DEFINITION OF TERMS

ACKNOWLEDGMENTS

TRAINING REGULATIONS FOR

HEAVY EQUIPMENT OPERATION - ROUGH-TERRAIN CRANE

SECTION 1 HEAVY EQUIPMENT OPERATION - ROUGH-TERRAIN CRANE

The **HEAVY-EQUIPMENT OPERATION (ROUGH-TERRAIN CRANE) NC II** qualification consists of competencies that workers must achieve to enable them to perform tasks such as lifting and transferring of heavy loads in construction sites or other locations with the use of a rough-terrain crane (with telescopic or lattice booms).

This qualification is packaged from the competency map of Construction - Heavy Equipment sub-sector as shown in Annex A.

The units of competency comprising this qualification include the following:

CODE NO. BASIC COMPETENCIES

Units of Competency

- 500311105 Participate in workplace communication
- 500311106 Work in a team environment
- 500311107 Practice career professionalism
- 500311108 Practice occupational health and safety procedures

CODE NO. COMMON COMPETENCIES

Units of Competency

- CON931201 Prepare construction materials and tools
- CON311201 Observe procedures, specifications and manuals of instruction
- CON311202 Interpret technical drawings and plans
- CON311203 Perform mensurations and calculations
- CON311204 Maintain tools and equipment

CODE NO. CORE COMPETENCIES

- CON833309 Perform pre- and post-operation procedures for lifting equipment
- CON833310 Perform basic preventive-maintenance servicing for lifting equipment
- CON833311 Perform productive operation for rough-terrain crane

A person who has achieved this Qualification is competent to be a -

Rough-terrain crane operator.

SECTION 2 COMPETENCY STANDARDS

This section gives the details and contents of the units of competency required in HEAVY EQUIPMENT OPERATION (ROUGH-TERRAIN CRANE) NC II. These units of competency are categorized into basic, common and core competencies.

BASIC COMPETENCIES

UNIT OF COMPETENCY:	PARTICIPATE IN WORKPLACE COMMUNICATION
UNIT CODE :	500311105
UNIT DESCRIPTOR :	This unit covers the knowledge, skills and attitudes required to gather, interpret and convey information in response to workplace requirements.

	PERFORMANCE CRITERIA
ELEMENT	Italicized terms are elaborated in the Range of Variables
1. Obtain and convey	1.1 Specific and relevant information is accessed from
workplace	appropriate sources
information	1.2 Effective questioning , active listening and speaking skills are used to gather and convey information
	1.3 Appropriate <i>medium</i> is used to transfer information and ideas
	1.4 Appropriate non- verbal communication is used
	1.5 Appropriate lines of communication with supervisors and colleagues are identified and followed
	1.6 Defined workplace procedures for the location and <i>storage</i> of
	information are used
	1.7 Personal interaction is carried out clearly and concisely
2. Participate in	2.1 Team meetings are attended on time
workplace	2.2 Own opinions are clearly expressed and those of others are
meetings and	listened to without interruption
discussions	2.3 Meeting inputs are consistent with the meeting purpose and established <i>protocols</i>
	2.4 <i>Workplace interactions</i> are conducted in a courteous manner
	2.5 Questions about simple routine workplace procedures and maters concerning working conditions of employment are asked and responded to
	2.6 Meetings outcomes are interpreted and implemented

3. Complete relevant work related	3.1 Range of <i>forms</i> relating to conditions of employment are completed accurately and legibly
documents	3.2 Workplace data is recorded on standard workplace forms and documents
	3.3 Basic mathematical processes are used for routine calculations
	3.4 Errors in recording information on forms/ documents are identified and properly acted upon
	3.5 Reporting requirements to supervisor are completed according to organizational guidelines

VARIABLE	RANGE
1. Appropriate sources	1.1. Team members1.2. Suppliers1.3. Trade personnel1.4. Local government1.5. Industry bodies
2. Medium	 2.1. Memorandum 2.2. Circular 2.3. Notice 2.4. Information discussion 2.5. Follow-up or verbal instructions 2.6. Face to face communication
3. Storage	3.1. Manual filing system3.2. Computer-based filing system
4. Forms	4.1. Personnel forms, telephone message forms, safety reports
5. Workplace interactions	 5.1. Face to face 5.2. Telephone 5.3. Electronic and two way radio 5.4. Written including electronic, memos, instruction and forms, non-verbal including gestures, signals, signs and diagrams
6. Protocols	6.1. Observing meeting6.2. Compliance with meeting decisions6.3. Obeying meeting instructions

1. Critical Aspects of Competency	 Assessment requires evidence that the candidate: 1.1. Prepared written communication following standard format of the organization 1.2. Accessed information using communication equipment 1.3. Made use of relevant terms as an aid to transfer information effectively 1.4. Conveyed information effectively adopting the formal or informal communication
2. Underpinning Knowledge and Attitudes	 2.1. Effective communication 2.2. Different modes of communication 2.3. Written communication 2.4. Organizational policies 2.5. Communication procedures and systems 2.6. Technology relevant to the enterprise and the individual's work responsibilities
3. Underpinning Skills	 3.1. Follow simple spoken language 3.2. Perform routine workplace duties following simple written notices 3.3. Participate in workplace meetings and discussions 3.4. Complete work related documents 3.5. Estimate, calculate and record routine workplace measures 3.6. Basic mathematical processes of addition, subtraction, division and multiplication 3.7. Ability to relate to people of social range in the workplace 3.8. Gather and provide information in response to workplace Requirements
4. Resource Implications	4.1. Fax machine4.2. Telephone4.3. Writing materials4.4. Internet
5. Methods of Assessment	5.1. Direct Observation5.2. Oral interview and written test
6. Context of Assessment	6.1. Competency may be assessed individually in the actual workplace or through accredited institution

UNIT OF COMPETENCY:	WORK IN TEAM ENVIRONMENT
UNIT CODE :	500311106
UNIT DESCRIPTOR :	This unit covers the skills, knowledge and attitudes to
	identify role and responsibility as a member of a team.

ELEMENT	PERFORMANCE CRITERIA Italicized terms are elaborated in the Range of Variables
1. Describe team role and scope	 1.1. The <i>role and objective of the team</i> is identified from available <i>sources of information</i> 1.2. Team parameters, reporting relationships and responsibilities are identified from team discussions and appropriate external sources
2. Identify own role and responsibility within team	 2.1. Individual role and responsibilities within the team environment are identified 2.2. Roles and responsibility of other team members are identified and recognized 2.3. Reporting relationships within team and external to team are identified
3. Work as a team member	 3.1. Effective and appropriate forms of communications used and interactions undertaken with team members who contribute to known team activities and objectives 3.2. Effective and appropriate contributions made to complement team activities and objectives, based on individual skills and competencies and <i>workplace context</i> 3.3. Observed protocols in reporting using standard operating procedures 3.4. Contribute to the development of team work plans based on an understanding of team's role and objectives and individual competencies of the members.

VARIABLE	RANGE
1. Role and objective of team	 1.1. Work activities in a team environment with enterprise or specific sector 1.2. Limited discretion, initiative and judgement maybe demonstrated on the job, either individually or in a team environment
2. Sources of information	 2.1. Standard operating and/or other workplace procedures 2.2. Job procedures 2.3. Machine/equipment manufacturer's specifications and instructions 2.4. Organizational or external personnel 2.5. Client/supplier instructions 2.6. Quality standards 2.7. OHS and environmental standards
3. Workplace context	 3.1. Work procedures and practices 3.2. Conditions of work environments 3.3. Legislation and industrial agreements 3.4. Standard work practice including the storage, safe handling and disposal of chemicals 3.5. Safety, environmental, housekeeping and quality guidelines

1. Critical aspects of competency	Assessment requires evidence that the candidate: 1.1. Operated in a team to complete workplace activity 1.2. Worked effectively with others 1.3. Conveyed information in written or oral form 1.4. Selected and used appropriate workplace language 1.5. Followed designated work plan for the job 1.6. Reported outcomes
2. Underpinning Knowledge and Attitude	2.1. Communication process2.2. Team structure2.3. Team roles2.4. Group planning and decision making
3. Underpinning Skills	3.1. Communicate appropriately, consistent with the culture of the workplace
4. Resource Implications	 The following resources MUST be provided: 4.1. Access to relevant workplace or appropriately simulated environment where assessment can take place 4.2. Materials relevant to the proposed activity or tasks
5. Methods of Assessment	 Competency may be assessed through: 5.1. Observation of the individual member in relation to the work activities of the group 5.2. Observation of simulation and or role play involving the participation of individual member to the attainment of organizational goal 5.3. Case studies and scenarios as a basis for discussion of issues and strategies in teamwork
6. Context for Assessment	 6.1. Competency may be assessed in workplace or in a simulated workplace setting 6.2. Assessment shall be observed while task are being undertaken whether individually or in group

UNIT OF COMPETENCY:	PRACTICE CAREER PROFESSIONALISM
UNIT CODE :	500311107
UNIT DESCRIPTOR :	This unit covers the knowledge, skills and attitudes in
	promoting career growth and advancement.

ELEMENT 1. Integrate personal objectives with organizational goals	PERFORMANCE CRITERIA Italicized terms are elaborated in the Range of Variables 1.1 Personal growth and work plans are pursued towards improving the qualifications set for the profession 1.2 Intra- and interpersonal relationships is are maintained in the course of managing oneself based on performance evaluation 1.3 Commitment to the organization and its goal is demonstrated in the performance of duties
2. Set and meet work priorities	 2.1 Competing demands are prioritized to achieve personal, team and organizational goals and objectives. 2.2 <i>Resources</i> are utilized efficiently and effectively to manage work priorities and commitments 2.3 Practices along economic use and maintenance of equipment and facilities are followed as per established procedures
3. Maintain professional growth and development	 3.1 <i>Trainings and career opportunities</i> are identified and availed of based on job requirements 3.2 <i>Recognitions</i> are -sought/received and demonstrated as proof of career advancement 3.3 <i>Licenses and/or certifications</i> relevant to job and career are obtained and renewed

VARIABLE	RANGE
1. Evaluation	1.1 Performance Appraisal1.2 Psychological Profile1.3 Aptitude Tests
2. Resources	 2.1 Human 2.2 Financial 2.3 Technology 2.3.1 Hardware 2.3.2 Software
3. Trainings and career opportunities	 3.1 Participation in training programs 3.1.1 Technical 3.1.2 Supervisory 3.1.3 Managerial 3.1.4 Continuing Education 3.2 Serving as Resource Persons in conferences and workshops
4. Recognitions	 4.1 Recommendations 4.2 Citations 4.3 Certificate of Appreciation 4.4 Commendations 4.5 Awards 4.6 Tangible and Intangible Rewards
5. Licenses and/or certifications	5.1 National Certificates5.2 Certificate of Competency5.3 Support Level Licenses5.4 Professional Licenses

1. Critical Aspects of	Assessment requires evidence that the candidate:
Competency	 1.1 Attained job targets within key result areas (KRAs) 1.2 Maintained intra - and interpersonal relationship in the course of managing oneself based on performance evaluation
	1.3 Completed trainings and career opportunities which are based on the requirements of the industries1.4 Acquired and maintained licenses and/or certifications according to the requirement of the qualification
2. Underpinning Knowledge	 2.1 Work values and ethics (Code of Conduct, Code of Ethics, etc.) 2.2 Company policies 2.3 Company-operations, procedures and standards 2.4 Fundamental rights at work including gender sensitivity 2.4 Personal hygiene practices
3. Underpinning Skills	3.1 Appropriate practice of personal hygiene3.2 Intra and Interpersonal skills3.3 Communication skills
4. Resource Implications	The following resources MUST be provided: 4.1 Workplace or assessment location 4.2 Case studies/scenarios
5. Methods of Assessment	Competency may be assessed through: 5.1 Portfolio Assessment 5.2 Interview 5.3 Simulation/Role-plays 5.4 Observation 5.5 Third Party Reports 5.6 Exams and Tests
6. Context of Assessment	6.1 Competency may be assessed in the work place or in a simulated work place setting

	CY:	PRACTICE OCCUPATIONAL HEALTH AND SAFETY PROCEDURES
UNIT CODE	:	500311108
UNIT DESCRIPTOR	:	This unit covers the outcomes required to comply with regulatory and organizational requirements for occupational health and safety.

ELEMENT	PERFORMANCE CRITERIA Italicized terms are elaborated in the
	Range of Variables
1. Identify hazards and risks	 1.1 Safety regulations and workplace safety and hazard control practices and procedures are clarified and explained based on organization procedures 1.2 Hazards/risks in the workplace and their
	corresponding indicators are identified to minimize or eliminate risk to co-workers, workplace and environment in accordance with organization procedures
	1.3 Contingency measures during workplace accidents, fire and other emergencies are recognized and established in accordance with organization procedures
2. Evaluate hazards and risks	 2.1 Terms of maximum tolerable limits which when exceeded will result in harm or damage are identified based on threshold limit values (TLV) 2.2 Effects of the hazards are determined
	 2.2 Effects of the flazards are determined 2.3 OHS issues and/or concerns and identified safety hazards are reported to designated personnel in accordance with workplace requirements and relevant workplace OHS legislation
3. Control hazards and risks	3.1 Occupational Health and Safety (OHS) procedures for controlling hazards/risks in workplace are consistently followed
	3.2 Procedures for dealing with workplace accidents, fire and emergencies are followed in accordance with organization OHS policies
	3.3 Personal protective equipment (PPE) is correctly used in accordance with organization OHS procedures and practices
	3.4 Appropriate assistance is provided in the event of a workplace emergency in accordance with established organization protocol
TR HEAVY-EQUIPMENT OPERATION (Ro	bugh-Terrain Crane) NC II Promulgated July 2007 Page 14 of 79

TR HEAVY-EQUIPMENT OPERATION (Rough-Terrain Crane) NC II Promulgated July 2007 Page 15 of 79

4. Maintain OHS awareness	 4.1 <i>Emergency-related drills and trainings</i> are participated in as per established organization guidelines and procedures 4.2 <i>OHS personal records</i> are completed and up in accordance with workplace requirements 	ı
---------------------------	---	---

VARIABLE	RANGE
1. Safety regulations	May include but are not limited to: 1.1 Clean Air Act 1.2 Building code 1.3 National Electrical and Fire Safety Codes 1.4 Waste management statutes and rules 1.5 Philippine Occupational Safety and Health Standards 1.6 DOLE regulations on safety legal requirements 1.7 ECC regulations
2. Hazards/Risks	 May include but are not limited to: 2.1 Physical hazards – impact, illumination, pressure, noise, vibration, temperature, radiation 2.2 Biological hazards- bacteria, viruses, plants, parasites, mites, molds, fungi, insects 2.3 Chemical hazards – dusts, fibers, mists, fumes, smoke, gasses, vapors 2.4 Ergonomics 2.4.1 Psychological factors – over exertion/ excessive force, awkward/static positions, fatigue, direct pressure, varying metabolic cycles 2.4.2 Physiological factors – monotony, personal relationship, work out cycle
3. Contingency measures	May include but are not limited to: 3.1 Evacuation 3.2 Isolation 3.3 Decontamination 3.4 (Calling designed) emergency personnel
4. PPE	May include but are not limited to: 4.1 Mask 4.2 Gloves 4.3 Goggles 4.4 Hair Net/cap/bonnet 4.5 Face mask/shield 4.6 Ear muffs 4.7 Apron/Gown/coverall/jump suit 4.8 Anti-static suits

5. Emergency-related dril and training	 Is 5.1 Fire drill 5.2 Earthquake drill 5.3 Basic life support/CPR 5.4 First aid 5.5 Spillage control 5.6 Decontamination of chemical and toxic 5.7 Disaster preparedness/management
6. OHS personal records	6.1 Medical/Health records6.2 Incident reports6.3 Accident reports6.4 OHS-related training completed

1. Critical Aspects of	Assessment requires evidence that the candidate:
Competency	1.1 Explained clearly established workplace safety and
	hazard control practices and procedures
	1.2 Identified hazards/risks in the workplace and its
	corresponding indicators in accordance with company procedures
	1.3 Recognized contingency measures during workplace
	accidents, fire and other emergencies
	1.4 Identified terms of maximum tolerable limits based on threshold limit value- TLV.
	1.5 Followed Occupational Health and Safety (OHS)
	procedures for controlling hazards/risks in workplace
	1.6 Used Personal Protective Equipment (PPE) in
	accordance with company OHS procedures and
	practices
	1.7 Completed and updated OHS personal records in
	accordance with workplace requirements
2. Underpinning	2.1 OHS procedures and practices and regulations
Knowledge and	2.2 PPE types and uses
Attitude	2.3 Personal hygiene practices2.4 Hazards/risks identification and control
	2.5 Threshold Limit Value -TLV
	2.6 OHS indicators
	2.7 Organization safety and health protocol
	2.8 Safety consciousness
	2.9 Health consciousness
3. Underpinning	3.1 Practice of personal hygiene
Skills	3.2 Hazards/risks identification and control skills
	3.3 Interpersonal skills
	3.4 Communication skills
4. Resource Implications	The following resources must be provided:
	4.1 Workplace or assessment location
	4.2 OHS personal records
	4.3 PPE
	4.4 Health records
5. Methods of Assessment	Competency may be assessed through:
	5.1 Portfolio Assessment
	5.2 Interview
	5.3 Case Study/Situation
6. Context for Assessment	6.1 Competency may be assessed in the work place or in a
	simulated work place setting

COMMON COMPETENCIES

UNIT OF COMPETENCY:	PREPARE CONSTRUCTION MATERIALS AND TOOLS	
UNIT CODE :	CON931201	
UNIT DESCRIPTOR :	This unit covers the knowledge, skills and attitudes on identifying, requesting and receiving construction materials and tools based on the required performance standards.	

ELEMENT	PERFORMANCE CRITERIA Italicized terms are elaborated in the Range of Variable
1. Identify materials	 1.1 <i>Materials</i> are listed as per job requirements 1.2 Quantity and <i>description of materials</i> conform with the job requirements 1.3 Tools and accessories are identified according to job requirements
2. Requisition materials	 2.1 Materials and tools needed are requested according to the list prepared 2.2 Request is done as per <i>company standard operating procedures (SOP)</i> 2.3 Substitute materials and tools are provided without sacrificing cost and quality of work
3. Receive and inspect materials	 3.1 Materials and tools issued are inspected as per quantity and specification 3.2 Tools, accessories and materials are checked for damages according to enterprise procedures 3.3 Materials and tools are set aside to appropriate location nearest to the workplace

VARIABLE	RANGE
1. Materials and Tools	1.1 Electrical supplies
	1.2 Structural
	1.3 Plumbing
	1.4 Welding/pipefitting
	1.5 Carpentry
	1.6 Masonry
2. Description of Materials and	2.1 Brand name
Tools	2.2 Size
	2.3 Capacity
	2.4 Kind of application
3. Company standard	3.1 Job order
procedures	3.2 Requisition slip
	3.3 Borrower slip

	EVIDENCE GOIDE		
1. Critical aspects of competency	 Assessment requires evidence that the candidate: 1.1 Listed materials and tools according to quantity and job requirements 1.2 Requested materials and tools according to the list prepared and as per company SOP 1.3 Inspected issued materials and tools as per quantity and job specifications 1.4 Tools provided with appropriate safety devices 		
2. Underpinning knowledge	2.1 Types and uses of construction materials and tools2.2 Different forms2.3 Requisition procedures		
3. Underpinning skills	3.1 Preparing materials and tools3.2 Proper handling of tools and equipment3.3 Following instructions		
4. Resource implications	 The following resources should be provided: 4.1 Workplace location 4.2 Materials relevant to the unit of competency 4.3 Technical plans, drawings and specifications relevant to the activities 		
5. Methods of assessment	Competency in this unit must be assessed through: 5.1 Direct observation and oral questioning		
6. Context of assessment	 6.1 Competency may be assessed in the workplace or in a simulated workplace 6.2 Competency assessment must be undertaken in accordance with the endorsed TESDA assessment guidelines 		

UNIT OF COMPETENCY:	OBSERVE PROCEDURES, SPECIFICATIONS AND MANUALS OF INSTRUCTIONS
UNIT CODE :	CON311201
UNIT DESCRIPTOR :	This unit covers the knowledge, skills and attitudes on identifying, interpreting, applying services to specifications and manuals and storing manuals.

ELEMENT	PERFORMANCE CRITERIA <i>Italicized</i> terms are elaborated in the Range of Variables
 Identify and access specification/manuals 	 1.1 Appropriate manuals are identified and accessed as per job requirements 1.2 Version and date of manual are checked to ensure that correct specification and procedures are identified
2. Interpret manuals	 2.1 Relevant sections, chapters of specifications/ manuals are located in relation to the work to be conducted 2.2 Information and procedure in the manual are interpreted in accordance with industry practices
3. Apply information in manual	 3.1 <i>Manual</i> is interpreted according to job requirements 3.2 Work steps are correctly identified in accordance with manufacturer's specification 3.3 Manual data are applied according to the given task 3.4 All correct sequencing and adjustments are interpreted in accordance with information contained on the manual or specifications
4. Store manuals	4.1 Manual or specification is stored appropriately to prevent damage, ready access and updating of information when required in accordance with company requirements

VARIABLE	RANGE
 Procedures, Specifications and Manuals of Instructions 	 Kinds of Manuals: 1.1 Manufacturer's Specification Manual 1.2 Repair Manual 1.3 Maintenance Procedure Manual 1.4 Periodic Maintenance Manual

1. Critical aspects of competency	 Assessment requires that the candidate: 1.1 Identified and accessed specification/manuals as per job requirements 1.2 Interpreted manuals in accordance with industry practices 1.3 Applied information in manuals according to the given task 1.4 Stored manuals in accordance with company requirements
2. Underpinning knowledge	 2.1 Types of manuals used in construction sector 2.2 Identification of symbols used in the manuals 2.3 Identification of units of measurements 2.4 Unit conversion
3. Underpinning skills	3.1 Reading and comprehension skills required to identify and interpret construction manuals and specifications3.2 Accessing information and data
4. Resource implications	The following resources should be provided:4.1 All manuals/catalogues relative to construction sector
5. Methods of assessment	Competency should be assessed through: 5.1 Direct observation 5.2 Questions/interview Assessment of underpinning knowledge and practical skills may be combined
6. Context of assessment	6.1 Competency assessment must be undertaken in accordance with the endorsed TESDA assessment guidelines6.2 Assessment may be conducted in the workplace or a simulated environment

UNIT OF COMPETENCY: INTERPRET TECHNICAL DRAWINGS AND PLANS	
UNIT CODE :	CON311202
UNIT DESCRIPTOR :	This unit covers the knowledge, skills and attitudes on analyzing and interpreting symbols, data and work plan based on the required performance standards.

ELEMENT	PERFORMANCE CRITERIA Italicized terms are elaborated in the Range of Variables
1. Analyze signs, symbols and data	 1.1 <i>Technical plans</i> are obtained according to job requirements 1.2 Signs, symbols and data are identified according to job specifications 1.3 Signs symbols and data are determined according to <i>classification</i> or as appropriate in <i>drawing</i>
2. Interpret technical drawings and plans	 2.1 Necessary <i>tools, materials</i> and equipment are identified according to the <i>plan</i> 2.2 Supplies and materials are listed according to specifications 2.3 Components, assemblies or objects are recognized as required 2.4 Dimensions are identified as appropriate to the plan 2.5 Specification details are matched with existing/available resources and in line with job requirements 2.6 Work plan is drawn following the specifications
3. Apply freehand sketching	3.1 Where applicable, correct freehand sketching is produced in accordance with the job requirements

VARIABLE	RANGE
1. Technical plans	Including but not limited to: 1.1 Electrical plans 1.2 Structural plans 1.3 Architectural plans 1.4 Plumbing plans 1.5 Welding Procedures Specifications (WPS)
2. Work plan	2.1 Job requirements2.2 Installation instructions2.3 Components instruction
3. Classification	Including but not limited to: 3.1 Electrical 3.2 Mechanical 3.3 Plumbing
4. Drawing	 4.1 Drawing symbols 4.2 Alphabet of lines 4.3 Orthographic views Front view Right side view/left side view Top view Pictorial 4.4 Schematic diagram 4.5 Electrical drawings 4.6 Structural drawings 4.7 Plumbing drawings Water Sewerage/Drainage Ventilation 4.8 Welding symbols
5. Tools and materials	Including but not limited to: 5.1 Compass 5.2 Divider 5.3 Rulers 5.4 Triangles 5.5 Drawing tables 5.6 Computer

	DENCE GUIDE	
1.	Critical aspects of competency	 Assessment requires that the candidate: 1.1 Identified and determined signs, symbols and data according to work plan, job requirements and classifications 1.2 Identified tools and equipment in accordance with job requirements 1.3 Listed supplies and materials according to blueprint specifications 1.4 Drawn workplan following specifications 1.5 Determined job specifications based on working/technical drawing
2.	Underpinning knowledge	 2.1 TRADE MATHEMATICS 2.1.1 Linear measurement 2.1.2 Dimension 2.1.3 Unit conversion 2.2 BLUEPRINT READING AND PLAN SPECIFICATION 2.2.1 Electrical, mechanical plan, symbols and abbreviations 2.2.2 Drawing standard symbols 2.3 TRADE THEORY 2.3.1 Basic technical drawing 2.3.2 Types technical plans 2.3.3 Various types of drawings 2.3.4 Notes and specifications
3.	Underpinning skills	 3.1 Interpreting drawing/orthographic drawing 3.2 Interpreting technical plans 3.3 Matching specification details with existing resources 3.4 Following instructions 3.5 Handling of drawing instruments
4.	Resource implications	 The following resources should be provided: 4.1 Workplace 4.2 Drawings and specification relevant to task 4.3 Materials and instrument relevant to proposed activity
5.	Methods of assessment	Competency should be assessed through: 5.1 Direct observation 5.2 Questions/interview 5.3 Written test related to underpinning knowledge

6. Context of assessment	6.1 Competency assessment may occur in the workplace or in any appropriate simulated environment
	 6.2 Assessment shall be observed while task are being undertaken whether individually or in group 6.3 Competency assessment must be undertaken in accordance with the endorsed TESDA assessment guidelines

UNIT OF COMPETENCY: PERFORM MENSURATIONS AND CALCULATIONS	
UNIT CODE :	CON311203
UNIT DESCRIPTOR :	This unit covers the knowledge, skills and attitudes on identifying and measuring objects based on the required performance standards.

ELEMENT	PERFORMANCE CRITERIA Italicized terms are elaborated in the Range of Variable
1. Select measuring instruments	 1.1 Object or component to be measured is identified, classified and interpreted according to the appropriate regular <i>geometric shape</i> 1.2 Measuring tools are selected/identified as per object to be measured or job requirements 1.3 Correct specifications are obtained from relevant sources 1.4 Appropriate measuring instruments are selected according to job requirements 1.5 Alternative measuring tools are used without sacrificing cost and quality of work
2. Carry out measurements and calculations	 2.1 Accurate <i>measurements</i> are obtained according to job requirements 2.3 Alternative measuring tools are used without sacrificing cost and quality of work 2.4 <i>Calculation</i> needed to complete work tasks are performed using the four basic process of addition (+), subtraction (-), multiplication (x) and division (/) including but not limited to: trigonometric functions, algebraic computations 2.5 Calculations involving fractions, percentages and mixed numbers are used to complete workplace tasks 2.6 Numerical computation is self-checked and corrected for accuracy 2.7 Instruments are read to the limit of accuracy of the tool 2.8 Systems of measurement identified and converted according to job requirements/ISO 2.9 Workpieces are measured according to job requirements

VARIABLE	RANGE
1. Geometric shape	Including but is not limited to: 1.1 Round 1.2 Square 1.3 Rectangular 1.4 Triangle 1.5 Sphere 1.6 Conical
2. Measuring instruments	Including but not limited to: 2.1 Micrometer (In-out, depth) 2.2 Vernier caliper (out, inside) 2.3 Dial gauge with mag, std. 2.4 Straight edge 2.5 Thickness gauge 2.6 Torque gauge 2.7 Small hole gauge 2.8 Telescopic gauge 2.9 Try-square 2.10 Protractor 2.11 Combination gauge 2.12 Steel rule 2.13 Voltmeter 2.14 Ammeter 2.15 Mega-ohmeter 2.16 Kilowatt hour meter 2.17 Gauges 2.18 Thermometers
3. Measurements and calculations	 3.1 Linear 3.2 Volume 3.3 Area 3.4 Wattage 3.5 Voltage 3.6 Resistance 3.7 Amperage 3.8 Frequency 3.9 Impedance

VARIABLE	RANGE
	 3.10 Conductance 3.11 Capacitance 3.12 Displacement 3.13 Inside diameter 3.14 Circumference 3.15 Length 3.16 Thickness 3.17 Outside diameter 3.18 Taper 3.19 Out of roundness 3.20 Oil clearance
	3.21 End play/Thrust clearance

EVIDENCE GUIDE	
1. Critical aspects of competency	 Assessment requires that the candidate: 1.1 Selected and prepared appropriate measuring instruments in accordance with job requirements 1.2 Performed measurements and calculations according to job requirements/ ISO
2. Underpinning knowledge	 2.1 TRADE MATHEMATICS / MENSURATION 2.1.1 Four fundamental operation 2.1.2 Linear measurement 2.1.3 Dimensions 2.1.4 Unit conversion 2.1.5 Ratio and proportion 2.1.6 Trigonometric functions 2.1.7 Algebraic equations
3. Underpinning skills	 3.1 Performing calculation by addition, subtraction, multiplication and division; trigonometric functions and algebraic equations 3.2 Visualizing objects and shapes 3.3 Interpreting formulas for volume, areas, perimeters of plane and geometric figures 3.4 Proper handling of measuring instruments
4. Resource implications	 The following resources should be provided: 4.1 Workplace location 4.2 Problems to solve 4.3 Measuring instrument appropriate to carry out tasks 4.4 Instructional materials relevant to the propose activity Assessment of underpinning knowledge and practical skills may be combined
5. Methods of assessment	Competency should be assessed through: 5.1 Actual demonstration 5.2 Direct observation 5.3 Written test/questioning related to underpinning knowledge
6. Context of assessment	 6.1 Competency assessment may occur in workplace or any appropriate simulated environment 6.2 Assessment shall be observed while task are being undertaken whether individually or in group 6.3 Competency assessment must be undertaken in accordance with the TESDA assessment guidelines

UNIT OF COMPETENCY:		MAINTAIN TOOLS AND EQUIPMENT
UNIT CODE	:	CON311204
UNIT DESCRIPTOR	:	This unit covers the knowledge, skills and attitudes on checking condition, performing preventive maintenance and storing of tools and equipment based on the required performance standards.

ELEMENTS	PERFORMANCE CRITERIA Italicized terms are elaborated in the Range of Variables
 Check condition of tools and equipment 	 1.1 <i>Materials, tools and equipmen</i>t are identified according to classification and job requirements 1.2 Non-functional tools and equipment are segregated and labeled according to classification 1.3 Safety of tools and equipment are observed in accordance with manufacturer's instructions 1.4 Condition of <i>PPE</i> are checked in accordance with manufacturer's instructions
2. Perform basic preventive maintenance	 2.1 Appropriate lubricants are identified according to types of equipment 2.2 Tools and equipment are lubricated according to preventive maintenance schedule or manufacturer's specifications 2.2 Measuring instruments are checked and calibrated in accordance with manufacturer's instructions 2.4 Tools are cleaned and lubricated according to standard procedures 2.5 Defective instruments, equipment and accessories are inspected and replaced according to manufacturer's specifications 2.6 Tools are inspected, repaired and replaced after use 2.7 Work place is cleaned and kept in safe state in line with OHSA regulations
3. Store tools and equipment	 3.1 Inventory of tools, instruments and equipment are conducted and recorded as per company practices 3.2 Tools and equipment are stored safely in appropriate locations in accordance with manufacturer's specifications or company procedures

VARIABLE	RANGE
1. Materials	Including but not limited to: 1.1 Lubricants 1.2 Cleaning materials 1.3 Rust remover 1.4 Rugs 1.5 Spare parts
2. Tools and equipment	 Including but not limited to: 2.1 Tools Cutting tools - hacksaw, crosscut saw, rip saw Boring tools - auger, brace, grinlet, hand drill Holding tools - vise grip, C-clamp, bench vise Threading tools - die and stock, taps 2.2 Measuring instruments/equipment
3. PPE	Including but not limited to: 3.1 Goggles 3.2 Gloves 3.3 Safety shoes 3.4 Aprons/Coveralls
4. Forms	 4.1 Maintenance schedule forms 4.2 Requisition slip 4.3 Inventory Form 4.4 Inspection Form 4.5 Procedures

EVIDENCE GUIDE	
1. Critical aspects of competency	 Assessment requires that the candidate: 1.1 Selected and used appropriate processes, tools and equipment to carry out task 1.2 Identified functional and non-functional tools and equipment 1.3 Checked, lubricated and calibrated tools, equipment and instruments according to manufacturer's specifications 1.4 Replaced defective tools, equipment and their accessories 1.5 Observed and applied safe handling of tools and equipment and safety work practices 1.6 Prepared and submitted inventory report, where applicable 1.7 Maintained workplace in accordance with OHSA regulations 1.8 Stored tools and equipment safely in appropriate locations and in accordance with company practices
2. Underpinning knowledge	 2.1 SAFETY PRACTICES 2.1.1 Use of PPE 2.1.2 Handling of tools and equipment 2.1.3 Good housekeeping 3.2 MATERIALS, TOOLS AND EQUIPMENT 2.2.1 Types and uses of lubricants 2.2.2 Types and uses of cleaning materials 2.2.3 Types and uses of measuring instruments and equipment 3.3 PREVENTIVE MAINTENANCE 2.3.1 Methods and techniques 2.3.2 Procedures
3. Underpinning skills	 3.1 Preparing maintenance materials, tools and equipment 3.2 Proper handling of tools and equipment 3.3 Performing preventive maintenance 3.3 Following instructions
4. Resource implications	 The following resources should be provided: 4.1 Workplace 4.2 Maintenance schedule 4.2 Maintenance materials, tools and equipment relevant to the proposed activity/task
5. Methods of assessment	Competency should be assessed through: 5.1 Direct observation 5.2 Written test/questioning relevant to Underpinning knowledge

6. Context of assessment	 6.1 Competency assessment may occur in workplace or any appropriate simulated environment 6.2 Competency assessment must be undertaken in accordance with the endorsed TESDA assessment guidelines

CORE COMPETENCIES

UNIT OF COMPETENCY:	PERFORM PRE- AND POST-OPERATION PROCEDURES FOR LIFTING EQUIPMENT
UNIT CODE:	CON833309
UNIT DESCRIPTOR:	This unit involves knowledge, skills and attitudes in performing procedures before and after productive operation of lifting equipment.

ELEMENT	PERFORMANCE CRITERIA
	<i>Italicized terms are elaborated</i> in the Range of Variables
 Perform visual check of equipment 	 1.1 <i>Lifting</i> equipment is selected based on job requirements. 1.2 <i>Operator-serviceable (OS) parts</i> are checked in accordance with equipment checklist and manufacturer's procedures. 1.3 <i>Walk-around check</i> is performed with equipment checklist and with engine stopped/not running.
2. Perform "B L O W A F" check	 2.1 <i>"BLOWAF" check</i> is performed with checklist form and with engine stopped/not running. 2.2 <i>Fluid</i> levels are maintained in accordance with equipment maintenance manual. 2.3 Abnormal conditions noted in checklist and reported to <i>authorized person</i>.
3. Perform operation check	 3.1 Starting/running check is performed with checklist and in accordance with manufacturer's recommendations. 3.2 Brake, steering and controls are checked for normal functioning as per manufacturer's specifications. 3.3 Walk-around check is performed with equipment checklist and while engine is running. 3.4 Safety devices are checked for proper functions in accordance with safe operating procedures.

	ELEMENT		PERFORMANCE CRITERIA
4.	Perform post-operation procedure	4.1	Equipment is parked and turned off after productive operation in accordance with company rules and regulations.
		4.2	Equipment controls are set into neutral position and parking brakes are engaged according to manufacturer's operations manual.
		4.3	Safety locks and brakes are all set/engaged in accordance with operator's manual.
		4.4	Walk-around inspection check is re- conducted while doing engine cool down
		4.5	Daily equipment time record/report (DETR) is accomplished/submitted according to company rules and regulations

RANGE OF VARIABLES

VARIABLE	RANGE
1. Lifting	 1.1 Rough-terrain Crane 1.2 Crawler Crane 1.3 Truck-mounted Crane 1.4 Forklift 1.4.1 Diesel 1.4.2 Gasoline or LPG 1.4.3 Electric 1.5 Tower Crane 1.5.1 Fixed Mounted 1.5.2 Rail Mounted 1.5.3 Self Erecting/Climbing Type 1.5.4 Free Standing Type 1.5.5 Luffing type
2. Lifting capacity	2.1 2.5 - 3.5 tons 2.2 5 - 10 tons 2.3 15 - 25 tons 2.4 35 tons and above
3. Operator serviceable parts (OS)	 3.1 Air cleaner 3.2 Battery terminals/Connection/Clamp/Case 3.3 Belt/Lifting Chain 3.4 Grease/lube points 3.5 Fuel water separator/radiator <u>Rough-terrain Crane, Truck-mounted Crane, Forklift</u> 3.6 Tire inflation <u>Forklift</u> 3.7 Fuel tank 3.8 Hydraulic and brake master cylinder 3.9 Engine oil fan 3.10 Lights 3.11 Steering/Suspension <u>Crawler Crane</u> 3.12 Track tension

 Critical aspects of evidence to be considered 	 Assessment requires evidence that the candidate: 1.1 Demonstrates ability to select equipment based on the job requirements 1.2 Demonstrates ability to check operator-serviceable (OS) parts 1.3 Demonstrates ability to perform walk-around and "BLOWAF" inspection following equipment checklist and with engine stopped/not running 1.4 Demonstrates ability to perform walk-around check while engine is running 1.5 Demonstrates ability to observe risk-control/safe procedures 1.6 Demonstrates ability to perform post-operation checking procedures 1.7 Demonstrates ability to accomplish and submit daily equipment time report (DETR)
2. Underpinning (related) knowledge	 2.1 Types and uses of personal protective equipment (PPE) 2.2 Controls, instruments, indicators and their usage 2.3 Start-up and shutdown procedures 2.4 Familiarity with manufacturer's operation manual 2.5 Familiarity with job site and work conditions 2.6 Familiarity with pre- and post-operation checklist
3. Underpinning skills	 3.1 Performing pre- and post-operation procedures of equipment using standard or special attachments 3.2 Using personal protective equipment 3.3 Maintaining equipment records 3.4 Communicating with work site personnel and clients 3.5 Complying with the manufacturer's operation and maintenance manual 3.6 Accomplishing pre- and post-operation checklist
4. Resource implications	Things necessary for the conduct of assessment 4.1 Appropriate work area for lifting equipment operation 4.2 Access to lifting equipment and manuals.
5. Method of assessment	Competency must be assessed through 5.1 Written/oral questioning 5.2 Direct observation/ practical demonstration 5.3 Work record and documents
6. Context for assessment	6.1 Assessment may be conducted on-the-job or in a simulated venue.

UNIT OF COMPETENCY:	PERFORM BASIC PREVENTIVE-MAINTENANCE SERVICING FOR LIFTING EQUIPMENT
UNIT CODE:	CON833310
UNIT DESCRIPTOR:	This unit involves the knowledge, skills and attitudes required in performing simple cleaning, greasing, replacement and similar routine basic preventive maintenance for <i>lifting equipment</i> .

ELEMENT	PERFORMANCE CRITERIA Bold and Italicized terms are elaborated in the Range of Variables
 Perform adjustment/s replacements 	 1.1 <i>Minor defects</i> are identified and remedied in accordance with company/manufacturer's procedures. 1.2 Tools are selected based on job requirements. 1.3 <i>Major defects</i> are identified using check list and referred to <i>appropriate personnel</i> for action.
2. Perform basic preventive maintenance servicing (PMS)	 2.1 OS parts/standards are identified and serviced according to manufacturer's recommendations. 2.2 Fluids and lubricants are used based on manufacturer's manual. 2.3 Basic hand tools and equipment and consumable materials are identified and used in accordance with job requirements. 2.4 Basic preventive maintenance servicing (PMS) is carried out in accordance with manufacturer's and/or site requirements/conditions.
3. Prepare equipment reports	 3.1 Daily checklist form is accomplished in accordance with manufacturer's/company requirements. 3.2 Minor/major equipment defects are reported to appropriate personnel.

RANGE OF VARIABLES

VARIABLE	RANGE	
1. Lifting equipment	1.1 Rough-terrain Crane 1.2 Truck-mounted Crane 1.3 Crawler Crane 1.4 Forklift 1.4.1 Diesel 1.4.2 Gasoline/LPG 1.4.3 Electric	
2. Minor defects	 2.1 Weak battery 2.2 Air lock 2.3 Tire inflation 2.4 Belt tension 2.5 Clogged air cleaner 2.6 Defective radiator cap Forklift 2.7 Loose clamps. Bolts and mountings 2.8 Presence of water in fuel separator 	
3. Major defects		

VARIABLE	RANGE
	3.14 Defective electrical components 3.14.1 Charging 3.14.2 Lighting 3.14.3 Starting 3.14.4 Monitoring/gauges
4. Appropriate personnel	 4.1 Equipment supervisor/Foreman 4.2 Chief mechanic 4.3 Equipment maintenance personnel <u>Forklift</u> 4.4 Dispatcher 4.5 Motor pool supervisor
5. Operator Serviceable (OS) parts	 5.1 Battery clamps 5.2 Belts 5.3 Filters 5.3.1 Air cleaner 5.3.2 Water fuel separator/drain valve 5.4 All fluid caps 5.5 All grease points and fittings 5.6 Wire rope grease/lubricants Forklift 5.7 Battery distilled water 5.8 Chain grease 5.9 All caps (e.g., water, oil, fluid, fuel)
6. Standards	6.1 Oil pressure 6.2 Air pressure 6.3 Temperatures 6.4 Tension 6.5 Clearance and distances <u>Forklift</u> 6.6 Hydraulic pressure 6.7 Fuels 6.7.1 LPG 6.7.2 Diesel 6.7.3 Gasoline 6.7.4 Electric 6.8 Charging rate

VARIABLE	RANGE	
7. EVIDENCE GUIDE	
 Critical aspects of evidence to be considered 	 Assessment requires evidence that the candidate: 1.1 Demonstrates ability to observe safety precautions 1.2 Demonstrates ability to identify minor defects with checklist and service them in accordance with company rules and regulations 1.3 Demonstrates ability to identify major defects with checklist and report them to appropriate personnel 1.4 Demonstrates ability to identify OS parts/standards from manufacturer's reference books/manuals 1.5 Demonstrates understanding of recommended fluid and lubricants 1.6 Demonstrates ability to use basic hand tools and equipment 1.7 Demonstrates ability to accomplish and submit daily checklist forms and reports
2. Underpinning (related) knowledge	 2.1 Company rules and regulations 2.2 Basic unit specifications (BUS) 2.3 Safety (PPE, machine and environmental) 2.4 Controls and gauges 2.6 Components, systems and functions 2.7 Comprehension of operation and maintenance manual 2.8 Fluids and lubricants 2.9 Uses of basic hand tools and equipment
3. Underpinning skills	 3.1 Using personal protective equipment (PPE) 3.2 Accomplishing daily checklist forms 3.3 Performing basic preventive maintenance 3.4 Using basic hand tools and equipment 3.4 Reporting minor and major defects
4. Resource implications	 Things necessary for the conduct of assessment 2.1 Access to lifting equipment specifications and manuals 4.2 Access to lifting equipment 4.3 Basic hand tools and equipment 4.4 Fluids and lubricants 4.5 PPE 4.6 Safety signages/barricades
5. Method of assessment	Competency must be assessed through 5.1 Written and/or oral questioning 5.2 Direct observation/ practical demonstration 5.3 Work record and documents

6. Context for assessment	 6.1 Competency shall be assessed in a normal or simulated workplace environment and in accordance with safe work procedures 6.2 Competency shall be assessed while work is being undertaken independently
---------------------------	--

UNIT OF COMPETENCY:	PERFORM PRODUCTIVE OPERATION FOR ROUGH-TERRAIN CRANE	
UNIT CODE:	CON833311	
UNIT DESCRIPTOR:	This unit involves knowledge, skills and attitudes in lifting, transferring and handling loads and materials using Rough-Terrain Cranes.	

ELEMENT	PERFORMANCE CRITERIA Italicized terms are elaborated in the Range of Variables
 Load/unload crane to low- bed trailer 	 1.1 Low-bed trailer for transporting the Crane is selected according to job requirements. 1.2 Boom position is followed during loading/ unloading in accordance with standard operating procedures. 1.3 Crane is loaded/unloaded and positioned based on standard operating procedure. 1.4 Verbal messages and non-verbal signals are conveyed with authorized <i>signalman</i> during loading/unloading as per standard operating procedure. 1.5 All safety locks and control levers are secured at neutral position before and after loading based on manufacturer's specifications. 1.6 Wheels are secured with stopper blocks and jacked (outrigger) in accordance with safety procedures. 1.7 Body frame is secured with binders in accordance with safety procedures. 1.8 Main hook and auxiliary blocks are secured based on safety procedures.

2. Travel the crane	 2.1 Work area is surveyed for safe accessibility or <i>potential hazards</i> in accordance with safe operating procedures. 2.2 Outrigger assembly position is followed based on safe operating procedures. 2.3 Boom is secured in place during travel in accordance with safe operating procedures. 2.4 Travel speed is maintained in accordance with safe operating procedures.
	2.5 Hook Block on front frame is secured in place in accordance with safe operating procedures.2.6 Assistance from signalman is sought when
	necessary in accordance with safe operating procedures.
	 2.7 Unexpected situations are responded to in line with company rules and regulations.
3. Set-up crane	3.1 Crane is set-up and positioned in accordance with <i>safety procedures and requirements</i>
	3.2 Working condition of crane is tested as per standard operating procedures
	3.3 Unexpected situations in setting up the crane
	are responded to in line with company rules and regulations.
4 Read and interpret load chart	4.1 Weight of the load is determined based on <i>load information</i> .
	4.2 Lifting capacity is determined according to working radius and boom length.
	4.3 <i>Rigging gears</i> and their weight are
	determined in accordance with manufacturer's specifications.
	4.4 Weight of any attachments such as main and auxiliary hook blocks, fly jib are considered as part of the load.
	4.5 Lifting capacity in the load chart is followed according to manufacturer's specifications and
	equipment conditions. 4.6 Doubt about the lifting capacity of the crane is reported to immediate supervisor based on standard operating procedures.

 standard operation is controlled based off standard operating procedures. 5.2 Safe work procedures are followed during <i>lifting operation</i> in accordance with safety practices. 5.3 Unexpected situations are responded to in line with company rules and regulations. 	5 Perform liftin transferring o	of load 5.2	 Safe work procedures are followed during lifting operation in accordance with safety practices. Unexpected situations are responded to in line
---	------------------------------------	----------------	---

RANGE OF VARIABLES

VARIABLE	RANGE
1. Signalman	1.1 Spotter 1.2 Helper
2. Potential hazards	 2.1 Other equipment 2.2 Building 2.3 Deep excavation 2.4 Sloping ground 2.5 Wind aloft (exceeding wind velocity of 20 mph) 2.6 Fog 2.7 Uneven terrain 2.8 Overhead "live" electrical wires 2.9 Underground utilities 2.10 Unstable ground
3. Safety procedures and requirements	 3.1 Lifting Plan is thoroughly checked in accordance with job requirements 3.2 Load chart is read/interpreted in accordance with lifting configuration. 3.3 Work area is barricaded with appropriate informative warning signages installed. 3.4 Crane is positioned on a stable working ground condition in accordance with safe lifting requirements. 3.5 Wheels and outrigger beams are adequately positioned and observed in accordance with safety requirements. 3.6 Cribbing under outrigger floats is used adequately with safety requirements. 3.7 Crane level is observed to ensure safety and stability. 3.8 Usable headroom for proper sling selection is determined to ensure safe operation. 3.9 Appropriate number of parts of line is reeved to ensure safe working load. 3.10 Trial lift without load is performed to ensure safe lifting operation. 3.11 Communicated with rigger to ensure load is secured with appropriate rigging gears 3.12 Risk control procedure is implemented in case of adverse environmental conditions.
4. Load information	4.1 Bill of ladings4.2 Packing and shipping list4.3 Load specifications

5. Rigging gears	5.1 Hoist hook 5.1.1 Eye shank 5.1.2 Shank shivel 5.1.3 Swivel hook 5.2 Sliding choker 5.3 Sure lock hook 5.3.1 Eye hook 5.3.2 Swivel hook 5.3.2 Swivel hook 5.3.3 Clevis hook 5.3.4 Shank hook 5.4 Eye sling hook 5.5 Clevis sling hook 5.6 Grab hook (eye or clevis) 5.7 Weld-on hook 5.8 Sorting hook 5.9 Barrel hook 5.10 Latch 5.10.1 Shank hook 5.10.2 Swivel hook 5.10.3 Clevis sling hook 5.10.4 Eyes sling hook 5.10.5 Eye hook
6. Lifting capacity	6.1 Obsolescence (life span)6.2 Equipment history6.3 Machine performance6.4 Wear and tear
7. Safe work procedures	 7.1 All slings, ties and hooks are placed and secured correctly before raising the load. 7.2 Load striking the ground, machine or any other object is prevented. 7.3 The boom is prevented from striking any obstruction. 7.4 Shock loading is avoided. 7.5 Dynamic loading is avoided. 7.6 Load handling is observed. 7.7 Lifting gears are checked in accordance with job requirements
8. Lifting operation	 8.1 Safety devices 8.2 Release swing lock 8.3 Boom swing, up and down 8.4 Hoisting up and down 8.5 Release house lock

VARIABLE	RANGE
9. Unexpected situations	 9.1 Sudden engine breakdown 9.2 Busted hydraulic hose and oil leakages 9.3 Broken wire rope 9.4 Sudden loss of brake 9.5 Hitting high tension wire 9.6 Loss control of steering 9.7 Sudden ground failure 9.8 Equipment malfunctioning 9.9 Force majeure e.g., earthquake, fire, tornado 9.10 Operator fatigue or sickness/condition 9.11 Adverse environmental condition 9.12 Accidents/incidents

 Critical aspects of evidence to be considered 	 Assessment requires evidence that the candidate: 1.1 Demonstrates ability to load to and unload crane from low- bed trailer 1.2 Demonstrates ability to perform travel operation 1.3 Demonstrates ability to set-up crane 1.4 Demonstrates ability to read and interpret load chart 1.5 Demonstrates ability to perform lifting and transferring of load 1.6 Demonstrates ability to carry-out safe work practices 1.7 Demonstrates ability to communicate with Riggers during lifting operation
2. Underpinning (related) knowledge	 2.1 Safe operating procedures and practices 2.2 Statutory safety rules and regulations 2.3 Understanding load chart 2.4 Understanding Lifting/Rigging Plans 2.5 Company/in-house policies and procedures 2.6 Site/terrain layout and obstacles 2.7 Familiarity with type and weight of loads 2.8 Familiarity with rigging gears and its applications 2.9 Familiarity with rigging signals 2.10 Basic calculations 2.11 Defensive driving 2.12 Reading Load Chart, Lifting/Rigging plan 2.13 Crane operating limits and parameters using load chart. 2.14 Knowledge of basic calculations
3. Underpinning skills	 3.1 Accomplishing crane checklist and reports 3.2 Reporting crane component failure 3.3 Performing actual operation procedure of crane 3.4 Performing safety procedures and practices 3.5 Determining weight of loads 3.6 Following load charts applications 3.7 Using/Following correct rigging signals 3.8 Calculating skills 3.9 Applying eye and hand coordination 3.10 Operating Rough-terrain Crane
4. Resource implications	 Things necessary for the conduct of assessment 4.1 Access to Rough-Terrain Crane and job site/terrain 4.2 Available loads 4.3 Barricades and informative signage 4.4 Rigging gears 4.5 Prime mover and low-bed trailer with ramp

5. Method of assessment	Competency must be assessed through 5.1 Written/Oral questioning 5.2 Direct observation/ practical demonstration 5.3 Work record and documents
6. Context for assessment	6.1 Assessment may be conducted in the work site or in a simulated venue.

SECTION 3 TRAINING STANDARDS

These guidelines are set to provide the Technical and Vocational Education and Training (TVET) providers with information and other important requirements to consider when designing training programs for HEAVY-EQUIPMENT OPERATION (Rough-terrain Crane) NC II.

3.1 CURRICULUM DESIGN

Course Title : <u>HEAVY EQUIPMENT OPERATION - ROUGH-TERRAIN</u> <u>CRANE</u>

NC Level: II

BASIC COMPETENCIES

Nominal Training Hours: 18 Hours (Basic) + 18 Hours (Common) Course Description:

This course is designed to equip individuals with the basic, common and core competencies in Construction Sector particularly in Heavy-Equipment Operation (Rough-terrain Crane).

To obtain this, all units prescribed for this qualification must be achieved:

BASIC COMPETENCIES

Unit of Competency	Learning Outcomes Methodology		Assessment Approach	
1. Participate in workplace communication	 1.1 Obtain and convey workplace information. 1.2 Complete relevant work related documents 1.3 Participate in workplace meeting and discussion. 	Group discussion Interaction	 Demonstration Observation Interviews/ questioning 	
2. Work in a team environment	5		 Demonstration Observation Interviews/ questioning 	

Unit of Competency	Learning Outcomes	Methodology	Assessment Approach	
3. Practice career professionalism	 3.1 Integrate personal objectives with organizational goals. 3.2 Set and meet work priorities. 3.3 Maintain professional growth and development. 	Discussion Interaction	 Demonstration Observation Interviews/ questioning 	
4. Practice occupational health and safety	 4.1 Evaluate hazard and risks 4.2 Control hazards and risks 4.3 Maintain occupational health and safety awareness 	Discussion Plant tour Symposium	ObservationInterview	

COMMON COMPETENCIES

Unit of Competency	Learning Outcomes	Methodology	Assessment Approach
1. Prepare construction materials and tools	 1.8 Identify Materials 1.9 Requisition Materials 1.10 Receive and inspect materials 	Audio Visual simulation Discussion Practical exercise Demonstration	 Direct observation Questions or interview Portfolio (credentials) Written / Oral Test Demonstration
2. Observe procedures, Specifications and Manuals of Instructions	2.1 Identify and access specification/ manuals	Audio Visual Simulation Discussion Practical Lab Demonstration	 Direct observation Oral questioning Written test or examination Third party report Demonstration (able to impart knowledge and skills)
3. Interpret Technical Drawing	 3.1 Analyze sign, symbols and data 3.2 Interpret technical drawing and plans 3.3 Apply freehand sketching 	Audio Visual Simulation Discussion Practical Lab Demonstration	 Direct observation Oral questioning Written test or examination Third party report Demonstration (able to impart knowledge and skills)
4. Perform mensurations and calculation	 4.1 Select measuring instruments 4.2 Carry out measurements and calculations 	Audio Visual Simulation Discussion Practical Lab Demonstration	 Direct observation Oral questioning Written test or examination Third party report Demonstration (able to impart knowledge and skills)

Unit of Competency	Learning Outcomes	Methodology	Assessment Approach
5. Maintain tools and equipment	 5.1 Check condition of tools and equipment 5.2 Perform basic preventive maintenance 5.3 Sharpen edge and tooth cutting tools 5.4 Store tools and equipment 	Audio Visual Simulation Discussion Practical Lab Demonstration	 Direct observation of application of tasks Oral questioning Written test or examination Third party report Demonstration

CORE COMPETENCIES

Course Title : <u>HEAVY EQUIPMENT OPERATION</u> Level: NC II ROUGH-TERRAIN CRANE

Nominal Training Hours: 120 Hours

Course Description:

This course is designed to enhance knowledge, desirable attitudes and skills in the use of rough-terrain crane in accordance with industry standards. It covers core competencies such as: performing pre- and post-operation procedures, performing productive operation, and performing basic preventivemaintenance servicing on a given rough-terrain crane.

To obtain this, all units prescribed for this qualification must be achieved:

Unit of Competency	Learning Outcomes	Methodology	Assessment Approach
1. Perform pre- and post-operation procedures for Rough-terrain Crane	 1.1 Identify rough-terrain crane types / components parts 1.2 Perform visual check of equipment 1.3 Check BLOWAF of rough-terrain crane 1.0.1 Battery 3.2 Light 3.3 Oil 3.4 Water 3.5 Air 3.6 Fuel 1.4 Check rough-terrain crane system operation 1.5 Check safety devices accessories 1.6 Perform post operation check 	Lecture Practical / Demonstration	 Observation and oral questioning Demonstration and oral questioning Written test

Unit of Competency	Learning Outcomes	Methodology	Assessment Approach
2. Perform productive operation for Rough-terrain Crane	 2.1 Perform loading and unloading of rough-terrain crane to trailer (low bed) 2.2 Perform rough- terrain crane application 2.2.1 travel 2.2.2 position the crane 2.2.3 lifting and transferring 	Lecture Practical / Demonstration	 Observation and oral questioning Demonstration and oral questioning Written test
3. Perform basic maintenance servicing for Rough-terrain Crane	3.1 Perform safety practices, and housekeeping3.2 Perform preventive maintenance and servicing	Lecture Practical / demonstration	 Observation and oral questioning Demonstration and oral questioning Written test

3.2 TRAINING DELIVERY

The delivery of training should adhere to the design of the curriculum. Delivery should be guided by the 10 basic principles of competency-based TVET.

- The training is based on curriculum developed from the competency standards;
- Learning is modular in its structure;
- Training delivery is individualized and self-paced;
- Training is based on work that must be performed;
- Training materials are directly related to the competency standards and the curriculum modules;
- Assessment is based in the collection of evidence of the performance of work to the industry required standard;
- Training is based both on and off-the-job components;
- Allows for recognition of prior learning (RPL) or current competencies;
- Training allows for multiple entry and exit; and
- Approved training programs are nationally accredited.

The competency-based TVET system recognizes various types of delivery modes, both on and off-the-job as long as the learning is driven by the competency standards specified by the industry. The following training modalities may be adopted when designing training programs:

- The dualized mode of training delivery is preferred and recommended. Thus programs would contain both in-school and inindustry training or fieldwork components. Details can be referred to the Dual Training System (DTS) Implementing Rules and Regulations.
- Modular/self-paced learning is a competency-based training modality wherein the trainee is allowed to progress at his own pace. The trainer facilitates the training delivery
- Peer teaching/mentoring is a training modality wherein fast learners are given the opportunity to assist the slow learners.

- Supervised industry training or on-the-job training is an approach in training designed to enhance the knowledge and skills of the trainee through actual experience in the workplace to acquire specific competencies prescribed in the training regulations.
- Distance learning is a formal education process in which majority of the instruction occurs when the students and instructor are not in the same place. Distance learning may employ correspondence study, or audio, video or computer technologies.

3.3 TRAINEE ENTRY REQUIREMENTS

This section specifies the qualifications of trainees and educational experience. Other requirements like health and physical requirements may also be stated. Passing written entrance examinations may also be indicated if necessary.

- Can communicate both orally and in writing
- Physically and mentally fit
- With good moral character
- Can perform basic mathematical computations.

3.4 LIST OF TOOLS, EQUIPMENT AND MATERIALS

Recommended list of tools, equipment and materials for the training of 25 trainees for the operation of rough-terrain crane.

TOOLS		EQUIPMENT		MATERIALS	
QTY		QTY		QTY	
1 set	 Wrenches (box and open-end 8-24 mm- metric & 7/16 –1" - English) 	1 unit	 Rough –terrain Crane (MOA /rental) 	5 kls	 Multi- purpose grease
1 set	• Hammer ballpeen (3-4 lbs)	1 unit	 Low bed trailer with tractor head & operator (MOA/rental) 	4 liters	• Engine oil (SAE 15w40)
1 set	• Pliers(mechanical 10 ")	1 unit	 Vacuum cleaner 	20 liters	 Hydraulic / steering fluid (TELLUS 68/10W)
1 pc	 Adjustable wrench (18 ") 	1 unit	 Portable electric air compressor 	10 liters	 Final drive/ differential (gear oil GP90/ 140)
1 pc	• Grease gun			10 liters	 Transmission oil (ATF)
1 set	• Screw driver (10 " flat & Philips)			4 liters	Water coolant
1 pc	Putty knife			200 liters	Diesel fuel
1 pc	 Pry bar (heavy duty) 			5 liters	 Battery distilled water
				1 set	 Primary & secondary air filter
				1 pair	Working clothes
				10 pairs	 Safety shoes
				10 pairs	• Gloves

TOOLS		EQUIPMENT		1	MATERIALS	
QTY		QTY		QTY		
				10	 Goggles 	
				pcs		
				10	 Dust Mask 	
				pcs		
				10	 Hard hat 	
				pcs		
				2	 Test weights 	
				units	- 3 tons	
					- 10 tons	
				1 pc	 Crawler Crane 	
					miniture	
				1 pc	 Operator's 	
					manual with	
					load chart	

3.5 TRAINING FACILITIES

The rough-terrain crane operation workshop must be of concrete structure. Based on class size of 25 students/trainees the space requirements for the teaching/learning and circulation areas are as follows:

SPACE REQUIREMENT	SIZE IN METERS	AREA IN SQ. METERS	TOTAL AREA IN SQ. METERS
 Student/Trainee's Working Space 	2.0 x 2.0 meters	4 sq.m per student	100.0 sq.m.
Lecture Room	8.00 x 6.00	48.00	48.0
Learning Resource Center	4.00 x 6.00	24.00	24.0
•			172
Facilities/Equipment/ Circulation Area	-	-	52
TOTAL WORK AREA	-		224
Working field	0.25 hectare (MO	A/Rental)	

3.6 TRAINERS' QUALIFICATION HEAVY EQUIPMENT OPERATION (LIFTING)

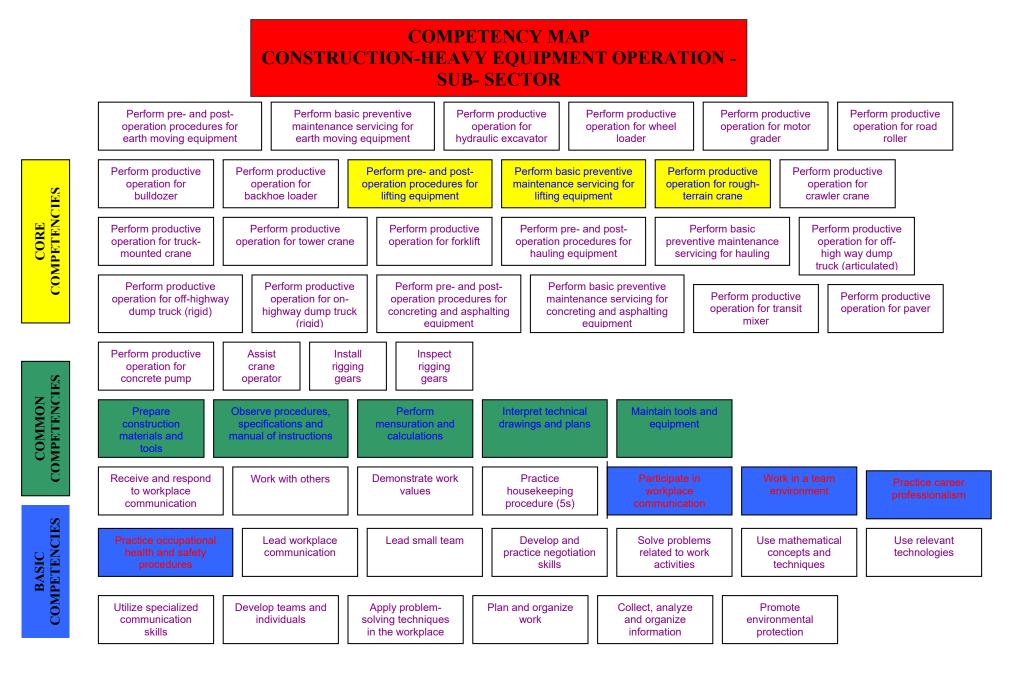

TRAINER QUALIFICATION (TQ II)

- Must be a holder of Heavy-Equipment Operation (Rough-Terrain Crane) NC-II or equivalent qualification
- Must have undergone training on Training Methodology II (TM II) or equivalent in training/experience
- Must be computer-literate
- Must be physically and mentally fit
- Must have at least 5 years job/industry experience*
- Must be a civil-service eligible or holder of appropriate professional license issued by the Professional Regulations Commission (for government position)
- * Optional. Only when required by the hiring institution.

Reference: TESDA Board Resolution No. 2004-03

SECTION 4 NATIONAL ASSESSMENT AND CERTIFICATION ARRANGEMENTS

- 4.1 To attain the National Qualification of HEAVY-EQUIPMENT OPERATION (Rough-Terrain Crane) NC II, the candidate must demonstrate competence in all the units of competency in Section 1. Successful candidates shall be awarded National Certificates signed by the TESDA Director General.
- 4.2 The qualification of **HEAVY EQUIPMENT OPERATION (Rough-Terrain Crane) NC II** may be attained through demonstration of competence in a project-type assessment covering the following core units. Candidates may apply for assessment in any accredited assessment center.
 - 4.2.1 Rough-Terrain Crane operation
 - Perform pre- and post-operation for lifting equipment
 - Perform productive operation for rough-terrain crane
 - Perform basic preventive maintenance servicing for lifting equipment
- 4.3 Assessment shall focus on the core units of competency. The basic and common units shall be integrated or assessed concurrently with the core units.
- 4.4 The following are qualified to apply for assessment and certification:
 - 4.4.1 Graduates of formal, non-formal and/or informal training including enterprise-based training programs
 - 4.4.2 Experienced Workers (wage-employed or self-employed)
- 4.5 The guidelines on assessment and certification are discussed in detail in the *Procedures Manual on Assessment and Certification* and *Guidelines on the Implementation of the Philippine TVET Qualification and Certification System (PTQCS).*

Definition of Terms

For the purpose of these Competency Standards, the words

1.	Attachment	Refers to anything like clamshell, drag line, boring (drilling) equipment, pile driver, drop hammer of other accessories/special attachments used instead of the conventional lift block to perform different types of lifting jobs.
2.	Boom (crane)	Refers to the rotating superstructure and used for supporting the hoisting tackle.
3)	Boom Length	Refers to the measurement from the boom foot pins to the center of the boom point sheaves.
4.	Portfolio	A tool containing pieces of evidence demonstrating work outputs that have been collected by the candidate. The items are usually produced over a period of time and come from different sources.
5.	Reeving	Refers to a rope system in which the rope travels around the drums and sheaves.
6.	Rough-terrain Crane	Refers to equipment, which has four-wheel crab and tram steering as well as the normal two wheel front steering capabilities. This equipment also both two-wheel and four-wheel drive capabilities to enhance its usability.
7.	Standard	Refers to a degree or level of requirement set by the manufacturer.
8.	Stability	Refers to the machine resistance to overturning (Rough-terrain and Truck-mounted Cranes - lifting on outriggers are based on 85 percent of their tipping capacity).
9.	Safety Devices	Refer to boom angle indicators, load moment indicators, anti-two blocking devices (where applicable), boom kick out lever, etc.
10	.Work Area	Normally refers to any place inside the swing circle of the crane. It must be barricaded off and only those directly involve in the lift shall be allowed to entry.

ACKNOWLEDGEMNTS

The Technical Education and Skills Development Authority (TESDA) wishes to extend thanks and appreciation to the many representatives of business, industry, academe and government agencies who contributed their time and expertise to the development and validation of these Training Regulations.
