Philippine **TVEt** Statistics

2014 - 2016

PREFACE

Technical Education and Skills Development Authority (TESDA) regularly monitors and releases data series on enrolment and graduates of technical-vocational education and training (TVET) and other related statistics.

The **Philippine TVET Statistics: 2014-2016** contains historical data on TVET outputs specifically on enrolment, graduates, assessment and certification.

Likewise, education and employment-related statistics are included in this publication for reference use and inputs to policy formulation and program development.

Aside from TESDA, other data sets, particularly on population, labor and employment and basic education were sourced from Philippine Statistics Authority (PSA), Department of Labor and Employment (DOLE), Department of Education (DepEd) and Commission on Higher Education (CHED).

We hope this publication serves as a useful resource material for policymakers, administrators and planning offices of TVET institutions, training partners in the Local Government Units (LGUs), Non-Government Organizations (NGOs) and researchers and students in relevant education fields.

Notes: The methodology for the computation of annual estimates of labor and employment indicators is based on a Resolution found in the PSA website, Approving and Adopting the Official Methodology for Generating annual Labor And Employment Estimates, using the average estimates of the four LFS rounds.

For 2015, the annual estimates do not include estimates from Leyte of Region VIII or Eastern Visayas. For annual estimates for 2014 which do not include Leyte are average LFS estimates of the three-quarter rounds only (April, July and October). Details may not add up to totals due to rounding.

The annualization of the LFS data for 2014 is based on agreement in the inter-agency committee on labor and productivity statistics

The annual estimates for 2014 which do not include Leyte are average LFS estimates of the three-quarter rounds only (April, July and October)

For 2015, the annual estimates do not include estimates from Leyte of Region VII or Eastern Visayas.

The methodology for the compilation of annual estimates of labor and employment indicators is based on a Resolution found in the PSA website, Approving and Adopting the Official Methodology for Generating Annual Labor and Employment Estimates,

using the average estimates of the four LFS rounds

The annualization of the LFS data for 2014 is based on agreement in the inter-agency committee on labor and productivity statistics

The annual estimates for 2014 which do not include Leyte are average LFS estimates of the three-quarter rounds only (April, July and October)

For 2015, the annual estimates do not include estimates from Leyte of Region VII or Eastern Visayas.

The methodology for the compilation of annual estimates of labor and employment indicators is based on a

Resolution found in the PSA website, Approving and Adopting the Official Methodology for Generating Annual Labor and Employment Estimates, using the average estimates of the four LFS rounds

Notes:

1. Labor productivity is computed as Gross Domestic Product (GDP) per employed person.
 2. Beginning 2006, employment data were based on the 2000 Census-based population projections.
 3. Labor productivity data for 2014 were computed using the average of April, July and October employment data which excluded Leyte province. For comparability, the 2014 growth rates were computed using the 2013 labor productivity data whose employment data was the average of April, July and October which excluded Leyte province.
 4. Labor productivity data for 2015 were computed based on the annualized LFS data using the average of January, April, July and October employment data which excluded Leyte province. For comparability, the 2015 growth rates were computed using the April, July and October employment data which excluded Leyte province.
 5. Starting April 2016 round, the LFS adopted the 2013 Master Sample Design as well as the population projections based on the 2010 Census of Population and Housing (2010 CPH) while previous survey rounds were derived using the 2000 CPH population projections.
 6. Labor productivity data for 2016 were computed using the average of the four survey rounds employment data with the January 2016 data based on the 2010 Census-based population projections.
- * Less than 0.05 percent.
- NA Not Available. 2016 growth rates can not be computed because of the change in population benchmark using the 2010 CPH.

Notes: 1. Details may not add up to totals due to rounding.

2. The province of Leyte was not covered in 2014; January and April 2015 LFS. Data reflected for July 2015 and onwards already include the province of Leyte.

3. Annualized data for 2014 refer to the average of estimates for April, July and October survey rounds. The estimates for these rounds exclude data of Leyte province only while that of January exclude Region VIII.

4. Annualized data for 2015 refer to the average of the four survey rounds that exclude Leyte. These should not be compared with the 2014 annualized data as the latter exclude the January round. The use of the 4 survey rounds for the

2015 annualized data was based on results of a referendum conducted among members of the IAC on Labor and Productivity Statistics.

5. Annualized data for 2016 was computed as the average of four survey rounds using the January 2016 data that were based on the 2010 Census-based population projections.
