessment	6.1 Competency assessment may occur in workplace or any appropriate simulated environment
	6.2 Competency assessment must be undertaken in accordance with the endorsed TESDA assessment guidelines

UNIT OF COMPETENCY:	INTERPRET TECHNICAL DRAWINGS AND PLANS
UNIT CODE :	CON311202
	This unit covers the knowledge, skills and attitudes on analyzing and interpreting symbols, data and work plan based on the required performance standards.

ELEMENT	PERFORMANCE CRITERIA  Italicized terms are elaborated in the Range of Variables
Analyze signs, symbols and data	<ul> <li>1.1 <i>Technical plans</i> are obtained according to job requirements</li> <li>1.2 Signs, symbols and data are identified according to job specifications</li> <li>1.3 Signs symbols and data are determined according to <i>classification</i> or as appropriate in <i>drawing</i></li> </ul>
Interpret technical drawings and plans	<ul> <li>2.1 Necessary <i>tools, materials</i> and equipment are identified according to the <i>plan</i></li> <li>2.2 Supplies and materials are listed according to specifications</li> <li>2.3 Components, assemblies or objects are recognized as required</li> <li>2.4 Dimensions are identified as appropriate to the plan</li> <li>2.5 Specification details are matched with existing/available resources and in line with job requirements</li> <li>2.6 Work plan is drawn following the specifications</li> </ul>
3. Apply freehand sketching	3.1 Where applicable, correct freehand sketching is produced in accordance with the job requirements

VARIABLE	RANGE
1. Technical plans	Including but not limited to: 1.1 Electrical plans 1.2 Structural plans 1.3 Architectural plans 1.4 Plumbing plans 1.5 Welding Procedures Specifications (WPS)
2. Work plan	<ul><li>2.1 Job requirements</li><li>2.2 Installation instructions</li><li>2.3 Components instruction</li></ul>
3. Classification	Including but not limited to: 3.1 Electrical 3.2 Mechanical 3.3 Plumbing
4. Drawing	4.1 Drawing symbols 4.2 Alphabet of lines 4.3 Orthographic views - Front view - Right side view/left side view - Top view - Pictorial 4.4 Schematic diagram 4.5 Electrical drawings 4.6 Structural drawings 4.7 Plumbing drawings - Water - Sewerage/Drainage - Ventilation 4.8 Welding symbols
5. Tools and materials	Including but not limited to: 5.1 Compass 5.2 Divider 5.3 Rulers 5.4 Triangles 5.5 Drawing tables 5.6 Computer

LVI	DENCE GUIDE	,
1.	Critical aspects of competency	<ul> <li>Assessment requires that the candidate:</li> <li>1.1 Identified and determined signs, symbols and data according to work plan, job requirements and classifications</li> <li>1.2 Identified tools and equipment in accordance with job requirements</li> <li>1.3 Listed supplies and materials according to blueprint specifications</li> <li>1.4 Drawn workplan following specifications</li> <li>1.5 Determined job specifications based on working/technical drawing</li> </ul>
2.	Underpinning knowledge	<ul> <li>2.1 TRADE MATHEMATICS <ul><li>2.1.1 Linear measurement</li><li>2.1.2 Dimension</li><li>2.1.3 Unit conversion</li></ul></li> <li>2.2 BLUEPRINT READING AND PLAN SPECIFICATION <ul><li>2.2.1 Electrical, mechanical plan, symbols and abbreviations</li><li>2.2.2 Drawing standard symbols</li></ul></li> <li>2.3 TRADE THEORY <ul><li>2.3.1 Basic technical drawing</li><li>2.3.2 Types technical plans</li><li>2.3.3 Various types of drawings</li><li>2.3.4 Notes and specifications</li></ul></li> </ul>
3.	Underpinning skills	<ul> <li>3.1 Interpreting drawing/orthographic drawing</li> <li>3.2 Interpreting technical plans</li> <li>3.3 Matching specification details with existing resources</li> <li>3.4 Following instructions</li> <li>3.5 Handling of drawing instruments</li> </ul>
4.	Resource implications	The following resources should be provided: 4.1 Workplace 4.2 Drawings and specification relevant to task 4.3 Materials and instrument relevant to proposed activity
5.	Methods of assessment	Competency should be assessed through: 5.1 Direct observation 5.2 Questions/interview 5.3 Written test related to underpinning knowledge

6. Context of assessment	6.1 Competency assessment may occur in the workplace or in any appropriate simulated environment
	<ul> <li>6.2 Assessment shall be observed while task are being undertaken whether individually or in group</li> <li>6.3 Competency assessment must be undertaken in accordance with the endorsed TESDA assessment guidelines</li> </ul>

## **CORE COMPETENCIES**

UNIT TITLE:	PERFORM PRE- AND POST-OPERATION PROCEDURES FOR HAULING EQUIPMENT
UNIT CODE:	CON833316
UNIT DESCRIPTOR:	This unit deals with the outcomes required to perform pre- and post operation procedures for off-
	highway dump truck (rigid).

ELEMENT	PERFORMANCE CRITERIA	
	Bold and Italicized terms are elaborated in the	
	Range of Variables	
Perform visual check of equipment	<ul> <li>1.1 Hauling equipment is selected based on job requirements.</li> <li>1.2 Operator serviceable (OS) parts are checked in accordance with equipment checklist and manufacturer's procedures.</li> <li>1.3 Walk-around check is performed with equipment checklist and with engine stopped/not running.</li> </ul>	
2. Perform "B L O W A F" check	<ul> <li>2.1 "BLOWAF" check is performed following checklist form and with engine stopped/not running.</li> <li>2.2 Deficiencies in fluids level are identified and if below normal level are refilled/topped up in accordance with equipment maintenance manual.</li> <li>2.3 Abnormal conditions are reflected/noted in the checklist and reported/referred to authorized person.</li> </ul>	
3. Perform operation check	<ul> <li>3.1 Starting/running check is performed following checklist and in accordance with manufacturer's recommendations.</li> <li>3.2 Normal functions of brake, steering and Power Take-off (PTO), etc. are checked.</li> <li>3.3 Walk-around check is performed following equipment checklist and with engine running.</li> <li>3.4 Safety devices are checked for proper functions in accordance with safe operating procedures.</li> </ul>	

Perform post operation procedure	4.1	Hauling equipment is parked in firm and level ground after productive operation in accordance with safety company rules and regulations.
	4.2	Equipment controls are set into neutral position and parking brakes are engaged according to manufacturer's operations manual.
	4.3	<b>Safety locks</b> and brakes are all set/engaged in accordance with operator's manual.
	4.4	Walk-around inspection check is conducted while doing engine cool down.
	4.5	Daily equipment time report/record (DETR) is accomplished/submitted according to company rules and regulations

## **RANGE OF VARIABLES**

VARIABLE	RANGE
1. Hauling	1.1 Off-highway dump truck (rigid) 1.2 Off-highway dump truck (articulated) 1.3 On-highway dump truck (rigid)
2. Operator serviceable parts	2.1 Air cleaner 2.2 Battery terminals/Connection 2.3 Belt 2.4 Tire inflation 2.5 Grease/Lube points 2.6 Water/Fuel separator 2.7 Wiper blade
3. Walk around check	3.1 Engine off 3.1.1Leaks 3.1.2 Worn out/damaged parts 3.1.3 Fluid levels 3.1.4 Loose and missing parts 3.1.5 Tire condition 3.1.5.1 Cracked/Thread separation 3.1.5.2 Air pressure 3.1.5.3 Thread wear 3.1.5.4 Imbedded materials 3.1.5.5 Damaged rim 3.1.6 Side mirrors 3.1.7 Cab condition and windshields 3.1.8 Wiper bottle  Off-highway dump truck (articulated) 3.1.9 Pins
	3.2 Engine on 3.2.1 Gauges, alert/warning indicators and controls 3.2.2 Oil and air leaks 3.2.3 Safety devices 3.2.4 Working implement function e.g. dump, steering, etc
4. <u>B L O W A F</u> check	4.1 Battery (starting and charging system) 4.2 Light (lighting system) 4.3 Oil (lubricating system) 4.4 Water (cooling system) 4.5 Air (intake and exhaust system) 4.6 Fuel (fuel system)

5. Fluid levels	5.1 Battery electrolyte (maintenance type) 5.2 Engine oil 5.3 Hydraulic oil 5.4 Radiator coolant 5.5 Fuel 5.6 Wiper fluid  On-highway dump truck (rigid) 5.7 Brake fluid 5.8 Steering oil 5.9 Transmission
6. Authorized person	6.1 Equipment maintenance supervisor 6.2 Maintenance personnel  Off-highway dump truck (rigid) and on-highway dump truck (rigid) 6.3 Chief Mechanic  Off-highway dump truck (articulated) 6.4 Hauling operation supervisor

## 7. Starting/Running 7.1 Controls 7.1.1 PTO check 7.1.2 Steering/Secondary 7.1.3 Shifting 7.1.4 Dump lever 7.1.5 Accelerator pedal 7.1.6 Brake 7.1.6.1 Service 7.1.6.2 Retarder 7.1.6.3 Secondary/Emergency 7.1.6.4 Parking On-highway dump truck 7.1.6.5 Anti-lock brake system Off-highway dump truck (rigid) and Off-highway dump truck (articulated) 7.1.7 Transmission control 7.1.8 Retarder lever On-highway dump truck (rigid) 7.1.9 Differential / inter-axle lock 7.2 Gauges 7.2.1 Battery charging 7.2.2 Pressure (oil and air) 7.2.3 Temperature (oil and water) 7.2.4 RPM (tachometer) 7.2.5 Speedometer Off-highway dump truck (rigid) and Off-highway dump truck (articulated) 7.2.6 Fuel indicator 7.2.7 Hour meter 7.2.8 Transmission indicator Off-highway dump truck (articulated) 7.2.9 Payload meter / sensor

	7.3 Leaks in systems 7.3.1 Air 7.3.2 Cooling 7.3.3 Suspension charge 7.3.4 Lubricating 7.3.5 Fuel 7.3.6 Hydraulic
	7.3.7 Washer fluid 7.4 Electrical/switches 7.4.1 Lights 7.4.2 Horn 7.4.3 Safety devices 7.5 Steering and brakes
8. Safety devices	May include but not limited to:
	Off-highway dump truck (rigid) and Off-highway dump truck (articulated) 8.1 Parking brake 8.2 Retarder 8.3 Exhaust brake 8.4 Service brake
	On-highway dump truck (rigid) and off-highway dump truck (articulated) 8.5 Emergency brake 8.6 Fire extinguisher 8.7 Beacon lights 8.8 Seat belt
	On-highway dump truck (rigid) 8.9 Emergency / secondary steering 8.10 Anti lock brake system 8.11 Wheel choke 8.12 Early Warning Device (EWD)
	Off-highway dump truck (articulated) 8.13 Back-up alarm 8.14 Buggy whip 8.15 Warning device 8.16 Neutral lock switch 8.17 Battery disconnect switch

9. Safety locks	May include but not limited to:
-	9.1 PTO
	9.2 Safety implement lock
	9.3 Door lock
	9.4 Dump box safety pin
	Off-highway dump truck (rigid) and On-highway dump truck (rigid) 9.5 Steering
	On-highway dump truck (rigid) 9.6 Hydraulic implement lock

## **EVIDENCE GUIDE**

Critical aspects     of evidence to     be considered	<ul> <li>Assessment must confirm evidence that the candidate:</li> <li>1.1 Demonstrates ability to select hauling equipment based on the job requirements</li> <li>1.2 Demonstrates ability to check operator-serviceable (OS) parts</li> <li>1.3 Demonstrates ability to perform walk-around and "BLOWAF" inspection following equipment checklist and with engine stopped/not running.</li> <li>1.4 Demonstrates ability to perform walk-around check while engine is running.</li> <li>1.5 Demonstrates ability to observe risk-control/safe procedures</li> <li>1.6 Demonstrates ability to perform post-operation checking procedures</li> <li>1.7 Demonstrates ability to accomplish and submit daily equipment time record/report (DETR)</li> </ul>
2. Underpinning (related) knowledge and attitude	<ul> <li>2.1 Types and uses of personal protective equipment (PPE)</li> <li>2.2 Controls, instruments, indicators, safety devices and their uses</li> <li>2.3 Start-up and shutdown procedures</li> <li>2.4 Familiarity with manufacturer's operation manual</li> <li>2.5 Familiarity with job site and work/terrain conditions</li> <li>2.6 Familiarity with pre- and post-operation checking procedures and checklist form</li> <li>2.7 Positive work values (time and cost conscious, etc.)</li> </ul>
3. Underpinning skills	<ul> <li>3.1 Performing pre- and post-operation checking procedures for dump truck.</li> <li>3.2 Using personal protective equipment (PPE)</li> <li>3.3 Maintaining dump truck records</li> <li>3.4 Communicating with work site personnel</li> <li>3.5 Complying with the manufacturer's operation and maintenance manual</li> <li>3.6 Accomplishing and submitting pre- and post-operation checklist form</li> </ul>
4. Resource implications	The following resources must be provided: 4.1 Access to hauling equipment and manuals. 4.2 Access to work site or work area for dump truck operation 4.3 Personal protective equipment (PPE)

5.	Method of	Competency in this unit must be assessed through
	assessment	5.1 Written/oral questioning
		5.2 Observation/demonstration
		5.3 Work record and documents
6.	Context for	6.1 Assessment may be conducted on-the-job or in a simulated
	assessment	venue.
		6.2 Competency shall be assessed while work is being undertaken
		independently

UNIT TITLE:	PERFORM BASIC PREVENTIVE MAINTENANCE SERVICING FOR HAULING EQUIPMENT
UNIT CODE:	CON833317
UNIT DESCRIPTOR:	This unit deals with the knowledge, skills and attitudes in the routine basic preventive maintenance
	for hauling equipment.

EL EMENT DEDECOMANCE CONTEDIA		
ELEMENT	PERFORMANCE CRITERIA	
	Bold and Italicized terms are elaborated in the	
	Range of Variables	
Perform adjustments/ replacements	<ul> <li>1.1 <i>Minor defects</i> are identified and remedied in accordance with company/manufacturer's procedures.</li> <li>1.2 Correct/proper tools are selected based on job requirements.</li> <li>1.3 <i>Major defects</i> are identified with checklist and referred to <i>appropriate personnel</i>.</li> </ul>	
Perform basic preventive maintenance servicing (PMS)	<ul> <li>2.1 Operator serviceable (OS) parts/standards are identified and serviced according to manufacturer's specifications and company preventive maintenance operating procedures.</li> <li>2.2 Fluids and lubricants are used based on operation's manual.</li> <li>2.3 Appropriate basic hand tools and equipment are identified and used in accordance with job requirements.</li> <li>2.4 Basic preventive maintenance servicing (PMS) is carried out in accordance with manufacturer's and/or site conditions/requirements.</li> </ul>	
3. Prepare equipment reports	<ul> <li>3.1 Preventive maintenance checklist form is properly accomplished in accordance with manufacturer's/company requirements.</li> <li>3.2 Minor/major equipment defects are reported to concerned personnel.</li> </ul>	

## **RANGE OF VARIABLES**

VARIABLE	RANGE	
1. Minor defects	May include but not limited to: 1.1 Clogged air cleaner 1.2 Loose clamps, bolts and mountings 1.3 Presence of water in the fuel separator 1.4 Weak battery 1.5 Defective radiator cap  On-highway dump truck (rigid) 1.6 Incorrect tire inflation 1.7 Loose belts	
2. Major defects	1.6 Incorrect tire inflation	

Appropriate personnel	3.1 Equipment maintenance supervisor 3.2 Maintenance personnel
	Off-highway dump truck (articulated) and On-highway dump truck (rigid) 3.3 Hauling operation supervisor  Off-highway dump truck (rigid) 3.4 Chief mechanic

4. Operator-	May include but are not limited to:
Serviceable	4.1 OS Parts
(OS)	4.1.1 Battery distilled water
parts/standards	4.1.2 Battery clamps/holders
	4.1.3 Filters
	4.1.3.1 Air cleaner
	4.1.3.1 Water fuel separator
	4.1.4 All caps (e.g. oil, water, fluid and fuel)
	Off-highway dump truck (rigid) and Off-highway dump truck
	(articulated)
	4.2 OS Standards
	4.2.1 Oil pressure
	4.2.2 Air pressure
	4.2.3 Temperature
	4.2.4 Fuel 4.2.4 Fuel
	4.2.5 Charging rate
	4.2.6 End/free play clearances (brake, accelerator pedal
	and control levers)
	,
6. Fluids and	May include but are not limited to:
Lubricants	6.1 Engine oil
	6.2 Hydraulic oil
	6.3 Multi purpose grease
	6.4 Coolant
	6.5 Battery distilled water
	6.6 Washer fluids
	Off-highway dump truck (articulated) and On-highway dump
	truck (rigid)
	6.7 Cleaning solutions
	6.6.1 Detergent soap
	6.6.2 Degreaser
	2.2.2 2 39. 3433.
	On-highway dump truck (rigid)
	6.8 Brake and fluid
	olo Brano ana naia
	1

7.	Basic hand tools and equipment	May include but are not limited to: 7.1 Hand tools 7.1.1 Wrenches (open and box) 7.1.2 Mechanical pliers 7.1.3 Screw driver (Philips and flat) 7.1.4 Paint brush 7.1.5 Hammer 7.1.6 Vice grip 7.1.7 Tire gauge (instrument) 7.1.8 Steel brush  Off-highway dump truck (articulated) and On-highway dump truck (rigid) 7.1.9 Grease gun 7.1.10 Oiler  On-highway dump truck (rigid) 7.1.11 Pry bar  7.2 Equipment 7.2.1 High pressure washer 7.2.2 Air compressor 7.2.3 Grease gun 7.2.4 Hydraulic jack 7.2.5 Lube pump
8.	Basic preventive maintenance servicing (PMS)	May include but not limited to: 8.1 Check/Tighten battery clamps/holders 8.2 Clean filters 8.2.1 Air cleaner 8.2.2 Fuel/Water separator 8.3 Check/Replace defective caps 8.4 Belt tension adjustment 8.5 Tire inflation pressure

0	Cita conditional	May include but are not limited to:
9.	Site conditions/	May include but are not limited to:
	Requirements	9.1 Instructions/Site lay-out/Regulations
		9.2 Warning Signages/barricades (e.g. caution tape)
		9.3 Work and maintenance schedules
		9.4 Work bulletin boards
		9.5 Vicinity/Rerouting chart
		9.6 Environmental/Site conditions
		9.6.1 Dusty
		9.6.2 Toxic/hazardous fumes
		9.6.3 Rainy/Windy
		9.6.4 Muddy/slippery ground
		9.6.5 Poor lighting and ventilation
		9.6.6 Site obstruction

## **EVIDENCE GUIDE**

EVIDENCE GUIDE	
1. Critical aspects	Assessment requires evidence that the candidate:
of evidence to	1.1 Demonstrates ability to identify minor defects based on
be considered	checklist and service them in accordance with
	manufacturer/company preventive maintenance
	program/procedure
	1.2 Demonstrates ability to identify major defects based on
	checklist and report them to appropriate personnel
	1.3 Demonstrates ability to use basic hand tools and
	equipment
	1.4 Demonstrates ability to identify and service OS
	parts/standards according to manufacturer's service
	manual
	1.5 Demonstrates knowledge of applicable fluids and
	lubricants
	1.6 Demonstrates ability to carry-out preventive maintenance
	servicing procedure based on job site
	condition/requirement
	1.7 Demonstrates ability to accomplish and submit preventive
	maintenance checklist form
	1.8 Demonstrates ability to use personal protective equipment
	(PPE)
2. Underpinning	2.1 Knowledge of equipment minor and major defects
(related)	2.2 Servicing procedure for minor defects
knowledge and	2.3 Types and uses of basic hand tools and equipment
attitude	2.4 Knowledge of fluids and lubricants
	2.5 Uses and functions of OS parts
	2.6 Company rules and regulations
	2.7 Types and uses of PPE
	2.8 Operation and maintenance manual
	2.9 Positive work values (time and cost conscious, etc.)
3. Underpinning	3.1 Identifying minor and major defects
skills	3.2 Performing servicing procedure for minor defects
SKIIIS	3.3 Using basic hand tools and equipment
	3.4 Identifying and servicing OS parts/standards
	3.5 Using fluids and lubricants
	3.6 Carrying out basic preventive maintenance servicing
	procedures and accomplishing checklists
	3.7 Complying company rules and regulations
	3.8 Using personal protective equipment (PPE)
	3.9 Interpreting operation and maintenance manual
	old midig operation and maintenance mandar
<u> </u>	1

4. Resource implications	Things necessary for the conduct of assessment 4.1 Access to hauling equipment and its corresponding manual 4.2 Work site 4.3 Basic hand tools and equipment 4.4 Fluids and lubricants 4.5 PPE 4.6 Preventive maintenance instruction manual/ checklist forms
5. Method of assessment	Competency in this unit must be assessed through 5.1 Written and/or oral questioning 5.2 Observation /demonstration 5.3 Work record and documents 5.4 Third party
6. Context for assessment	6.1 Competency shall be assessed in a normal or simulated workplace environment and in accordance with preventive maintenance procedures 6.2 Competency shall be assessed while work is being undertaken independently

UNIT TITLE:	PERFORM PRODUCTIVE OPERATION FOR OFF- HIGHWAY DUMP TRUCK [ARTICULATED]
UNIT CODE:	CON833320
UNIT DESCRIPTOR:	This unit deals with the knowledge, skills and attitude required for performing productive operation for off-highway dump truck [articulated]. It covers the skills required to perform loading, handling and dumping operations of earth materials.

ELEMENT	PERFORMANCE CRITERIA
ELEWENI	
	Bold and Italicized terms are elaborated in the
	Range of Variables
Perform loading operations	<ul> <li>1.1 Safe work practices are observed in accordance with company rules and regulations.</li> <li>1.2 Communication is established with the loading operator during operation.</li> <li>1.3 Dump truck is positioned at the loading area following safe work procedures.</li> <li>1.4 Required control levers are applied according to operation's manual</li> <li>1.5 Engine is set at low idle speed during waiting / loading operation.</li> <li>1.6 Allowable load capacity of truck is observed as per manufacturer's specifications.</li> <li>1.7 Unexpected situations are responded in line with company rules and regulations.</li> </ul>
2. Perform hauling operations	<ul> <li>2.1 Site hazards and appropriate safe operating techniques are identified according to safe operating practices.</li> <li>2.2 Safety precautions are observed based on road conditions.</li> <li>2.3 Required travel speed is observed according to work site and load conditions.</li> <li>2.4 Power Take-Off is disengaged during operations.</li> <li>2.5 Unexpected situations are responded in line with company rules and regulations.</li> </ul>

3. Perform dumping operations	3.1	Communication is maintained with the
		appropriate personnel during dumping
		operation.
	3.2	<b>Dumping procedure</b> is performed following safe work procedures.
	3.3	Unexpected situations are responded in line with company rules and regulations.

## **RANGE OF VARIABLES**

VARIABLE	RANGE
Safe work     practices	<ul> <li>1.1 Wear minimum PPE</li> <li>1.2 Observed firm and flat ground for the loading and dumping area</li> <li>1.3 Checked for proper illumination of work site</li> <li>1.4 Observed 3-point contact in embarking on and alighting from equipment</li> <li>1.5 All controls must be in neutral position and parking brake applied during loading / dumping operation</li> <li>1.6 Observed proper housekeeping</li> </ul>
2. Communication	2.1 Hand signal 2.2 Radio 2.3 Horn/Light signal
3. Loading operator	3.1 Wheel loader operator 3.2 Excavator /shovel operator 3.3 Clampshell/dragline operator 3.4 Conveyor operator
4. Safe work procedures	4.1 Loading 4.1.1 Tractor head is aligned with the dump body 4.1.2 Park brake is engaged 4.1.3 Gear shift lever is in neutral / parked position 4.2 Dumping 4.2.1 Tractor head is aligned with the dump body 4.2.2 Park brake is applied 4.2.3 Gear shift lever is in neutral / parked position
5. Control levers	5.1 Parking brake gear shift
6. Unexpected situations	May include but are not limited to: 6.1 Sudden engine breakdown 6.2 Busted hydraulic hose and oil leakages 6.3 Sudden loss of brake 6.4 Loss control of steering 6.5 Sudden ground failure 6.6 Force majeure e.g., earthquake, fire, tornado 6.7 Operator fatigue or sickness/condition 6.8 Accidents/incidents

7. Site hazards	May include but are not limited to: 7.1 Landslides 7.2 Flood / Heavy rains 7.3 Excavations 7.4 Darkness or poor visibility 7.5 Uneven/unstable terrain 7.6 Road obstructions
8. Safety precautions	8.1 Retarder brake 8.2 Differential lock
9. Road conditions	9.1 Downhill 9.2 Uphill 9.3 Muddy 9.4 Slippery 9.5 Narrow 9.6 Curve
10. Appropriate personnel	10.1 Spotter 10.2 Site foreman 10.3 Site superintendent
11. Dumping procedure	11.1 Power take-off is engaged 11.2 Control lever is applied prior to dumping 11.3 Dump box is raised in smooth and controlled engine RPM 11.4 Dump body is lowered to normal position before traveling

## **EVIDENCE GUIDE**

EVIDENCE GUIDE	
Critical aspects     of competency to     be considered	<ul> <li>Assessment must confirm evidence that the candidate:</li> <li>1.1 Demonstrates ability to comply with company rules and regulations</li> <li>1.2 Demonstrates ability to operate dump truck in accordance with established operating procedures.</li> <li>1.3 Demonstrates ability to carry out safe work practices.</li> <li>1.4 Demonstrated knowledge of functions of instrument panel gauges, controls and alert indicators.</li> <li>1.5 Demonstrates ability to observe allowable load capacity of off-highway dump truck (articulated).</li> <li>1.6 Demonstrates ability to observe safe and efficient loading / hauling / dumping procedures from loading area to dumping site</li> <li>1.7 Demonstrates ability to communicate.</li> </ul>
2. Underpinning knowledge, attitudes	<ul> <li>2.1 Familiarity with company rules and regulations</li> <li>2.2 Knowledge of dump truck operating procedures</li> <li>2.3 Safe work procedures and practices</li> <li>2.4 Dump truck functions of instrument panel gauges, controls, alert/warning indicators and their uses.</li> <li>2.5 Comprehension of dump truck operations and maintenance manual.</li> <li>2.6 Knowledge of allowable load capacity of dump truck</li> <li>2.7 Safe and efficient loading/hauling/dumping procedures</li> <li>2.8 Defensive-driving and hazard-avoidance techniques</li> <li>2.9 Site/Terrain layout and obstacles</li> <li>2.10 Quality of materials to be loaded</li> <li>2.11 Positive work values (time and cost conscious, etc.)</li> </ul>
3. Underpinning skills	<ul> <li>3.1 Accomplishing dump truck checklist and reports</li> <li>3.2 Reporting dump truck component failure</li> <li>3.3 Performing actual operation procedure of dump truck</li> <li>3.4 Performing safety procedures and practices</li> <li>3.5 Determining type and load capacity of dump truck</li> <li>3.6 Defensive driving skills</li> </ul>
4. Resource implications	Things necessary for the conduct of assessment 4.1 Access to dump truck and job site/terrain 4.2 Available loads 4.3 PPE 4.4 Spotter

5. Method of assessment	Competency in this unit must be assessed through 5.1 Written/Oral questioning 5.2 Observation/ practical demonstration 5.3 Work record and documents
6. Context for assessment	<ul><li>6.1 Assessment maybe conducted in the work site or in a simulated venue.</li><li>6.2 Competency shall be assessed while work is being undertaken independently.</li></ul>

## SECTION 3 TRAINING STANDARDS

These guidelines are set to provide the Technical and Vocational Education and Training (TVET) providers with information and other important requirements to consider when designing training programs for **HEAVY EQUIPMENT OPERATION (ARTICULATED OFF-HIGHWAY DUMP TRUCK) NC II** 

## 3.1 CURRICULUM DESIGN

Course Title: <u>HEAVY\_EQUIPMENT\_OPERATION - OFF-HIGHWAY\_DUMP</u>

TRUCK (Articulated)

NC Level: NC II

**BASIC COMPETENCIES** 

Nominal Training Hours: 18 Hours (Basic) + 24 Hours (Common)

**Course Description:** 

This course is designed to equip individual with the basic, common and core competencies in Construction Sector particularly in Heavy Equipment Operation.

To obtain this, all units prescribed for this qualification must be achieved:

## **BASIC COMPETENCIES**

Unit of Competency	Learning Outcomes	Methodology	Assessment Approach
Participate in workplace communication	<ul> <li>1.1 Obtain and convey workplace information.</li> <li>1.2 Complete relevant work related documents</li> <li>1.3 Participate in workplace meeting and discussion.</li> </ul>	Group discussion Interaction	<ul><li>Demonstration</li><li>Observation</li><li>Interviews/ questioning</li></ul>
2. Work in a team environment	<ul><li>2.1 Describe and identify team role and responsibility in a team.</li><li>2.2 Describe work as a team member.</li></ul>	Discussion Interaction	<ul><li>Demonstration</li><li>Observation</li><li>Interviews/ questioning</li></ul>

3. Practice career professionalism	<ul><li>3.1 Integrate personal objectives with organizational goals.</li><li>3.2 Set and meet work priorities.</li><li>3.3 Maintain professional growth and development.</li></ul>	Discussion Interaction	<ul><li>Demonstration</li><li>Observation</li><li>Interviews/ questioning</li></ul>
Practice     occupational     health and safety	<ul> <li>4.1 Evaluate hazard and risks</li> <li>4.2 Control hazards and risks</li> <li>4.3 Maintain occupational health and safety awareness</li> </ul>	Discussion Plant tour Symposium	<ul><li>Observation</li><li>Interview</li></ul>

## **COMMON COMPETENCIES**

	Unit of Competency	Learning Outcomes		Meth	nodology		sessment approach	
1.	Interpret technical drawings and plans	1.1 Read / Interpret blueprints and plans     1.2 Perform freehand sketching		Lectur Demo Practi exerc	nstration cal	Demo and or questi Writte	oning	
2.	Observe procedures, specifications and manuals of instructions.	2.1 Identify and access specifications / technical manuals 2.2 Interpret technical manuals 2.3 Apply information in technical manual 2.4 Store technical manual		Lectur Demo Practi exerci	nstration cal	Demo and o questi Writte	oning	
3.	Perform mensurations and calculations	3.1 Select measuring instruments     3.2 Carryout measurement and calculations		instruments Demonstration a 3.2 Carryout measurement and Practical		Demonstration and oral questioning Written test		
4.	Maintain tools and equipment  4.1 Check condition of tools and equipment  4.2 Perform preventive maintenance 4.3 Store tools and equipment		Practi exerc	nstration cal	Demonstration and oral questioning Written test			
	5. Prepare construction materials and tools		<ul><li>5.1 Identify Materials</li><li>5.2 Request Materials</li><li>5.3 Receive and inspec materials</li></ul>	t	Audio Visu Simulation Discussion Practical Exercise Demonstra	1	Direct observation Questions or interview Portfolio (credentials) Written / Oral Test Demonstration	1

## **CORE COMPETENCIES**

Course Title : <u>HEAVY EQUIPMENT OPERATION</u> Level: NC II

**OFF-HIGHWAY DUMP TRUCK (ARTICULATED)** 

Nominal Training Hours: 80 Hours

## **Course Description:**

This course is designed to enhance the knowledge, desirable attitudes and skills in the use of off-highway dump truck (articulated) in accordance with industry standards. It covers core competencies such as: perform pre- and post operation procedure, perform productive operation, and perform basic preventive maintenance servicing on a given off-highway dump truck (articulated).

To obtain this, all units prescribed for this qualification must be achieved:

Unit of Competency	Learning Outcomes	Methodology	Assessment Approach
Perform pre- and post-operation procedures for Off-highway Dump Truck (Articulated)	1.1 Identify and explain the functions of equipment and its controls, instruments, gauges, indicators safety devices dump working components 1.2 Explain the importance of and elaborate on equipment checking procedures 1.3 Perform checking procedures	Lecture Practical Demonstration	<ul> <li>Observation</li> <li>Demonstration with oral questioning</li> <li>Written test</li> </ul>

2. Perform productive operation for Off- highway Dump Truck (Articulated)	2.1 Identify and explain safety work practices 2.2 Identify and explain possible unexpected situations during productive operation 2.3 Elaborate procedures for loading, hauling and dumping procedures 2.4 Perform loading procedure 2.5 Perform hauling operation 2.6 Perform dumping procedure	Lecture Practical demonstration	<ul> <li>Observation</li> <li>Demonstration with oral questioning</li> <li>Written test</li> </ul>
3. Perform basic preventive maintenance servicing for Off-highway Dump Truck (Articulated)	3.1 Identify minor and major equipment defects 3.2 Identify and explain the use of basic hand tools and consumables 3.3 Use basic hand tools in servicing minor defects and OS parts 3.4 Prepare equipment report 3.5 Perform good housekeeping	Lecture Practical demonstration	<ul> <li>Observation</li> <li>Demonstration with oral questioning</li> <li>Written test</li> </ul>

## 3.2 TRAINING DELIVERY

The delivery of training should adhere to the design of the curriculum. Delivery should be guided by the 10 basic principles of competency-based TVET.

- The training is based on curriculum developed from the competency standards;
- Learning is modular in its structure;
- Training delivery is individualized and self-paced;
- Training is based on work that must be performed;
- Training materials are directly related to the competency standards and the curriculum modules:
- Assessment is based in the collection of evidence of the performance of work to the industry required standard;
- Training is based both on and off-the-job components;
- Allows for recognition of prior learning (RPL) or current competencies;
- Training allows for multiple entry and exit; and
- Approved training programs are nationally accredited.

The competency-based TVET system recognizes various types of delivery modes, both on and off-the-job as long as the learning is driven by the competency standards specified by the industry. The following training modalities may be adopted when designing training programs:

- The dualized mode of training delivery is preferred and recommended. Thus programs would contain both in-school and in-industry training or fieldwork components. Details can be referred to the Dual Training System (DTS) Implementing Rules and Regulations.
- Modular/self-paced learning is a competency-based training modality wherein the trainee is allowed to progress at his own pace. The trainer facilitates the training delivery
- Peer teaching/mentoring is a training modality wherein fast learners are given the opportunity to assist the slow learners.
- Supervised industry training or on-the-job training is an approach in training designed to enhance the knowledge and skills of the trainee through actual experience in the workplace to acquire specific competencies prescribed in the training regulations.
- Distance learning is a formal education process in which majority of the instruction occurs when the students and

instructor are not in the same place. Distance learning may employ correspondence study, or audio, video or computer technologies.

## 3.3 TRAINEE ENTRY REQUIREMENTS

This section specifies the qualifications of trainees and educational experience. Other requirements like health and physical requirements are also stated

- Can drive and holder of Professional Drivers license
- Can communicate both oral and written (English or Tagalog)
- Physically and mentally fit
- Can perform basic mathematical computation.

## 3.4 LIST OF TOOLS, EQUIPMENT AND MATERIALS

Recommended list of tools, equipment and materials for the training of 25 trainees for the operation of off-highway dump truck (articulated).

	TOOLS		EQUIPMENT	M	ATERIALS
QTY		QTY		QTY	
2 sets	Standard     mechanical hand     tools	2 units	Off Highway     Dump Truck     (Articulated)	25 kls.	Grease
2 pcs.	Grease gun	1 unit	Water pressure washer	1600 liters	Diesel oil
25 pcs.	<ul> <li>Mask</li> </ul>	1 unit	<ul> <li>Wheel loader</li> </ul>	25 kls	<ul> <li>Waste rags</li> </ul>
25 pairs	<ul> <li>Goggles</li> </ul>	1 unit	Air compressor	40 liters	Hydraulic oil
25 pcs.	Safety helmet			10 liters	<ul> <li>Distilled water</li> </ul>
2 unit	Fire extinguisher				
25 pcs.	<ul> <li>Safety vest</li> </ul>				
2 pcs.	Hand pump				
2 pcs.	Voltmeter pump				

<sup>\*</sup>Quantity will depend on actual training consumption

## 3.5 TRAINING FACILITIES

The off-highway dump truck (articulated) operation workshop must be of concrete structure. Based on class size of 25 students/trainees the space requirements for the teaching/learning and circulation areas are as follows:

SPACE REQUIREMENT	SIZE IN METERS	AREA IN SQ. METERS	QTY	TOTAL AREA IN SQ. METERS
Lecture area	8.0 x 6.0 meters	48M²	1	48M²
Learning resource area	4.0 x 6.0 meters	24M²	1	24M²
Tool room / Storage area	3.0 x 3.0 meters	9M²	1	9M²
Wash, toilet and locker room	8.0 x 4.0 meters	32M²	1	32M²
TOTAL	-	-		113M²
Facilities / Equipment /	-			5,000M <sup>2</sup>
Circulation*				
TOTAL AREA				5,113M <sup>2</sup>

Area requirement is equivalent to 30 percent of total teaching / learning areas \*Training area (practice) (MOA)

# 3.6 TRAINERS' QUALIFICATION HEAVY EQUIPMENT OPERATION (ARTICULATED OFF-HIGHWAY DUMPTRUCK)

TRAINER QUALIFICATION (TQ II)

- Must be a holder of Heavy Equipment Operation (Articulated off-highway dump truck) NC-II
- Must have undergone training on Training Methodology III (TM III) or its equivalent
- Must be physically and mentally fit
- Must have at least 5 years job/industry experience\*

Reference: TESDA Board Resolution No. 2004 03

<sup>\*</sup> Optional. Only when required by the hiring institution.

## SECTION 4 NATIONAL ASSESSMENT AND CERTIFICATION ARRANGEMENTS

- 4.1 To attain the National Qualification of **HEAVY EQUIPMENT OPERATION** (Articulated Off-Highway Dump Truck] NC II, the candidate must demonstrate competence in all the units of competency in Section 1. The successful candidates shall be awarded a National Certificate signed by the TESDA Director General.
- 4.2 The qualification of **HEAVY EQUIPMENT OPERATION** (Articulated Off-Highway Dump Truck) NC II maybe attained through demonstration of competence in a project-type assessment covering the following core units.

#### 4.2.1 ARTICULATED OFF-HIGHWAY DUMP TRUCK

- Perform pre- and post-operation procedure for hauling equipment
- Perform productive operation for off-highway dump truck (articulated)
- Perform basic preventive maintenance servicing for hauling equipment
- 4.3 Assessment shall focus on the core units of competency. The basic and common units shall be integrated or assessed concurrently with the core units.
- 4.4 The following are qualified to apply for assessment and certification:
  - 4.4.1 Graduates of formal, non-formal and/or informal training including enterprise-based training programs
  - 4.4.2 Experienced Workers (wage-employed or self-employed)

The guidelines on assessment and certification are discussed in detail in the "Procedures Manual on Assessment and Certification" and "guidelines on the Implementation of the Philippine TVET Qualification and Certification System (PTQCS)."

## COMPETENCY MAP CONSTRUCTION-HEAVY EQUIPMENT OPERATION -SUB- SECTOR

Perform pre- and post- operation procedures for earth moving equipment	Perform basic preventive maintenance servicing for earth moving equipment			Perform productive peration for motor grader	Perform productive operation for road roller
operation for o	peration for ckhoe loader  Perform pre- are operation proced lifting equiprocedular lifting	edures for maintenance service	ing for operation for	rough- operati	ion for
	erform productive ation for tower crane operation to	· · · · · · · · · · · · · · · · · · ·	res for preventive m	aintenance open	rm productive ration for off- n way dump . (articulated)
Perform productive operation for off-highway dump truck (rigid)	operation for on- highway dump truck concreting	n procedures for maintenanc g and asphalting concreting a			Perform productive operation for paver
operation for cr	ssist Install Insperator Install Insperator	ging			
mensurations and spec	rve procedures, cifications and drawings and pal of instructions		Prepare construction materials and tools		
Receive and respond to workplace communication	Vork with others  Demonstrate values		Participate in workplace communication	Work in a team environment	Practice career professionalism
Practice occupational health and safety procedures	Lead workplace Lead small communication	ll team  Develop and practice negotiation skills	Solve problems related to work activities	Use mathematica concepts and techniques	Use relevant technologies

Plan and organize work

Collect, analyze and organize

information

Promote

environmental

protection

Utilize specialized communication

skills

Develop teams and

individuals

Apply problemsolving techniques

in the workplace

## **Definition of Terms**

For the purpose of this Competency Standard, the words

1.	<b>9</b> , ,	Refers to articulated frame type of dump truck used for
	[articulated]	loading and hauling different types of earth materials e.g., rocks, limestones, coal, etc.
2.	Retarder brake	Refers to the control of speed to maintain safe downhill operation.
3.	Service brake	Refers to the control of speed to slowdown, and stopping of dump truck.
4.	Dump box	Refers to body structure where the loads are placed and carried.
5.	Steering	Refers to the mechanism that controls the dump truck direction.
6.	Hauling	Refers to the transfer of earth materials from loading area to dumping site.

## **ACKNOWLEDGEMENTS**

The Technical Education and Skills Development Authority (TESDA) wishes to extend thanks and appreciation to the many representatives of business, industry, academe and government agencies and who contributed their time and expertise to the development and validation of this Training Regulations.

## • THE TECHNICAL EXPERT PANEL (TEP)

## Florello P. Quianzon
