TRAINING REGULATIONS FOR PV SYSTEMS SERVICING NC III

Section 1 PV SYSTEMS SERVICING NC III QUALIFICATIONS

The **PV SYSTEMS SERVICING NC III** Qualification consists of competencies that a person must achieve to be to perform PV system maintenance, troubleshooting, and repair of small solar home systems up to 1kWp.

This Qualification is packaged from the competency map of the Construction Sector as shown in Annex A.

The units of competency comprising this qualification include the following:

Code	BASIC COMPETENCIES
500311109	Lead workplace communication
500311110	Lead small teams
500311111	Develop and practice negotiation skills
500311112	Solve problems related to work activities
500311113	Use mathematical concepts and techniques
500311114	Use relevant technologies
Code	COMMON COMPETENCIES
Code	COMMON COMPETENCIES
CON724201	Prepare construction materials and tools
CON311201	Observe procedures, specifications and manuals of instruction
CON311202	Interpret technical drawings and plans
CON311203	Perform mensurations and calculations
CON311204	Maintain tools and equipment
Code	CORE COMPETENCIES
CON724329	Perform PV System Diagnosis
CON724330	Repair PV System
CON724331	Monitor PV System Operation

A person who has achieved this Qualification is competent to be:

- PV Systems Service Technician; or
- PV Systems Maintenance Technician; or
- PV Systems Repair Technician

SECTION 2: COMPETENCY STANDARDS

This section gives the details of the contents of the basic, common, and core units of competency required for **PV SYSTEMS SERVICING NC III.**

BASIC COMPETENCIES

UNIT OF COMPETENCY: LEAD WORKPLACE COMMUNICATION

UNIT CODE : 500311109

UNIT DESCRIPTOR: This unit covers the knowledge, skills, and attitudes required

to lead in the dissemination and discussion of ideas,

information, and issues in the workplace.

ELEMENT	PERFORMANCE CRITERIA
	Italicized terms are elaborated in the Range of Variables
1. Communicate	1.1 Appropriate <i>communication method</i> is selected
information about	1.2 Multiple operations involving several topics areas are
workplace	communicated accordingly
processes	1.3 Questions are used to gain extra information
processes	1.4 Correct sources of information are identified
	1.5 Information is selected and organized correctly
	1.6 Verbal and written reporting is undertaken when required
	1.7 Communication skills are maintained in all situations
2. Lead workplace	2.1 Response to workplace issues are sought
discussions	2.2 Response to workplace issues are provided immediately
uiscussions	2.3 Constructive contributions are made to workplace discussions
	on such issues as production, quality and safety
	2.4 Goals/objectives and action plan undertaken in the workplace
	are communicated
2 Identify and	3.1 Issues and problems are identified as they arise
3. Identify and	3.2 Information regarding problems and issues are organized
communicate	coherently to ensure clear and effective communication
issues arising in	3.3 Dialogue is initiated with appropriate personnel
the workplace	3.4 Communication problems and issues are raised as they arise
	3.4 Confinition cation problems and issues are faised as they arise

VARIABLE	RANGE
Methods of communication	 1.1. Non-verbal gestures 1.2. Verbal 1.3. Face to face 1.4. Two-way radio 1.5. Speaking to groups 1.6. Using telephone 1.7. Written 1.8. Internet

Critical a compete	-	Assessment requires evidence that the candidate: 1.1 Dealt with a range of communication/information at one time 1.2 Made constructive contributions in workplace issues 1.3 Sought workplace issues effectively 1.4 Responded to workplace issues promptly 1.5 Presented information clearly and effectively written form 1.6 Used appropriate sources of information 1.7 Asked appropriate questions 1.8 Provided accurate information
Underpii knowled attitude		Organization requirements for written and electronic communication methods Effective verbal communication methods
3. Underpii skills	nning	 3.1 Organize information 3.2 Understand and convey intended meaning 3.3 Participate in variety of workplace discussions 3.4 Comply with organization requirements for the use of written and electronic communication methods
4. Resourc	_	The following resources MUST be provided: 4.1 Variety of Information 4.2 Communication tools 4.3 Simulated workplace
5. Method assessm		Competency may be assessed through: 5.1 Competency in this unit must be assessed through 5.2 Direct Observation 5.3 Interview
6. Context assessm		6.1 Competency may be assessed in the workplace or in simulated workplace environment

UNIT OF COMPETENCY
UNIT CODE

: LEAD SMALL TEAMS

: 500311110

UNIT DESCRIPTOR

: This unit covers the knowledge, skills and attitudes to lead small teams including setting and maintaining team and individual performance standards.

PERFORMANCE CRITERIA
Italicized terms are elaborated in the Range of Variables
1.1 Work requirements are identified and presented to team members
1.2 Reasons for instructions and requirements are
communicated to team members
1.3 <i>Team members' queries and concerns</i> are recognized,
discussed and dealt with
2.1 Duties, and responsibilities are allocated having regard to the skills, knowledge and aptitude required to properly undertake the assigned task and according to company policy 2.2 Duties are allocated having regard to individual preference,
domestic and personal considerations, whenever possible
 3.1 Performance expectations are established based on client needs and according to assignment requirements 3.2 Performance expectations are based on individual team members duties and area of responsibility 3.3 Performance expectations are discussed and disseminated to individual team members
 4.1 Monitoring of performance takes place against defined performance criteria and/or assignment instructions and corrective action taken if required 4.2 Team members are provided with feedback, positive support and advice on strategies to overcome any deficiencies 4.3 Performance issues which cannot be rectified or addressed within the team are referenced to appropriate personnel according to employer policy 4.4 Team members are kept informed of any changes in the priority allocated to assignments or tasks which might impact on client/customer needs and satisfaction 4.5 Team operations are monitored to ensure that employer/client needs and requirements are met 4.6 Follow-up communication is provided on all issues affecting the team 4.7 All relevant documentation is completed in accordance with

VARIABLE	RANGE
1. Work requirements	1.1 Client Profile 1.2 Assignment instructions
2. Team member's concerns	2.1 Roster/shift details
3. Monitor performance	3.1 Formal process 3.2 Informal process
4. Feedback	4.1 Formal process 4.2 Informal process
5. Performance issues	5.1 Work output 5.2 Work quality 5.3 Team participation 5.4 Compliance with workplace protocols 5.5 Safety 5.6 Customer service

EVIDENCE GUIDE	
Critical aspects of competency	 Assessment requires evidence that the candidate: 1.1 Maintained or improved individuals and/or team performance given a variety of possible scenario 1.2 Assessed and monitored team and individual performance against set criteria 1.3 Represented concerns of a team and individual to next level of management or appropriate specialist and to negotiate on their behalf 1.4 Allocated duties and responsibilities, having regard to individual's knowledge, skills and aptitude and the needs of the tasks to be performed 1.5 Set and communicated performance expectations for a range of tasks and duties within the team and provided feedback to team members
2. Underpinning Knowledge	 2.1 Company policies and procedures 2.2 Relevant legal requirements 2.3 How performance expectations are set 2.4 Methods of Monitoring Performance 2.5 Client expectations 2.6 Team member's duties and responsibilities
3. Underpinning skills	 3.1 Communication skills required for leading teams 3.2 Informal performance counseling skills 3.3 Team building skills 3.4 Negotiating skills
Resource implications	The following resources MUST be provided: 4.1 Access to relevant workplace or appropriately simulated environment where assessment can take place 4.2 Materials relevant to the proposed activity or task
5. Method of assessment	 Competency may be assessed through: 5.1 Direct observations of work activities of the individual member in relation to the work activities of the group 5.2 Observation of simulation and/or role play involving the participation of individual member to the attainment of organizational goal 5.3 Case studies and scenarios as a basis for discussion of issues and strategies in teamwork
6. Context of assessment	 6.1 Competency assessment may occur in workplace or any appropriately simulated environment 6.2 Assessment shall be observed while task are being undertaken whether individually or in-group

UNIT OF COMPETENCY: DEVELOP AND PRACTICE NEGOTIATION SKILLS

UNIT CODE : 500311111

: This unit covers the skills, knowledge, and attitudes required to collect information in order to negotiate to a desired **UNIT DESCRIPTOR**

outcome and participate in the negotiation.

ELEMENT	PERFORMANCE CRITERIA
1. Plan negotiations	 Italicized terms are elaborated in the Range of Variables 1.1 Information on preparing for negotiation is identified and included in the plan 1.2 Information on creating non verbal environments for positive negotiating is identified and included in the plan Information on active listening is identified and included in 1.3 the plan Information on different questioning techniques is 1.4 identified and included in the plan Information is checked to ensure it is correct and up-to-date 1.5 date
2. Participate in negotiations	 2.1 Criteria for successful outcome are agreed upon by all parties 2.2 Desired outcome of all parties are considered

VARIABLE	RANGE
1. Preparing for negotiation	 1.1 Background information on other parties to the negotiation 1.2 Good understanding of topic to be negotiated 1.3 Clear understanding of desired outcome/s 1.4 Personal attributes 1.4.1 self awareness 1.4.2 self esteem 1.4.3 objectivity 1.4.4 empathy 1.4.5 respect for others 1.5 Interpersonal skills 1.5.1 listening/reflecting 1.5.2 non verbal communication 1.5.3 assertiveness 1.5.4 behavior labeling 1.5.5 testing understanding 1.5.6 seeking information 1.5.7 self disclosing
	 1.6 Analytic skills 1.6.1 observing differences between content and process 1.6.2 identifying bargaining information 1.6.3 applying strategies to manage process 1.6.4 applying steps in negotiating process 1.6.5 strategies to manage conflict 1.6.6 steps in negotiating process 1.6.7 options within organization and externally for resolving conflict
Non verbal environments	 2.1 Friendly reception 2.2 Warm and welcoming room 2.3 Refreshments offered 2.4 Lead in conversation before negotiation begins
3. Active listening	 3.1 Attentive 3.2 Don't interrupt 3.3 Good posture 3.4 Maintain eye contact 3.5 Reflective listening
Questioning techniques	4.1 Direct 4.2 Indirect 4.3 Open-ended

Critical aspects of Competency	Assessment requires evidence that the candidate: 1.1 Demonstrated sufficient knowledge of the factors influencing negotiation to achieve agreed outcome 1.2 Participated in negotiation with at least one person to achieve an agreed outcome
Underpinning knowledge and attitude	 2.1 Codes of practice and guidelines for the organization 2.2 Organizations policy and procedures for negotiations 2.3 Decision making and conflict resolution strategies procedures 2.4 Problem solving strategies on how to deal with unexpected questions and attitudes during negotiation 2.5 Flexibility 2.6 Empathy
3. Underpinning skills	 3.1 Interpersonal skills to develop rapport with other parties 3.2 Communication skills (verbal and listening) 3.3 Observation skills 3.1 Negotiation skills
Resource implications	The following resources MUST be provided: 4.1 Room with facilities necessary for the negotiation process 4.2 Human resources (negotiators)
5. Method of assessment	Competency may be assessed through: 5.1 Observation/demonstration and questioning 5.2 Portfolio assessment 5.3 Oral and written questioning 5.4 Third party report
6. Context of assessment	6.1 Competency to be assessed in real work environment or in a simulated workplace setting.

UNIT OF COMPETENCY: SOLVE PROBLEMS RELATED TO WORK ACTIVITIES

UNIT CODE : 500311112

UNIT DESCRIPTOR

: This unit of covers the knowledge, skills and attitudes required to solve problems in the workplace including the application of problem solving techniques and to determine and resolve the root cause of problems.

ELEMENT	PERFORMANCE CRITERIA Italicized terms are elaborated in the Range of Variables
Identify the problem	 1.1 Variances are identified from normal operating parameters; and product quality 1.2 Extent, cause and nature are of the problem are defined through observation, investigation and <i>analytical techniques</i> 1.3 <i>Problems</i> are clearly stated and specified
Determine fundamental causes of the problem	 2.1 Possible causes are identified based on experience and the use of problem solving tools / analytical techniques. 2.2 Possible cause statements are developed based on findings 2.3 Fundamental causes are identified per results of investigation conducted
3. Determine corrective action	 3.1 All possible options are considered for resolution of the problem 3.2 Strengths and weaknesses of possible options are considered 3.3 Corrective actions are determined to resolve the problem and possible future causes 3.4 Action plans are developed identifying measurable objectives, resource needs and timelines in accordance with safety and operating procedures
Provide recommendation/s to manager	 4.1 Report on recommendations are prepared 4.2 Recommendations are presented to appropriate personnel. 4.3 Recommendations are followed-up, if required

VARIABLE	RANGE
1. Analytical techniques	 1.1 Brainstorming 1.2 Intuitions/Logic 1.3 Cause and effect diagrams 1.4 Pareto analysis 1.5 SWOT analysis 1.6 Gant chart, Pert CPM and graphs 1.7 Scattergrams
2. Problem	 2.1 Non – routine process and quality problems 2.2 Equipment selection, availability and failure 2.3 Teamwork and work allocation problem 2.4 Safety and emergency situations and incidents
3. Action plans	 3.1 Priority requirements 3.2 Measurable objectives 3.3 Resource requirements 3.4 Timelines 3.5 Co-ordination and feedback requirements 3.6 Safety requirements 3.7 Risk assessment 3.8 Environmental requirements

case studies / what ifs as a stimulus with a walk through forming part of the response. These assessment activities should inclurange of problems, including new, unusual and improbable situations that may have happened. 2. Underpinning knowledge and attitude 2.1 Competence includes a thorough knowledge and understanding of the process, normal operating parameters, and product quality to recognize non-stand situations 2.2 Competence to include the ability to apply and explain, sufficient for the identification of fundamental cause, determining the corrective action and provision of recommendations 2.2.1. Relevant equipment and operational processe 2.2.2. Enterprise goals, targets and measures 2.2.2. Enterprise quality, OHS and environmental requirement 2.2.4. Principles of decision making strategies and techniques 2.2.5. Enterprise information systems and data collar 2.2.6. Industry codes and standards 3. Underpinning skills 3.1 Using range of formal problem solving techniques identifying and clarifying the nature of the problem Devising the best solution 3.4 Evaluating the solution		
1.1 Identified the problem 1.2 Determined the fundamental causes of the problem 1.3 Determined the correct / preventive action 1.4 Provided recommendation to manager These aspects may be best assessed using a range of scenar case studies / what ifs as a stimulus with a walk through forming part of the response. These assessment activities should inclurange of problems, including new, unusual and improbable situations that may have happened. 2. Underpinning knowledge and understanding of the process, normal operating parameters, and product quality to recognize non-stand situations 2.2 Competence to include the ability to apply and explain, sufficient for the identification of fundamental cause, determining the corrective action and provision of recommendations 2.2.1. Relevant equipment and operational processe 2.2.2. Enterprise goals, targets and measures 2.2.3. Enterprise quality, OHS and environmental requirement 2.2.4. Principles of decision making strategies and techniques 2.2.5. Enterprise information systems and data collar 2.2.6. Industry codes and standards 3. Underpinning skills 3.1 Using range of formal problem solving techniques 3.2 Identifying and clarifying the nature of the problem 3.3 Devising the best solution 3.4 Evaluating the solution		Assessment requires evidence that the candidate:
1.2 Determined the fundamental causes of the problem 1.3 Determined the correct / preventive action 1.4 Provided recommendation to manager These aspects may be best assessed using a range of scenar case studies / what ifs as a stimulus with a walk through forming part of the response. These assessment activities should inclurange of problems, including new, unusual and improbable situations that may have happened. 2. Underpinning knowledge and understanding of the process, normal operating parameters, and product quality to recognize non-stand situations 2.2 Competence to include the ability to apply and explain, sufficient for the identification of fundamental cause, determining the corrective action and provision of recommendations 2.2.1. Relevant equipment and operational processe 2.2.2. Enterprise goals, targets and measures 2.2.3. Enterprise quality, OHS and environmental requirement 2.2.4. Principles of decision making strategies and techniques 2.2.5. Enterprise information systems and data collar 2.2.6. Industry codes and standards 3.1 Using range of formal problem solving techniques 3.2 Identifying and clarifying the nature of the problem 3.3 Devising the best solution 3.4 Evaluating the solution	competency	1.1 Identified the problem
1.4 Provided recommendation to manager These aspects may be best assessed using a range of scenar case studies / what ifs as a stimulus with a walk through forming part of the response. These assessment activities should inclurange of problems, including new, unusual and improbable situations that may have happened. 2. Underpinning knowledge and understanding of the process, normal operating parameters, and product quality to recognize non-standistitude parameters, and product quality to apply and explain, sufficient for the identification of fundamental cause, determining the corrective action and provision of recommendations 2.2.1. Relevant equipment and operational processe 2.2.2. Enterprise goals, targets and measures 2.2.3. Enterprise quality, OHS and environmental requirement 2.2.4. Principles of decision making strategies and techniques 2.2.5. Enterprise information systems and data collar 2.2.6. Industry codes and standards 3. implications an extended period of time, or a suitable metho gathering evidence of operating ability over a rang situations. A bank of scenarios / case studies / what if		an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. A bank of scenarios / case studies / what ifs will be required as well as bank of questions which will be used

5. Method of assessment	Competency may be assessed through: 5.1 Case studies on solving problems in the workplace 5.2 Observation	
	The unit will be assessed in a holistic manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations, which will include disruptions to normal, smooth operation. Simulation may be required to allow for timely assessment of parts of this unit of competency. Simulation should be based on the actual workplace and will include walk through of the relevant competency components.	
6. Context of assessment	6.1 In all workplace, it may be appropriate to assess this unit concurrently with relevant teamwork or operation units.	

UNIT OF COMPETENCY: USE MATHEMATICAL CONCEPTS AND

TECHNIQUES

UNIT CODE : 500311113

UNIT DESCRIPTOR: This unit covers the knowledge, skills and attitudes required

in the application of mathematical concepts and techniques.

ELEMENT	PERFORMANCE CRITERIA Italicized terms are elaborated in the Range of Variables
Identify mathematical tools and techniques to solve problem	1.1 Problem areas are identified based on given condition1.2 <i>Mathematical techniques</i> are selected based on the given problem
2. Apply mathematical procedure/solution	 2.1 Mathematical techniques are applied based on the problem identified 2.2 Mathematical computations are performed to the level of accuracy required for the problem 2.3 Results of mathematical computation is determined and verified based on job requirements
3. Analyze results	3.1 Result of application is reviewed based on expected and required specifications and outcome3.2 <i>Appropriate action</i> is applied in case of error

VARIABLE	RANGE
Mathematical techniques	May include but are not limited to: 1.1 Four fundamental operations 1.2 Measurements 1.3 Use/Conversion of units of measurements 1.4 Use of standard formulas
2. Appropriate action	2.1 Review in the use of mathematical techniques (e.g. recalculation, re-modeling)2.2 Report error to immediate superior for proper action

Critical aspects of competency	Assessment requires evidence that the candidate: 1.1 Identified, applied and reviewed the use of mathematical concepts and techniques to workplace problems
2. Underpinning knowledge	 2.1 Fundamental operation (addition, subtraction, division, multiplication) 2.2 Measurement system 2.3 Precision and accuracy 2.4 Basic measuring tools/devices
3. Underpinning skills	3.1 Applying mathematical computations3.2 Using calculator3.3 Using different measuring tools
Resource implications	The following resources MUST be provided: 4.1 Calculator 4.2 Basic measuring tools 4.3 Case Problems
5. Method of assessment	Competency may be assessed through: 5.1 Authenticated portfolio 5.2 Written Test 5.3 Interview/Oral Questioning 5.4 Demonstration
6. Context of assessment	6.1 Competency may be assessed in the work place or in a simulated work place setting

UNIT OF COMPETENCY: USE RELEVANT TECHNOLOGIES

UNIT CODE : 500311114

UNIT DESCRIPTOR : This unit of competency covers the knowledge, skills, and attitude required in selecting, sourcing and applying

appropriate and	affordable	technologies	in the	workplace.

ELEMENT	PERFORMANCE CRITERIA Italicized terms are elaborated in the Range of Variables
Study/select appropriate technology	 1.1 Usage of different <i>technologies</i> is determined based on job requirements 1.2 Appropriate technology is selected as per work specification
Apply relevant technology	 2.1 Relevant technology is effectively used in carrying out function 2.2 Applicable software and hardware are used as per task requirement 2.3 <i>Management concepts</i> are observed and practiced as per established industry practices
3. Maintain/enhance of relevant technology	 3.1 Maintenance of technology is applied in accordance with the <i>industry standard operating procedure</i>, <i>manufacturer's operating guidelines</i> and <i>occupational health and safety procedure</i> to ensure its operative ability 3.2 Updating of technology is maintained through continuing education or training in accordance with job requirement 3.3 Technology failure/ defect is immediately reported to the concern/responsible person or section for <i>appropriate action</i>

VARIABLE	RANGE
1. Technology	May include but are not limited to: 1.1 Office technology 1.2 Industrial technology 1.3 System technology 1.4 Information technology 1.5 Training technology
2. Management concepts	May include but not limited to: 2.1 Real Time Management 2.2 KAIZEN or continuous improvement 2.3 5s 2.4 Total Quality Management 2.5 Other management/productivity tools
Industry standard operating procedure	3.1 Written guidelines relative to the usage of office technology/equipment 3.2 Verbal advise/instruction from the co-worker
Manufacturer's operating guidelines/ instructions	 4.1 Written instruction/manuals of specific technology/ equipment 4.2 General instruction manual 4.3 Verbal advise from manufacturer relative to the operation of equipment
Occupational health and safety procedure	5.1 Relevant statutes on OHS 5.2 Company guidelines in using technology/equipment
6. Appropriate action	6.1 Implementing preventive maintenance schedule 6.2 Coordinating with manufacturer's technician

1. Critical aspects of competency	Assessment requires evidence that the candidate: 1.1 Studied and selected appropriate technology consistent with work requirements 1.2 Applied relevant technology 1.3 Maintained and enhanced operative ability of relevant technology
Underpinning knowledge and attitude	 2.1 Awareness on technology and its function 2.2 Repair and maintenance procedure 2.3 Operating instructions 2.4 Applicable software 2.5 Communication techniques 2.6 Health and safety procedure 2.7 Company policy in relation to relevant technology 2.8 Different management concepts 2.9 Technology adaptability
3. Underpinning skills	 3.1 Relevant technology application/implementation 3.2 Basic communication skills 3.3 Software applications skills 3.4 Basic troubleshooting skills
Resource implications	The following resources MUST be provided: 4.1 Relevant technology 4.2 Interview and demonstration questionnaires 4.3 Assessment packages
5. Method of assessment	Competency must be assessed through: 5.1 Interview 5.2 Actual demonstration 5.3 Authenticated portfolio (related certificates of training/seminar)
6. Context of Assessment	6.1 Competency may be assessed in actual workplace or simulated environment

COMMON COMPETENCIES

UNIT OF COMPETENCY: PREPARE CONSTRUCTION MATERIALS AND TOOLS

UNIT CODE : CON724201

UNIT DESCRIPTOR : This unit covers the knowledge, skills and attitudes on

identifying, requesting and receiving construction materials and tools based on the required performance standards.

ELEMENT	PERFORMANCE CRITERIA Italicized terms are elaborated in the Range of Variable
1. Identify materials	 1.1 <i>Materials</i> are listed as per job requirements 1.2 Quantity and <i>description of materials</i> conform with the job requirements 1.3 Tools and accessories are identified according to job requirements
2. Requisition materials	 2.1 Materials and tools needed are requested according to the list prepared 2.2 Request is done as per <i>company standard operating procedures (SOP)</i> 2.2 Substitute materials and tools are provided without sacrificing cost and quality of work
Receive and inspect materials	3.1 Materials and tools issued are inspected as per quantity and specification 3.2 Tools, accessories and materials are checked for damages according to enterprise procedures 3.3 Materials and tools are set aside to appropriate location nearest to the workplace

VARIABLE	RANGE
1. Materials and Tools	1.1 Electrical supplies1.2 Structural1.3 Plumbing1.4 Welding/pipefitting1.5 Carpentry1.6 Masonry
Description of Materials and Tools	2.1 Brand name 2.2 Size 2.3 Capacity 2.4 Kind of application
Company standard procedures	3.1 Job order 3.2 Requisition slip 3.3 Borrower slip

1.	Critical aspects of competency	Assessment requires evidence that the candidate: 1.1 Listed materials and tools according to quantity and job requirements 1.2 Requested materials and tools according to the list prepared and as per company SOP 1.3 Inspected issued materials and tools as per quantity and job specifications 1.4 Tools provided with appropriate safety devices
2.	Underpinning knowledge	2.1 Types and uses of construction materials and tools 2.2 Different forms 2.3 Requisition procedures
3.	Underpinning skills	3.1 Preparing materials and tools3.2 Proper handling of tools and equipment3.3 Following instructions
4.	Resource implications	The following resources should be provided: 4.1 Workplace location 4.2 Materials relevant to the unit of competency 4.3 Technical plans, drawings and specifications relevant to the activities
5.	Method of assessment	Competency in this unit must be assessed through: 5.1 Direct observation and oral questioning
6.	Context of assessment	 6.1 Competency may be assessed in the workplace or in a simulated workplace 6.2 Competency assessment must be undertaken in accordance with the endorsed TESDA assessment guidelines

UNIT OF COMPETENCY: OBSERVE PROCEDURES, SPECIFICATIONS AND

MANUALS OF INSTRUCTIONS

UNIT CODE : CON311201

UNIT DESCRIPTOR : This unit covers the knowledge, skills and attitudes on

identifying, interpreting, applying services to specifications

and manuals and storing manuals.

ELEMENT	PERFORMANCE CRITERIA Italicized terms are elaborated in the Range of Variables
Identify and access specification/manuals	1.1 Appropriate manuals are identified and accessed as per job requirements1.2 Version and date of manual are checked to ensure that correct specification and procedures are identified
2. Interpret manuals	 2.1 Relevant sections, chapters of specifications/ manuals are located in relation to the work to be conducted 2.2 Information and procedure in the manual are interpreted in accordance with industry practices
3. Apply information in manual	 3.1 <i>Manual</i> is interpreted according to job requirements 3.2 Work steps are correctly identified in accordance with manufacturer's specification 3.3 Manual data are applied according to the given task 3.4 All correct sequencing and adjustments are interpreted in accordance with information contained on the manual or specifications
4. Store manuals	4.1 Manual or specification is stored appropriately to prevent damage, ready access and updating of information when required in accordance with company requirements

VARIABLE	RANGE
Procedures, Specifications and Manuals of Instructions	Kinds of Manuals: 1.1 Manufacturer's Specification Manual 1.2 Repair Manual 1.3 Maintenance Procedure Manual 1.4 Periodic Maintenance Manual

Critical aspects of competency	Assessment requires that the candidate: 1.1 Identified and accessed specification/manuals as per job requirements 1.2 Interpreted manuals in accordance with industry practices 1.3 Applied information in manuals according to the given task 1.4 Stored manuals in accordance with company requirements	
2. Underpinning knowledge	2.1 Types of manuals used in construction sector2.2 Identification of symbols used in the manuals2.3 Identification of units of measurements2.4 Unit conversion	
3. Underpinning skills	3.1 Reading and comprehension skills required to identify and interpret construction manuals and specifications3.2 Accessing information and data	
Resource implications	The following resources should be provided: 4.1 All manuals/catalogues relative to construction sector	
5. Method of assessment	Competency should be assessed through: 5.1 Direct observation 5.2 Questions/interview Assessment of Underpinning knowledge and attitude and practical skills may be combined	
6. Context of assessment	 6.1 Competency assessment must be undertaken in accordance with the endorsed TESDA assessment guidelines 6.2 Assessment may be conducted in the workplace or a simulated environment 	

UNIT OF COMPETENCY: INTERPRET TECHNICAL DRAWINGS AND PLANS

UNIT CODE : CON311202

: This unit covers the knowledge, skills and attitudes on analyzing and interpreting symbols, data and work plan based on the required performance standards. **UNIT DESCRIPTOR**

ELEMENT	PERFORMANCE CRITERIA Italicized terms are elaborated in the Range of Variables
Analyze signs, symbols and data	 1.1 Technical plans are obtained according to job requirements 1.2 Signs, symbols and data are identified according to job specifications 1.3 Signs symbols and data are determined according to classification or as appropriate in drawing
Interpret technical drawings and plans	 2.1 Necessary <i>tools, materials</i> and equipment are identified according to the <i>plan</i> 2.2 Supplies and materials are listed according to specifications 2.3 Components, assemblies or objects are recognized as required 2.4 Dimensions are identified as appropriate to the plan 2.5 Specification details are matched with existing/available resources and in line with job requirements 2.6 Work plan is drawn following the specifications
3. Apply freehand sketching	3.1 Where applicable, correct freehand sketching is produced in accordance with the job requirements

VARIABLE	RANGE
1. Technical plans	Including but not limited to: 1.1 Electrical plans 1.2 Structural plans 1.3 Architectural plans 1.4 Plumbing plans 1.5 Welding Procedures Specifications (WPS)
2. Work plan	2.1 Job requirements2.2 Installation instructions2.3 Components instruction
3. Classification	Including but not limited to: 3.1 Electrical 3.2 Mechanical 3.3 Plumbing
4. Drawing	 4.1 Drawing symbols 4.2 Alphabet of lines 4.3 Orthographic views Front view Right side view/left side view Top view Pictorial 4.4 Schematic diagram 4.5 Electrical drawings 4.6 Structural drawings 4.7 Plumbing drawings Water Sewerage/Drainage Ventilation 4.8 Welding symbols
5. Tools and materials	Including but not limited to: 5.1 Compass 5.2 Divider 5.3 Rulers 5.4 Triangles 5.5 Drawing tables 5.6 Computer

Critical aspects of competency	 1.1 Identified and determined signs, symbols and data according to work plan, job requirements and classifications 1.2 Identified tools and equipment in accordance with job requirements 1.3 Listed supplies and materials according to blueprint specifications 1.4 Drawn workplan following specifications 1.5 Determined job specifications based on working/technical drawing
2. Underpinning knowledge	 2.1 TRADE MATHEMATICS Linear measurement Dimension Unit conversion 2.2 BLUEPRINT READING AND PLAN SPECIFICATION Electrical, mechanical plan, symbols and abbreviations Drawing standard symbols 2.3 TRADE THEORY Basic technical drawing Types technical plans Various types of drawings Notes and specifications
3. Underpinning skills	 3.1 Interpreting drawing/orthographic drawing 3.2 Interpreting technical plans 3.3 Matching specification details with existing resources 3.4 Following instructions 3.5 Handling of drawing instruments
4. Resource implications	The following resources should be provided: 4.1 Workplace 4.2 Drawings and specification relevant to task 4.3 Materials and instrument relevant to proposed activity
5. Method of assessment	Competency should be assessed through: 5.1 Direct observation 5.2 Questions/interview 5.3 Written test related to underpinning knowledge
6. Context of assessment	 6.1 Competency assessment may occur in the workplace or in any appropriate simulated environment 6.2 Assessment shall be observed while task are being undertaken whether individually or in group 6.3 Competency assessment must be undertaken in accordance with the endorsed TESDA assessment guidelines

UNIT OF COMPETENCY: PERFORM MENSURATIONS AND CALCULATIONS

UNIT CODE : CON311203

: This unit covers the knowledge, skills and attitudes on identifying and measuring objects based on the required performance standards. **UNIT DESCRIPTOR**

ELEMENT	PERFORMANCE CRITERIA
	Italicized terms are elaborated in the Range of Variable
Select measuring instruments	 1.1 Object or component to be measured is identified, classified and interpreted according to the appropriate regular <i>geometric shape</i> 1.2 Measuring tools are selected/identified as per object to be measured or job requirements 1.3 Correct specifications are obtained from relevant sources 1.4 Appropriate measuring instruments are selected according to job requirements 1.5 Alternative measuring tools are used without sacrificing cost and quality of work
2. Carry out measurements and	2.1 Accurate <i>measurements</i> are obtained
calculations	according to job requirements
	2.3 Alternative measuring tools are used
	without sacrificing cost and quality of work
	2.4 Calculation needed to complete work tasks are performed using the four basic process of addition (+), subtraction (-), multiplication (x) and division (/) including but not limited to: trigonometric functions, algebraic computations
	2.5 Calculations involving fractions, percentages and mixed numbers are used to complete workplace tasks
	2.6 Numerical computation is self-checked and corrected for accuracy
	2.7 Instruments are read to the limit of accuracy of the tool
	2.8 Systems of measurement identified and converted according to job requirements/ISO
	2.9 Workpieces are measured according to job requirements

NADIABLES	DANCE
VARIABLE	RANGE
Geometric shape	Including but is not limited to: 1.1 Round 1.2 Square 1.3 Rectangular 1.4 Triangle 1.5 Sphere 1.6 Conical
2. Measuring instruments	Including but not limited to: 2.1 Micrometer (In-out, depth) 2.2 Vernier caliper (out, inside) 2.3 Dial gauge with mag, std. 2.4 Straight edge 2.5 Thickness gauge 2.6 Torque gauge 2.7 Small hole gauge 2.8 Telescopic gauge 2.9 Try-square 2.10 Protractor 2.11 Combination gauge 2.12 Steel rule 2.13 Voltmeter 2.14 Ammeter 2.15 Mega-ohmeter 2.16 Kilowatt hour meter 2.17 Gauges 2.18 Thermometers
Measurements and calculations	3.1 Linear 3.2 Volume 3.3 Area 3.4 Wattage 3.5 Voltage 3.6 Resistance 3.7 Amperage 3.8 Frequency 3.9 Impedance 3.10 Conductance 3.11 Capacitance 3.12 Displacement 3.13 Inside diameter 3.14 Circumference 3.15 Length 3.16 Thickness 3.17 Outside diameter 3.18 Taper

Critical aspects of competency	Assessment requires that the candidate: 1.1 Selected and prepared appropriate measuring instruments in accordance with job requirements 1.2 Performed measurements and calculations according to job requirements/ ISO
2. Underpinning knowledge	 2.1 TRADE MATHEMATICS / MENSURATION Four fundamental operation Linear measurement Dimensions Unit conversion Ratio and proportion Trigonometric functions Algebraic equations
3. Underpinning skills	 3.1 Performing calculation by addition, subtraction, multiplication and division; trigonometric functions and algebraic equations 3.2 Visualizing objects and shapes 3.3 Interpreting formulas for volume, areas, perimeters of plane and geometric figures 3.4 Proper handling of measuring instruments
4. Resource implications	The following resources should be provided: 4.1 Workplace location 4.2 Problems to solve 4.3 Measuring instrument appropriate to carry out tasks 4.4 Instructional materials relevant to the propose activity Assessment of Underpinning knowledge and attitudeand practical skills may be combined
5. Method of assessment	Competency should be assessed through: 5.1 Actual demonstration 5.2 Direct observation 5.3 Written test/questioning related to underpinning knowledge
6. Context of assessment	 6.1 Competency assessment may occur in workplace or any appropriate simulated environment 6.2 Assessment shall be observed while task are being undertaken whether individually or in group 6.3 Competency assessment must be undertaken in accordance with the TESDA assessment guidelines

UNIT OF COMPETENCY: MANTAIN TOOLS AND EQUIPMENT

UNIT CODE : CON311204

UNIT DESCRIPTOR

: This unit covers the knowledge, skills and attitudes on checking condition, performing preventive maintenance and storing of tools and equipment based on the required performance standards.

ELEMENT	PERFORMANCE CRITERIA Italicized terms are elaborated in the Range of Variables
Check condition of tools and equipment	 1.1 <i>Materials, tools and equipmen</i>t are identified according to classification and job requirements 1.2 Non-functional tools and equipment are segregated and labeled according to classification 1.3 Safety of tools and equipment are observed in accordance with manufacturer's instructions 1.4 Condition of <i>PPE</i> are checked in accordance with manufacturer's instructions
Perform basic preventive maintenance	 2.1 Appropriate lubricants are identified according to types of equipment 2.2 Tools and equipment are lubricated according to preventive maintenance schedule or manufacturer's specifications 2.2 Measuring instruments are checked and calibrated in accordance with manufacturer's instructions 2.4 Tools are cleaned and lubricated according to standard procedures 2.4 Defective instruments, equipment and accessories are inspected and replaced according to manufacturer's specifications 2.6 Tools are inspected, repaired and replaced after use 2.7 Work place is cleaned and kept in safe state in line with OHSA regulations
3. Store tools and equipment	3.1 Inventory of tools, instruments and equipment are conducted and recorded as per company practices 3.3 Tools and equipment are stored safely in appropriate locations in accordance with manufacturer's specifications or company procedures

VARIABLES	RANGE
1. Materials	Including but not limited to: 1.1 Lubricants 1.2 Cleaning materials 1.3 Rust remover 1.4 Rugs 1.5 Spare parts
2. Tools and equipment	Including but not limited to: 2.1 Tools - Cutting tools - hacksaw, crosscut saw, rip saw - Boring tools - auger, brace, grinlet, hand drill - Holding tools - vise grip, C-clamp, bench vise - Threading tools - die and stock, taps 2.2 Measuring instruments/equipment
3. PPE	Including but not limited to: 3.1 Goggles 3.2 Gloves 3.3 Safety shoes 3.4 Aprons/Coveralls
4. Forms	 4.1 Maintenance schedule forms 4.2 Requisition slip 4.3 Inventory Form 4.4 Inspection Form 4.5 Procedures

EVIDENCE GUIDE

Critical aspects of competency	Assessment requires that the candidate: 1.1 Selected and used appropriate processes, tools and equipment to carry out task 1.2 Identified functional and non-functional tools and equipment 1.3 Checked, lubricated and calibrated tools, equipment and instruments according to manufacturer's specifications 1.4 Replaced defective tools, equipment and their accessories 1.5 Observed and applied safe handling of tools and equipment and safety work practices 1.6 Prepared and submitted inventory report, where applicable 1.7 Maintained workplace in accordance with OHSA regulations 1.8 Stored tools and equipment safely in appropriate locations and in accordance with company practices
2. Underpinning knowledge	 2.1 SAFETY PRACTICES Use of PPE Handling of tools and equipment Good housekeeping 2.2 MATERIALS, TOOLS AND EQUIPMENT Types and uses of lubricants Types and uses of cleaning materials Types and uses of measuring instruments and equipment 2.3 PREVENTIVE MAINTENANCE Methods and techniques Procedures
3. Underpinning skills	 3.1 Preparing maintenance materials, tools and equipment 3.2 Proper handling of tools and equipment 3.3 Performing preventive maintenance 3.4 Following instructions
4. Resource implications	The following resources should be provided: 4.1 Workplace 4.2 Maintenance schedule 4.3 Maintenance materials, tools and equipment relevant to the proposed activity/task
5. Method of assessment	Competency should be assessed through: 5.1 Direct observation 5.2 Written test/questioning relevant to Underpinning knowledge
6. Context of assessment	6.1 Competency assessment may occur in workplace or any appropriate simulated environment6.2 Competency assessment must be undertaken in accordance with the endorsed TESDA assessment guidelines

CORE COMPETENCIES

UNIT OF COMPETENCY: PERFORM PV SYSTEM DIAGNOSIS

UNIT CODE CON724329

This unit covers the skills, knowledge and attitude in diagnosis of perceived system trouble(s) based on customer complaint. **UNIT DESCRIPTOR**

ELEMENT	PERFORMANCE CRITERIA Italicized terms are elaborated in the Range of Variables
Prepare for troubleshooting activities	 1.1 Sequence of troubleshooting activities outlined in accordance with the maintenance manual and customer complaint 1.2 Tools, measuring instruments, and materials are selected in accordance with job order requirements 1.3 Personal protective equipment is prepared in line with job order requirement
Verify customer's complaint	 2.1 Customer interviewed based on <i>Troubleshooting Checklist</i> 2.2 <i>System</i> components are checked using isolation technique based on <i>maintenance procedures</i> 2.3 Task is performed without causing damage to the <i>components</i>, tools, or equipment and injury to self and others.

RANGE OF VARIABLES

Checklist	3.1 Mode of failure
Oricokiist	3.2 Total Shutdown
	3.3 Decreased Capacity
	3.4 Intermittent Power
	3.5 No Output
	3.6 Time of failure and frequency
	3.7 When was the last Maintenance procedure conducted
	3.8 Activities/Usage prior to failure
	3.9 Significant events prior to breakdown
	3.10 Lightning Storm
	3.11Long rainy days
	3.12 Cloudy days

TR – PV Systems Servicing NC III

	VARIABLE	RANGE
4.	System	4.1 DC Only 4.2 AC/DC 4.3 AC Only
5.	Maintenance procedure	5.1 Refilling of Electrolyte 5.2 Cleaning of Battery terminal 5.3 Clearing of PV module 5.4 Cleaning of check boxes and raceways 5.5 Cleaning of wires/cables 5.6 Check and cleaning of lighting fixtures and accessories 5.7 Checking fastening fixtures 5.8 Checking and cleaning other photovoltaic system components
6.	Components	6.1 Grounding system 6.2 Mounting structure 6.3 PV module/array 6.4 Battery/battery banks 6.5 Charge controller/regulator 6.6 Inverter 6.7 Wires/cables and accessories 6.8 Lighting fixtures and accessories 6.9 Other electrical loads

EVIDENCE GUIDE

Critical aspects of competency	Assessment requires evidence that the candidate performed: 1.1 Diagnosed PV system 1.2 Prepared troubleshooting activities 1.3 Verified customer's complaints 1.4 Prepared troubleshooting checklist form 1.5 Prepared maintenance procedure 1.6 Prepared tools, measuring instrument, spare parts, and supplies
Underpinning knowledge and attitude	 2.1 PV Technology and Systems 2.2 Interpretation of system problem 2.3 Diagnostic procedures 2.4 Isolation technique procedure 2.5 Philippine Electrical Codes and standards 2.6 Schematic diagrams 2.7 Knowledge of tools, measuring instrument, spare parts, and supplies 2.8 Tracing circuit 2.9 Awareness of PPE 2.10Observant/Attentive to details 2.11Patient 2.12Honest 2.13Courteous
3. Underpinning skills	 3.1 Execution of diagnostic procedures 3.2 Ability to perform isolation technique 3.3 Application of codes and standards 3.4 Reading and interpretation of codes, circuit schematic diagrams, symbols, and notations 3.5 Ability to trace circuits 3.6 Proficiency in usage of tools, measuring instruments, spare parts, and supplies 3.7 Use of personal protective equipment 3.8 Economical 3.9 Interpersonal skills 3.10 Communication skills
4. Resource implications	The following resources must be provided: 4.1 Manuals, procedures and codes 4.2 Manufacturer's specifications 4.3 Tools, measuring instruments, and spare parts 4.4 Supplies and materials 4.5 Personal protective equipment (PPE) 4.6 Forms

5. Method of assessment	Competency must be assessed through: 5.1 Observation and demonstration with questioning 5.2 Portfolio 5.3 Written exams
6. Context of assessment	6.1 Competency may be assessed in the workplace or in a simulated workplace6.2 Competency assessment must be undertaken in accordance with the endorsed TESDA assessment guidelines

UNIT OF COMPETENCY: REPAIR PV SYSTEMS

UNIT CODE : CON724330

UNIT DESCRIPTOR : This unit covers the knowledge, skills and attitude in

repairing small solar home systems up to 1kWp

	ELEMENT	PERFORMANCE CRITERIA Italicized terms are elaborated in the Range of Variables
1.	Prepare for service/repair	1.1 Work instructions are read and interpreted to determine job requirements 1.2 <i>Tools, measuring instruments, and materials</i> are prepared in accordance with job order requirements and checked against damage 1.3 Appropriate <i>personal protective equipment (PPE)</i> is used in line with the job order requirement 1.4 Work safety is observed according to industry regulations
2.	Verify / validate diagnosis results	2.1 System components are verified against the previous diagnostic activity 2.2 All components are cleaned and checked based on manufacturer's specs, any malfunctions and deviations are noted 2.3 Safe working practices are observed based on procedures
3.	Repair/replace faulty PV component	3.1 Photovoltaic system components and accessories are repaired/replaced 3.2 Task is performed without causing damage to the components, tools, and/or injury to self and others
4.	Test PV system	 4.1 Tools and measuring instruments are used based on system parameters to be tested 4.2 PV system is checked for any more defects based on procedures 4.3 <i>Rectification</i> of any malfunctions/deficiencies is performed based on set procedures 4.4 PV system parameters are tested to comply within the nominal range 4.5 Safe working practices are observed throughout the task based on safety procedure 4.6 Repair and services are accomplished and recorded in the logbook or accomplishment report form
5.	Debrief Customer	5.1 Causes of PV system faults and effects are explained according to company standard operating procedure 5.2 Preventive measures (do's and don'ts) is recommended based on the diagnosis

EVIDENCE GUIDE

1.	Critical aspects of competency	Assessment requires evidence that the candidate: 1.1 Repaired/replaced PV components as per manufacturer operation's operation/repair manual 1.2 Tested PV system operation according to manufacturer's operation/repair manual and standard operating procedures (SOP) 1.3 Recorded and completed maintenance/service repair/report in accordance with standard operating procedures 1.4 Demonstrated compliance with safety regulations applicable to worksite operations
2.	Underpinning knowledge and attitude	2.1 Safety practices 2.1.1 Personal protective equipment (PPE) 2.1.2 Safe handling of tools and supplies/materials 2.1.3 Safety signs and symbols 2.1.4 Safety hazard 2.1.5 Housekeeping 2.2 Maintenance, Service, and Repair 2.2.1 Preventive Maintenance 2.3 Process Procedure 2.3.1 Electrical control procedure 2.3.2 Repair/replace assemble charge controller/regulator procedure 2.3.3 Repair/replace defective lamp procedure 2.3.4 Replace diode/fuse procedure 2.3.5 Repair/replace switch, receptacle wires, convenience outlet procedure 2.3.6 Maintain/replace battery 2.3.7 Electrical testing procedure 2.3.8 Sort, Straighten, Shine, Systemize and Sustain (5S) procedure 2.3.9 Safety process and procedure 2.3.10 Maintenance procedure 2.3.11 Troubleshooting knowledge 2.3.12 Patient 2.3.13 Honest 2.3.14 Attentive/observant 2.3.15 Frugal
3.	Underpinning skills	 3.1 Reading and interpreting schematic diagrams, specifications and manuals 3.2 Preparing materials/tools/supplies 3.3 Proper use of electrical measuring instruments and materials/supplies 3.4 Electronic test skills 3.5 Troubleshooting technique 3.6 Repairing/replacing defective parts and accessories 3.7 Preparing reports

	3.8 Communication skills 3.9 Interpersonal skills 3.10 Electricity/electronics background 3.11 Installing PV components and accessories 3.12 Electronic testing/calibrating skills 3.13 Battery calibration/maintenance
4. Resource implications	The following resources must be provided: 4.1 Work place or site location 4.2 Materials, tools, and supplies appropriate to repairing processes 4.3 Schematic drawing diagrams and specifications relevant to the task 4.4 Personal protective equipment (PPE) 4.5 Manuals, procedures and codes 4.6 Manufacturer's specifications
5. Method of assessment	Competency must be assessed through: 5.1 Demonstration and observation with questioning 5.2 Interview/oral questioning 5.3 Third party report 5.4 Portfolio
6. Context of assessment	6.1 Competency may be assessed in the workplace or in a simulated workplace 6.2 Competency assessment must be undertaken in accordance with the endorsed TESDA assessment guidelines

UNIT OF COMPETENCY : MONITOR PV SYSTEM OPERATION

UNIT CODE : CON724331

UNIT DESCRIPTOR : This unit covers the skills, knowledge and attitude

in monitoring PV systems.

ELEMENT	PERFORMANCE CRITERIA Italicized terms are elaborated in the Range of Variables
Prepare for monitoring activities	1.1 Sequence of activities outlined in accordance with the monitoring manual 1.2 Monitoring forms are prepared in accordance with job order requirements 1.3 Personal protective equipment is selected in line with job order requirement
2. Check PV System Status	 2.1 PV system parameter is checked based on monitoring procedures using appropriate tools, measuring instruments, and materials. 2.2 Monitoring form is accomplished as per company requirement 2.3 Task is performed without causing damage to the components, tools or electrical measuring instruments and injury to self and others

RANGE OF VARIABLES

VARIABLE	RANGE

3. Components	3.1 Grounding system 3.2 Mounting structure 3.3 PV module/array 3.4 Battery/battery bank 3.5 Charge controller/regulator 3.6 Inverter (if present) 3.7 Wires/cables and accessories 3.8 Loads

EVIDENCE GUIDE

Critical aspectompetency	Assessment requires evidence that the candidate: 1.1 Performed monitoring of PV system operation 1.2 Prepared the monitoring activities 1.3 Checked the PV system status
Underpinning knowledge a attitude	
3. Underpinning skills	3.1 Proficiency in usage of tools, materials, supplies 3.2 Familiarity with PV systems and components 3.3 Use of personal protective equipment
4. Resource implications	The following resources must be provided: 4.1 Manuals, procedures, and codes 4.2 Tools, electrical measuring materials 4.3 Supplies and materials 4.4 Personal protective equipment (PPE) 4.5 Forms 4.6 Paper and pen
5. Method of assessment	Competency must be assessed through: 5.1 Demonstration and observation with questioning 5.2 Written and oral exams 5.3 Third party report 5.4 Portfolio
6. Context of assessment	6.1 Competency may be assessed in the workplace or in a simulated workplace 6.2 Competency assessment must be undertaken in accordance with the endorsed TESDA assessment guidelines

SECTION 3 TRAINING STANDARDS

3.1 CURRICULUM DESIGN

Course Title: PV Systems Servicing NC Level: NC III

Nominal Training Duration: 158 hours

20 hrs – Basic Competencies 72 hrs – Common Competencies 66 hrs – Core Competencies

Course Description:

The course is designed to enhance the knowledge, skills and desirable attitudes of a PV systems service technician to perform PV system maintenance, troubleshooting, and repair of small solar home systems up to 1kWp based on customer complaint in accordance with industry standards. Specifically, it covers core competencies such Perform PV System Diagnosis, Repair of PV System and Monitor PV System Operation.

Basic competencies such as: Lead workplace communication; Lead small teams; Develop and practice negotiation skills; Solve problems related to work activities; Use mathematical concepts and techniques and Use relevant technologies are included.

It also include common competencies such as; Prepare construction materials and tools; Perform mensuration and calculation; Maintain tools and equipment; Observe procedures, specifications and manuals of instructions and Interpret technical drawings and plans.

BASIC COMPETENCIES 20 hrs

	Unit of Competency	Learning Outcomes	Methodology	Assessment Approach
1.	Lead workplace communication	1.1 Communicate information about workplace processes.1.2 Lead workplace discussions.1.3 Identify and communicate issues arising in the workplace	 Group discussion Role Play Brainstorming	ObservationInterviews
2.	Lead small teams	 2.1 Provide team leadership. 2.2 Assign responsibilities among members. 2.3 Set performance expectation for team members. 2.4 Supervise team performance 	LectureDemonstrationSelf-paced (modular)Case studies	DemonstrationWritten exam
3.	Develop and practice negotiation skills	3.1 Identify relevant information in planning negotiations 3.2 Participate in negotiations 3.3 Document areas for agreement	LecturetteRole playingPractical exercises	Written test Demonstration

4. Solve workplace problem related to work activities	4.1 Explain the analytical techniques.4.2 Identify the problem.4.3 Determine the possible cause/s of the problem.	Direct observationSimulation/role playingCase studies	Written test Practical/ performance test
5. Use mathematical concepts and techniques	5.1Identify mathematical tools and techniques to solve problem 5.2Apply mathematical procedures/solution 5.3Analyze results	 Lecturette Self-pace Group discussion Practical Work Approach Research study 	Written testDemonstrationOral Interview
6. Use relevant technologies	6.1 Study/ select appropriate technology 6.2 Apply relevant technology 6.3 Maintain/enhance relevant technology	LecturetteSelf-paceGroup discussionFilm showing	Written test Interview

COMMON COMPETENCIES 72 hrs

	Unit of Competency	Learning Outcomes	Methodology	Assessment Approach
1.	Prepare construction materials and tools	2.1 Identify materials and tools applicable to a specific construction job 2.2 Request appropriate materials and tools 2.3 Receive and inspect materials	 Lecture- Demonstration Self-paced instruction Group discussion Power Point presentation 	 Oral questioning Direct observation Written / Oral Test
2.	Observe procedures, Specifications and Manuals of Instructions	 2.1 Identify, access, and interpret specification/manual s. 2.2 Apply information in manual. 2.3 Store manuals. 	 Classroom discussion Lecture Self-paced instruction Demonstration 	 Practical exam Oral exam Written test/questioning
3.	Interpret Technical Drawing	3.1 Analyze sign, symbols and data 3.2 Interpret technical drawing and plans 3.3 Apply freehand sketching	DemonstrationClassroom discussionsSelf-paced	 Practical exam Direct observation Written test/questioning

4.	Perform mensurations and calculation	4.1 Select measuring Instruments 4.2 Carry out measurements and calculations	 Lecture- Demonstration Self-paced instruction Group discussion Classroom discussion Actual demonstration 	 Direct observation Oral questioning Written test or examination Actual demonstration
5.	Maintain tools and equipment	5.1 Check condition of tools and equipment 5.2 Perform basic preventive maintenance 5.3 Sharpen edge and tooth cutting tools 5.4 Store tools and equipment	 Lecture- Demonstration Self-paced instruction Group discussion Classroom discussion 	 Direct observation of application of tasks. Oral questioning Written test or examination Practical exam

CORE COMPETENCIES 66 hrs

Unit of Competency	Learning Outcomes	Methodology	Assessment Approach
Perform PV System Diagnosis	1.1 Prepare for PV system diagnosis1.2 Verify Customer Complaints	 Lecture- demonstration Self-paced instruction Case study Group discussion 	 Direct observation with questions Demonstration with questions Oral/written examination
2. Repair PV Systems	2.1 Prepare for service/repair 2.2 Verify / validate diagnosis results 2.3 Repair/replace faulty PV component 2.4 Test PV system 2.5 Debrief customer	 Lecture- demonstration Self-paced instruction Group discussion 	 Direct observation with questions Demonstration with questions Oral/written examination Third party report
3. Monitor PV System Operation	3.1 Prepare monitoring activities 3.2 Check PV system status	 Lecture- demonstration Self-paced instruction Group discussion Case study 	 Observation with questioning Oral/written examination Demonstration with questions

3.2 TRAINING DELIVERY

The delivery of training should adhere to the design of the curriculum. Delivery should be guided by the 10 basic principles of the competency-based TVET.

- The training is based on curriculum developed from the competency standards;
- Learning is modular in its structure;
- Training delivery is individualized and self-paced;
- Training is based on work that must be performed;
- Training materials are directly related to the competency standards and the curriculum modules:
- Assessment is based in the collection of evidence of the performance of work to the industry required standard;
- Training is based both on and off-the-job components;
- Allows for recognition of prior learning (RPL) or current competencies;
- Training allows for multiple entry and exit; and
- Approved training programs are nationally accredited.

The competency-based TVET system recognizes various types of delivery modes, both on and off-the-job as long as the learning is driven by the competency standards specified by the industry. The following training modalities may be adopted when designing training programs:

- The dualized mode of training delivery is preferred and recommended.
 Thus programs would contain both in-school and in-industry training or
 fieldwork components. Details can be referred to the Dual Training
 System (DTS) Implementing Rules and Regulations.
- Modular/self-paced learning is a competency-based training modality wherein the trainee is allowed to progress at his own pace. The trainer only facilitates the training delivery.
- Peer teaching/mentoring is a training modality wherein fast learners are given the opportunity to assist the slow learners.
- Supervised industry training or on-the-job training is an approach in training designed to enhance the knowledge and skills of the trainee through actual experience in the workplace to acquire a specific competencies prescribed in the training regulations.
- Distance learning is a formal education process in which majority of the instruction occurs when the students and instructors are not in the same place. Distance learning may employ correspondence study, or audio, video or computer technologies.

3.3 TRAINEE ENTRY REQUIREMENTS

The trainees who wish to enter the course should possess the following requirements:

- Have undergone training on PV Systems Installation National Certificate Level II
- Can communicate both oral and in written
- Must be physically and mentally fit to undergo training
- At least 18 yrs old

This list does not include specific institutional requirements such as educational attainment, appropriate work experience, and others that may be required of the trainees by the school or training center delivering the TVET program.

3.4 LIST OF TOOLS, EQUIPMENT, AND MATERIALS

Recommended list of tools, equipment, and materials for the training of 25 trainees for PV Servicing NC III:

	TOOLS	E	QUIPMENT	M	IATERIAL
Qty.	Description	Qty.	Description	Qty.	Description
12 sets	Screwdrivers	5 pcs	Clamp meter	2 rolls	Wire AWG #12 PDX
12 sets	Pliers (Electrician's, Long nose, & side cutter)	25 pcs	Multimeter	2 rolls	Wire AWG #12 Royal cord
12 sets	Combination wrenches (open and box with sizes ranging from 6mm to 14 mm)	25 pcs	Hydrometer	2 rolls	Wire AWG #14 PDX
12 pcs	Electrician's knife	5 pcs	Battery	2 rolls	Wire AWG #14 Royal cord
25 pcs	Magnetic compass	5 pcs	Controller	1 box	Connectors
5 pcs	Spirit level	5 pcs	PV module	1 box	Clamps
10 pcs	Soldering Tool	10 pcs	Lighting fixtures/ loads	5 rolls	Electrical tape
		5 pcs	Battery box	1 pack	Battery grease
		5 sets	Support structures	1 box	Fuse
				1 box	Diodes
				5 boxes	Staple wires,
				5 bottles	Distilled water
				5 pcs	Reference books

3.5 TRAINING FACILITIES

Based on class size of 25 students/trainees the space requirements for the teaching/learning and circulation areas are as follows:

TEACHING/LEARNING AREAS	SIZE IN METERS	AREA IN SQ. METERS	TOTAL AREA IN SQ. METERS
Lecture/Demo Area	6 x 5	30	30
Laboratory Area	8 x 8	64	64
Learning Resource Area	3 x 5	15	15
Wash, Toilet, & Locker Room	3 x 5	15	15
Circulation**			33
Total Area			157

^{**} Area requirement is equivalent to 30% of the total teaching/learning areas

3.6 TRAINER QUALIFICATIONS (TQ)

PV SYSTEMS SERVICING NC III

- Must be a holder of PV Systems Servicing NC III
- Must have undergone Training Methodology (TM II) or its equivalent¹
- Must be computer literate
- Must be physically and mentally fit
- Have at least 2 years job/ industry experience²
- Must be a civil-service eligible or holder of appropriate professional license issued by the Professional Regulatory Commission (for government positions only)
 - This shall be changed to ":Must be a holder of Trainer Qualification Level II (TQII) or equivalent" upon promulgation by the TESDA Board of the TQ/AQ training regulations
 - ² Optional. Only when required by the hiring institution

Reference: TESDA Board Resolution No. 2004 03

3.7 INSTITUTIONAL ASSESSMENT

Institutional assessment is undertaken by trainees to determine their achievement of units of competency. A certificate of achievement is issued for each unit of competency.

SECTION 4: NATIONAL ASSESSMENT AND CERTIFICATION ARRANGEMENTS

- 4.1 To attain the National Qualification of **PV SYSTEMS SERVICING NC III**, the candidate must demonstrate in all the units listed in Section 1. Successful candidates shall be awarded a **National Certificate III** signed by the TESDA Director General.
- 4.2 The qualification of **PV SYSTEMS SERVICING NC III** may be attained through demonstration of competence through a single comprehensive project-type assessment covering all required units of competency of the qualification.

4.2.1. Service PV Systems

- Perform PV System Diagnosis
- Repair of PV System
- Monitor PV System Operation
- 4.3 Assessment shall focus on the core units of competency. The basic and common units shall be integrated or assessed concurrently with the core units.
- 4.4 The following are qualified to apply for assessment and certification:
 - 4.4.1. Graduate of formal, non-formal, and informal including enterprise-based training programs.
 - 4.4.2. Experienced workers (wage employed or self employed)
- 4.5 The guidelines on assessment and certification are discussed in detail in the "Procedures Manual on Assessment and Certification" and "Guidelines on the Implementation of the Philippine TVET Qualification and Certification System (PTQCS)".

COMPETENCY MAP (CONSTRUCTION SECTOR-ELECTRICAL SUB-SECTOR)

PV SYSTEMS SERVICING NC III

ANNEX A

CIES								
COMPETENCIES	Perform Site Assessment	Check PV Components /Materials Compliance	Install PV system	Perform PV System Testing and Commissioning	Requirements	Determine Customer Requirement	Calculate System Component Requirement	ts
	Specify Components in Bill of Materials	Prepare Installation Drawings	Perform PV System Diagnosis	Repair PV System	Monitor PV System Operation			
SES								
COMPETENCIES	Prepare construction materials and	Observe procedures, specifications	Perform mensuration and calculations	Maintain tools and equipment	Interpret technical drawings and			
S	Receive and respond to	Work with others	Demonstrate work values	Participate in workplace communication	Work in team	Practice career	Practice occupational health and safety procedures	Practice basic housekeeping
BASIC	Lead workplace communication	Lead small	Develop and practice negotiation skills	Solve problems related to work	Use mathematical method	Use relevant technologies	Utilize specialized communication	Develop team
8	Apply problem	Collect, analyze		Promote

techniques to

PV Systems Servicing NC III

DEFINITION OF TERMS

- 1. **Photovoltaic (PV)** a technology that uses a solar module in order to convert light or energy from the sun to electricity
- 2. **PV Module** a device composed of solar cells that convert light or energy from the sun to electricity.
- 3. **PV Panel** a group of PV modules connected in series and/or parallel in a single support structure
- 4. **PV Array** a group of PV modules connected in series and/or parallel in different support structures
- 5. **Load** are devices such as lighting fixtures, appliances, or the likes that requires electricity
- 6. **Battery** a device that stores electricity typically rated in Ampere-hours. For PV systems in the Philippines, car batteries are commonly used.
- 7. **Controller** an electronic device used to cut off charging to the battery when the battery is full and to disconnect the battery from the load when the battery charge is getting low
- 8. **Direct current** unidirectional flow of electricity, usually type of power being stored in batteries
- 9. **Alternating current** current that periodically changes its magnitude and direction, commonly derived directly from the grid-connected power sources
- Functional Test test procedures being done on the different PV components based on their rated operating ranges such as controller set-points, battery voltage, Voc and Isc of PV modules.
- 11. **Controller Set-points** the maximum and minimum settings that corresponds to the predetermined depth of discharge and maximum charge of a battery
- 12. **Maximum depth of discharge** is the state of charge of a battery that will provide maximum life cycles before it needs replacement
- 13. **Commissioning** the process in which a machine or system is put in operation
- 14. **Installation data sheet** record or document of information containing the final installation lay-out and system specification
- 15. **Power** the delivery of energy typically measured in Watts
- 16. **Energy** actual work done by the electricity, typically measured in Watt-hours

- 17. **Parallel connection** connecting the positives together and separately to connect the negatives together
- 18. **Series connection** connecting the positives of one source to the negative of another
- 19. **Certification** is the process of verifying and validating the competencies of a person through assessment
- 20. **Certificate of Competency (COC)** is a certification issued to individuals who pass the assessment for a single unit or cluster of units of competency
- 21. **Common Competencies** are the skills and knowledge needed by all people working in a particular industry
- 22. **Competency** is the possession and application of knowledge, skills and attitudes to perform work activities to the standard expected in the workplace
- 23. **Competency Assessment** is the process of collecting evidence and making judgments on whether competency has been achieved
- 24. **Competency Standard (CS)** is the industry-determined specification of competencies required for effective work performance
- 25. **Context for assessment** refers to the place where assessment is to be conducted or carried out
- 26. **Core Competencies** are the specific skills and knowledge needed in a particular area of work industry sector/occupation/job role
- 27. **Critical aspects of competency** refers to the evidence that is essential for successful performance of the unit of competency
- 28. **Elective Competencies** are the additional skills and knowledge required by the individual or enterprise for work
- 29. **Elements** are the building blocks of a unit of competency. They describe in outcome terms the functions that a person performs in the workplace.
- 30. **Evidence Guide** is a component of the unit of competency that defines or identifies the evidences required to determine the competence of the individual. It provides information on Critical aspects of competency, underpinning knowledge, Underpinning skills, Resource implications, assessment method and Context for assessment
- 31. Level refers to the category of skills and knowledge required to do a job
- 32. **Method of Assessment** refers to the ways of collecting evidence and when, evidence should be collected

- 33. **National Certificate (NC)** is a certification issued to individuals who achieve all the required units of competency for a national qualification defined under the Training Regulations. NCs are aligned to specific levels within the PTQF
- 34. **Performance Criteria** are evaluative statements that specify what is to be assessed and the required level of performance
- 35. **Qualification** is a cluster of units of competencies that meet job roles and are significant in the workplace. It is also a certification awarded to a person on successful completion of a course in recognition of having demonstrated competencies in an industry sector
- 36. **Range of Variables** describes the circumstances or context in which the work is to be performed
- 37. **Recognition of Prior Learning (RPL)** is the acknowledgement of an individual's skills, knowledge and attitudes gained from life and work experiences outside registered training programs
- 38. **Resource implications** refers to the resources needed for the successful performance of the work activity described in the unit of competency. It includes work environment and conditions, materials, tools and equipment
- 39. Basic Competencies are the skills and knowledge that everyone needs for work
- 40. Training Regulations (TR) refers to the document promulgated and issued by TESDA consisting of competency standards, national qualifications and training guidelines for specific sectors/occupations. The TR serve as basis for establishment of qualification and certification under the PTQF. It also serves as guide for development of competency-based curricula and instructional materials including registration of TVET programs offered by TVET providers
- 41. **Underpinning knowledge and attitude** refers to the competency that involves in applying knowledge to perform work activities. It includes specific knowledge that is essential to the performance of the competency
- 42. **Underpinning skills** refers to the list of the skills needed to achieve the elements and performance criteria in the unit of competency. It includes generic and industry specific skills
- 43. **Unit of Competency** is a component of the competency standards stating a specific key function or role in a particular job or occupation; it is the smallest component of achievement that can be assessed and certified under the PTQF

ACKNOWLEDGEMENTS

The Technical Education and Skills Development Authority (TESDA) wishes to extend thanks and appreciation to the many representatives of business, industry, academe and government agencies who donated their time and expertise to the development and validation of this Training Regulations.
